EDUCATION

The University of Texas at Dallas

May 2020

Master of Information Technology Management

GPA - 3.30/4.00

Dean's Excellence Scholarship

Relevant coursework: Data Management, Statistics & Data Analysis, Data Visualization, Data Warehousing
Azure Data Analysis, System Analysis & Project Management, Operations Management

Maulana Azad National Institute of Technology

May 2014

Bachelor of Technology in Computer Science Engineering

GPA - 3.60/4.00

TECHNICAL SKILLS

Programming Languages: SQL, T-SQL, Python, SAS

Platform/Tools: Power BI, DAX, Power Pivot, Power Query, M Query, Power BI Service, Report Builder, Git, VS Code, Office 365, Tableau Desktop, Tableau Server, Qlik, ETL, Excel, SSRS, SSIS, Business Objects, ETL, Jupyter Notebook, SAS Studio, SharePoint, Salesforce, S3, Athena, Azure DevOps, ADF, Synapse, Jira, Confluence

Databases: Microsoft SQL Server, Snowflake, MySQL, PostgreSQL, IBM DB2, Azure SQL

SUMMARY

- Decisive and dedicated IT professional having 8+ years of experience in Data analytics/Business Intelligence projects.
- Highly analytical and process-oriented Data Analyst with in-depth knowledge of database types, data capture, curation, manipulation, and visualization.
- Proficient in identifying efficiencies and problem areas within data streams, while communicating needs for projects.
- Expertise in Data Preparation, Data cleansing, Data manipulation, and Business Intelligence for data analysis and creating innovative dashboard reports for business decision making.
- Translate business requirements into technical terms and drive team effort to design, build and manage technology solutions that solve business problems.
- Good experience with Data Wrangling (merging, grouping, concatenating, etc.) using Tableau, Power BI, Python and Excel.
- Analyzing and acquiring experiences into large data sets, creating visually compelling and actionable interactive reports and dashboards.
- Excellent work ethics, strong customer support, documentation, training, and interpersonal skills.
- Key skills include Data Management, Data Analysis, Data Visualization, Critical Thinking, Gap analysis, Root Cause Analysis.
- Good communication and interpretation skills to keep project environment moving at a smooth and healthy pace.

CERTIFICATIONS

- DP-900 Microsoft Certified: Azure Data Fundamentals Jan 2025
- PL-300 Microsoft Certified: Power BI Data Analyst Associate Oct 2024
- Medidata Classic Rave Certified Study Builder May 2023
- SAS Certified Specialist: Base Programming using SAS 9.4 Feb 2020
- Tableau Desktop Specialist Mar 2020
- Data Analytics Fundamentals – Amazon Web Services Mar 2020

BUSINESS EXPERIENCE

People Tech Group, Remond, WA

Data Analyst/Business Intelligence Engineer

Jan2024-Present

- Analyzed large datasets to identify trends & patterns, helping the company optimize operations & improve business processes
- Utilized SQL Server to extract, clean, and manipulate large datasets from various data sources for making quality data
- Developed and maintained relationships between database tables to ensure referential integrity and increase performance
- Utilized Python (Pandas, NumPy) to clean, transform, and analyze large datasets, improving data processing time by 30%
- Developed & maintained complex business data models to support business intelligence solutions as per client's requirement
- Extracted data from various sources SQL Server, Snowflake, Azure DevOps, Azure SQL, flat files & transformed it using Power Query for analysis phase
- Created data models and complex DAX calculations to support business requirements and Key Performance Indicators (KPIs)
- Designed interactive Power BI/Tableau dashboards & reports that provided actionable insights to business stakeholders for better business decision making & thereby, saved 40% manual effort
- Developed and implemented Row-Level Security (RLS) models to ensure users access only relevant data based on their roles
- Experience with using Azure DevOps for managing CI/CD pipelines, including building and deploying Power BI projects

- Created branches, made successful updates to the requirements in Power BI reports & Paginated reports, created pull request to be moved from DEV to UAT to Prod environment on weekly deployment in the project and progressed it timely
- Utilized Power BI Service's usage metrics reports to track and analyze report and dashboard performance, user interactions, and overall usage trends across teams or departments
- Collected data on user engagement, report views, frequency of use, and other key performance indicators (KPIs) to gauge the effectiveness of business intelligence initiatives
- Collaborated with business stakeholders to gather requirements and translate them into technical solutions
- Identified areas where automation could be implemented that saved business 30 manual hours every week
- Created and customized paginated reports by using Power BI Report Builder (SSRS) ensuring business financial reports accuracy and reliability of data presentation
- Created Workspace, configured Apps in Power BI Service and provided to access to analytics team, project managers, end users for analyzing sales, inventory and other parts of business
- Worked closely with business stakeholders to understand their reporting needs and translated them into technical requirements
- Successfully conducted training sessions for end-users to promote self-service analytics adoption
- Provided guidance and training to end-users and other team members on Power BI features and tool's best practices

Comcast (Vendor- Tata Elxsi), Philadelphia, PA

Power BI/ Tableau Developer

Oct2023-Dec2023

- Responsible for data preparation, data cleansing, data manipulation, data wrangling and getting quality data for reporting phase
- Worked closely with business stakeholders to gather and refine requirements for the business needs and reporting purpose
- Responsible for the integration of these dashboards with various data sources including Snowflake tables, SQL Server database
- Plan, design and develop innovative dashboards using Power BI and Tableau on the Comcast Security Controls Framework and Privacy Control Framework
- Successfully contributed to Data Quality resolution strategies and practices which resulted in 20% reduction in service requests
- Developed interactive Tableau dashboards and reports to visualize key performance metrics, improving decision-making and business performance
- Leveraged Tableau Server to distribute and share business reports across the organization and to the stakeholders
- Created data models and DAX calculations to support complex business requirements and Key Performance Indicators (KPIs)
- Configured and maintained data source connections, gateways, and data refresh schedules in Power BI
- Trained end-users on how to use Power BI/Tableau reports and dashboards effectively for the betterment of the business
- Successfully scheduled these dashboard reports from the Power BI service tools and auto deliver it to the end-customers

ClinChoice (formerly FMD K&L), Fort Washington, PA

Data Analyst/ BI Developer

Apr2021-Jul2023

- Knowledge and understanding of CDISC standards (CDASH, SDTM, Adam), GCP standards, FDA and ICH guidelines, 21 CFR Part 11 and recommended best practices.
- Performed data extraction, mapping, and profiling by using SQL Server for data handling and preparation
- Responsible for data preparation, data cleansing, data manipulation, data wrangling and getting quality data for analysis phase
- Used PROC SQL, PROC MEANS, PROC FREQ, and PROC REPORT to analyze large datasets and generate insights
- Extracted, cleaned, and analyzed large datasets using SAS Studio to support business decisions.
- Designed and developed complex SQL queries, stored procedures, and views to extract and manipulate data
- Build and modify tables, views and optimize SQL queries indexes as needed for better performance
- Successfully analyzed SQL queries for performance improvements and build appropriate and useful reporting deliverables
- Experience in creating stored procedures, triggers, views, sub-queries, and joins for complex queries involving multiple tables
- Collaborated with team members to solve database-related issues and enhance system performance
- Develop, optimize & troubleshoot SQL queries, stored procedures resulting in a 20% improvement in application performance
- Create & maintain database documentation including data dictionaries & ER diagrams, to facilitate system understanding & maintenance
- Conduct in-depth data analysis to identify trends, patterns, and opportunities for process optimization, cost reduction, and revenue enhancement
- Wrote complex Measures in Power BI depending on the requirement using DAX queries to achieve key performance indicators
- Designed, developed, & supported interactive Power BI dashboard reports to draw clean and concise effective healthcare business insights
- Developed and implemented SAP Business Objects reports and dashboards for improving decision-making processes for managing various clinical trial studies and thereby reducing manual report work by 25%
- Successfully maintained and deployed reports based on the business requirements in MS SQL Server environment using SSRS
- Keen to identify and make recommendations for improvements when problems or opportunities arise
- Performed comprehensive quality control procedures and successfully completed every task following project deadline

VestraCare, Valley Stream, NY

Programmer Data Analyst

Jul2020-Mar2021

- Performed data cleansing on data sets using SQL Server thereby conducted data analysis and prepared weekly summary report
- Analyzed large data thoroughly to identify key areas of improvement to enable efficient data collection for modeling purposes
- Experienced and worked in python, Jupyter, Scientific computing stack (NumPy, SciPy, Pandas and Matplotlib) for data analysis
- Developed and automated data pipelines to extract and transform patient data, reducing data processing time by 50%and improving data accuracy by 20%
- Responsible for data extraction, data cleansing, data manipulation using Pandas and prepared quality data from the source
- Successfully executed comprehensive data management tasks data review, writing & resolving data clarifications for the data flow
- Able to accurately map data from source systems to target systems and resolve issues stemming from the mapping efforts
- Designed, developed, and supported interactive Power BI dashboard reports to draw clean and concise effective business insights
- Developed custom reports including various calculated measures using DAX and deployed them successfully on Power BI Server
- Experience in Configuring Gateways in the Power BI service based on the business requirements
- Automated report generation and distribution processes, reducing manual effort and improving efficiency
- Prepared and delivered presentations, reports, and executive summaries to communicate analytical findings, insights, and recommendations to senior management and stakeholders
- Utilized Excel to categorize previous budget reports into a pivot table to develop an improved company financial strategy

EDP Renewables North America LLC, Houston, TX

Data Analyst Intern

Jun2019-Aug2019

- Assisted in data process mapping and organization of existing SQL Server Integration Services (SSIS) saving 15 hours every week
- Designed and developed ETL packages using SSIS to load data from flat files, SQL Server to required SQL Server database
- Designed and documented the error handling strategy in the ETL load process. Created test data and unit test cases to ensure successful data loading process
- The energy data thus loaded into data warehouse is utilized to generate reports using SSRS reporting functionality
- Managed large customer data and successfully collected, analyzed, and created insights to lead business improvement
- Used Several Python Libraries NumPy and Pandas for data manipulation, data cleansing and data analysis
- Created complex DAX calculations and measures in Power BI to support data analysis
- Performed exploratory data analysis and designed Power BI dashboards to identify trends and key performance indicators
- Generated variety of important business reports from SQL server using excel with pivot table and pivot chart directly to clients

DXC Technology, Indore, India

Business Data Analyst

Sep2016-May2018

- Responsible for programming and UAT edit checks for customized reports to capture data issues and discrepancies
- Functioned as a marketing liaison between business users and technical team for defining project scope and execution planning
- Involved in the SDLC project management methodology and thereby supporting application development for insurance product
- Designed and executed test plans, test cases, and test scripts to validate software functionality and performance
- Created detailed test scenarios based on functional requirements, business rules, and user stories
- Responsible for creating clear and concise business documentation related to the organization & use of data in existing systems
- Solicit and interpret conceptual business needs and document requirements collecting data from multiple sources
- Successfully developed, and supported interactive Power BI dashboard reports to draw clean and concise business insights
- Implemented data modeling techniques to design efficient data schemas and relationships in Power BI
- Mentored 6 colleagues and trained them on the project specifications and domain knowledge in 2 weeks per company policy
- Successfully managed and allocated resources effectively to meet project timelines, budgets, and quality standards
- Involved in client meetings to understand the requirement gathering phase and documented the progress of the project

IBM, Bangalore, India

Data Reporting Analyst

Sep2014 - Jul2016

- Acquired data from primary or secondary data sources & successfully maintained databases/data systems and interpret trends
- Performed data cleaning necessary for predictive models by accessing information from customers in healthcare sector
- Used debugger in identifying bugs in existing mappings by analyzing data flow and evaluating transformations
- Successfully fixed invalid mappings & troubleshoot technical problems of the database saving 20 hrs a week on data validation
- Developed & maintained Tableau dashboards and reports to visualize key performance indicators (KPIs) & business metrics
- Resolved key issues in data by doing in depth analysis using SQL Server and provided recommendations to resolve the issues
- Analyzed large data to find actionable insights using BI tools that lead to significant business decisions and new opportunities
- Identified, analyzed, and interpreted general and unique trends/patterns in complex data sets and saved 30% manual effort
- Evaluated and recorded IT processes, gap analysis to identify areas for increased value, additional efficiency, and cost savings
- Managed and updated JIRA tickets for development tasks, bugs, and enhancements and monitored progress of the project
