

Sohail Irfan

Senior Software Engineer

Microsoft Certified Professional with 15 years of experience in strategic problem-solving and developing software architect. Experienced in leading engineering teams to achieve the project goals. Worked with renowned software companies, and developed applications for leading organizations across the world including Saudi Electric, Stanley Black & Decker (USA), Enerjisa (Turkish Electricity Company), Pakistan Military.

Experience

2012 – 2025 Senior Software Engineer

Saudi Electricity Company - Kingdom of Saudi Arabia

I am responsible for designing and implementation of the solutions for energy business domain. My responsibilities include the initial research, planning the project, designing the application architect, team management, activity estimations, project plan and execution.

2010 – 2012 Advisory Software Engineer

Systems Limited - Pakistan

I was responsible for software development and development team management. I was also involved in database design & development, Domain Model and Software Architect. Developed high-quality code, established development standards. Designed reusable components by utilizing various standard frameworks. Evaluated requirements and initial mock-ups; made technology recommendations that supported optimal construction, maintenance and performance. Furthermore, achieved cross platform integration with SharePoint and .Net applications.

2008 – 2010 Software Engineer

MindShare Solutions - Pakistan

Designed, developed, documented, refined and maintained applications in a Microsoft-centric environment. Built and maintained web-based applications for Internet and Intranet. I was also involved in IIS configuration, writing standard documents and Unit testing.

Education

2008 – 2010 Master of Sciences in Computer Science

University of Central Punjab - Pakistan

3.2/4.0

2000 – 2004 Bachelor in Computer Science

Baluchistan University Quetta - Pakistan.

3.4/4.0

Projects

Project Management Information System (PMIS)

📍 *Deployed in Saudi Electricity Company, Kingdom of Saudi Arabia.*

PMIS is complete solution for power project's management and a decision support system. It facilitates weekly progress monitoring, auto escalation for progress variance. It also provides the facility to forecast and simulate the energization of power generation components. Decision support system and reporting is based on well-designed Dashboard and infographics tools. Integration with SAP and other applications.

Submittal Tracking System

📍 *Deployed in Saudi Electricity Company, Kingdom of Saudi Arabia.*

The submittal tracking system is designed to trace the progress of submittal completion across the sectors. It also includes work queue management, document repository, delay detection and the alert system.

Mobile Business Assistant

📍 *Deployed in Stanley Black & Decker Stores in USA, UK & Canada.*

A point-of-sale system which also includes comprehensive sales and inventory management modules. Application is interactive, responsive and user friendly for all web, desktop, tablets and mobile devices. The application is also used on mobile business units and has the functionality to synchronize with master database. Application handles secure financial transaction by credit cards and gift cards.

Military land & Cantonment

📍 *Deployed in Military Cantonments of Pakistan.*

A project of Defense Ministry of Pakistan for the Computerization of Military Lands and Cantonment (ML&C). The application based on customized workflow engine, which handles all business workflows. The distinguished feature of the application is the real estate module, which provides the facility to computerize all land records and land transactions through digital land register (DGLR). One window facilitation center, tax generation, utility invoice generation, establishment and finance were also the major modules of the application.

Energy Trading Risk Management System

📍 *Deployed in Cinergy Trading (UK), Enerjisa (Turkey).*

A trading application for energy sector the major functionalities are Energy trade, Consumption Forecasting, Risk Management, Planning and Contract Management. Furthermore, the most distinguished feature was Unit Trading, Electricity Consumption Reading through a web service and Invoice Generation (electricity bills).

Cargo Management System (ERP)

📍 *Deployed in Kenyan Shipping lines (Kenya), Sea Sand Shipping (Dubai), Global Freight System (Kuwait) and Compass Logistics (Dubai).*

CMS is an ERP for freight forwarding and cargo management. It facilitates business operations and management of cargo organizations dealing with Air, Sea, Land Freight and chartered cargo services. The system includes a comprehensive Finance, Inventory, Warehouse, Human Resource, Payroll and Cargo Management modules. The distinguished feature for the Cargo ERP is Auto Load Plan, which intelligently suggest the container/pallet loading sequence for optimal use of the capacity.

Project Management Skills

- Requirement Analysis
- WBS and Activity definition
- Project Schedule Management
- Resource Management
- Risk Management
- Communication & Reporting
- Microsoft Project

Certifications

- Microsoft Certified Professional (MCP)
- Microsoft Technology Specialist (MCTS)
- Project Management Professional (PMP)

Trainings & Workshops

- PMP Training 35 PDU's by Knowledge Core
- Data Optimization by Microsoft
- Machine Learning by Microsoft
- Oracle Primavera P6 workshop by SEC
- Six Sigma Yellow Belt

Research Work

- Dynamic Dimensionality in Data Warehouse (Research Paper)
- Real Time Data warehouse (Research Paper)
