EDUCATION

• San Jose State University

Aug 2023 – May 2025

Master of Science in Computer Software Engineering (Specialization in Cloud Computing)

3.7/4.0

- Relevant Coursework: Cloud Services, Smartphone Application Development, Software Systems Engineering, Virtual Technologies, Machine Learning, Distributed Systems.

SKILLS

- **Programming Languages**: Python, Shell Scripting, PowerShell, SQL, Java, C++.
- **Cloud & Databases**: AWS (EC2, S3, Lambda, IAM, RDS, API Gateway, CloudFormation), GCP, MongoDB, PostgreSQL.
- **Networking & DevOps**: Terraform, Docker, Kubernetes, Ansible, GitHub Actions, CI/CD, VPN, Firewall Configurations.
- **Monitoring & Tools**: Prometheus, Grafana, CloudWatch, Jenkins, JIRA, AWS CLI.

WORK EXPERIENCE

• DBS Bank

Dec 2022 – Jun 2023

Cloud Engineer Intern

Hyderabad, India

- Responsible for maintaining and creating infrastructure for more than 2 enterprise scale clients using Terraform and Google Deployment Manager via CI/CD pipelines (IaaS).
- Implemented IAM role-based access controls and automated compliance checks, strengthening multi-cloud security and reducing vulnerabilities.
- Developed and optimized CI/CD pipelines leveraging **Jenkins and GitHub Actions**, cutting deployment failures by 35% and accelerating release cycles.
- Designed and fine-tuned Kubernetes clusters, improving microservices deployment efficiency by 20% and enhancing system resilience.
- Enhanced network performance by refining **VPN and firewall configurations**, leading to lower latency and improved data protection in hybrid cloud environments.
- Streamlined **Agile workflows in JIRA**, optimizing task tracking, sprint planning, and improving team productivity by 25%.

• National Institute of Technology

Apr 2022 – Aug 2022

Research Intern

Andhra Pradesh, India

- Designed cloud automation workflows to streamline infrastructure provisioning, reducing manual deployment efforts by 40% and improving operational efficiency.
- Analyzed network security vulnerabilities, implementing firewall enhancements and access controls to strengthen system resilience against cyber threats.
- Built real-time monitoring dashboards using **Prometheus and Grafana**, enabling proactive performance tracking and cutting system downtime by 30%.
- Collaborated with senior engineers to optimize cloud infrastructure, gaining hands-on experience in **AWS, GCP, and Kubernetes** for large-scale deployments.

PROJECTS

• EyeSpeak

- Built an AI-driven captioning platform leveraging **AWS Lambda & S3**, cutting real-time audio latency by 45% and improving accessibility for users.
- Integrated a TensorFlow-based speech-to-text model, enhancing accuracy for faster inference on mobile and web platforms.

• Dropbox

- Developed a cloud-native document storage platform with seamless file management, ensuring secure access and 99.99% uptime.
- Leveraged **AWS EC2, S3, and RDS**, optimizing auto-scaling policies and reducing unauthorized access risks by 30% through AWS Amplify authentication.

CERTIFICATIONS

• HashiCorp Certified Terraform Associate

Feb 2025

• AWS Certified Solutions Architect Associate

Aug 2024
