

Jyoti Ashok Palkar

jyoti@myjobemails.com | +1 (636) 778-6235 | Missouri, USA | [LinkedIn](#)

Professional Summary

Full-stack developer with 4 years of experience building scalable, cloud-native web applications using .NET Core, C#, Angular, GraphQL, and REST APIs. Skilled in crafting secure authentication workflows, optimizing SQL Server/MongoDB/PostgreSQL performance, and delivering event-driven microservices with Azure Service Bus. Adept at implementing CI/CD pipelines (GitHub Actions, Azure DevOps), Docker/Kubernetes deployments, and automated testing (xUnit, NUnit, Cypress) to improve release quality, accelerate delivery cycles, and enhance user experience.

Technical Skills

Front-End Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript, Angular (v12+), RxJS, NgRx, Bootstrap, Material-UI, Responsive Web Design, Web Accessibility (WCAG), AJAX, REST/GraphQL APIs

Back-End & Middleware: C#, .NET 6/7, ASP.NET Core MVC & Web API, Entity Framework Core, LINQ, SignalR, gRPC, RESTful Services, Microservices Architecture, Python (FastAPI, Flask), Node.js (Express – middleware), Authentication & Authorization (OAuth2, JWT, OpenID Connect, SAML), Secure Coding Practices (OWASP Top 10)

Database & Storage: Microsoft SQL Server, PostgreSQL, MySQL, MongoDB, Redis, Firebase Realtime DB, Cosmos DB, Data Modeling & Indexing, Stored Procedures, Views & Triggers, Query Optimization

DevOps, Tools & Testing: Git, GitHub, Azure DevOps, Jenkins, GitLab CI/CD, Docker, Kubernetes, Helm, Terraform, Swagger/OpenAPI, Postman, xUnit, NUnit, Moq, Selenium, Cypress, Playwright, SonarQube, ELK Stack, Prometheus, Grafana, Nginx, Linux & Bash Scripting

Cloud & Integration Platforms: Microsoft Azure (App Services, Functions, API Management, Blob Storage, Service Bus, Key Vault), AWS (EC2, S3, RDS, Lambda, CloudWatch), Google Cloud (Pub/Sub, Cloud Functions), Apache Kafka, RabbitMQ

Professional Experience

Full Stack Developer, DXC Technology

Aug 2024 – Present | Remote, USA

- Built a warehouse inventory tracking platform using Angular 15 with SCSS, ASP.NET 7 Web APIs, and Entity Framework Core, enabling dynamic product lifecycle monitoring and supplier-portal integrations.
- Implemented GraphQL endpoints alongside REST APIs to support advanced search filters and high-volume SKU queries, improving data retrieval performance and optimizing client-facing reporting dashboards.
- Designed event-driven architecture with Azure Service Bus and background worker services in .NET, facilitating real-time stock-level updates across distributed order-fulfillment and replenishment microservices.
- Optimized MongoDB queries, partitioning, and caching strategies, cutting inventory reconciliation job runtime by 37%, ensuring near real-time sync of warehouse stock with regional point-of-sale systems.
- Automated CI/CD workflows using GitHub Actions, containerized APIs with Docker, and deployed to Azure Kubernetes Service, improving rollout reliability for blue-green deployments across multiple environments.
- Integrated unit and contract testing using NUnit, FluentAssertions, and Pact framework, achieving 87% integration coverage and minimizing service-to-service regression defects in distributed order-tracking microservices.

Full Stack Developer, TCS

Jan 2020 – Sep 2022 | Remote, India

- Built a loan origination portal for retail banking clients using Angular 11, ASP.NET Core APIs, and Entity Framework, streamlining customer onboarding processes and enabling secure, paperless account creation.
- Created role-based authentication workflows with OAuth2, JWT, and ASP.NET Identity, improving session security and compliance while maintaining seamless cross-application access across customer, agent, and admin interfaces.
- Developed custom loan calculators and eligibility dashboards in Angular with RxJS and NgRx, simplifying complex business rules and enhancing user experience with real-time interactive financial insights.
- Optimized SQL Server stored procedures, indexing, and caching strategies, cutting loan-approval batch processing time by 41%, which improved overall throughput during seasonal high-volume application periods.
- Integrated real-time notifications for loan status updates using SignalR hubs, boosting customer engagement and providing transparent application tracking across web and mobile banking platforms.
- Automated CI/CD pipelines with Azure DevOps, Dockerized microservices, and YAML scripts, reducing manual deployment time from 2.5 hours to 40 minutes for critical production releases.
- Implemented unit, integration, and regression testing using xUnit, Moq, Cypress, and Postman test suites, increasing test coverage to 89% and reducing post-release defects across modules.

Education

Master of Science, Webster University
Information Technology and Management

Oct 2022 -Mar 2025 | MO, USA

Master of Commerce, ITM University
Commerce

Mar 2018 – Apr 2020 | Mumbai, India
