

Richard A. Olivieri

(305) 934-1627 | richard-olivieri@outlook.com | [LinkedIn](#) | [Microsoft Certifications](#)

Summary

- System Engineer specializing in improving systems and applications within a Windows environment. Proven track record of improving efficiency by identifying deficiencies and implementing opportunities for businesses. Excels and thrives in a strong team environment where growth is essential.

Experience

Pathward – Sr. IT System Engineer

05/2024 – 08/2025

- Transitioned the enterprise system migration from premise to cloud with our vendor and numerous users in 2024.
- Collaborated daily in Azure DevOps reducing total board work down by 75% by working with vendors and teams.
- Collaborated daily with development teams and DevOps teams to ensure that our changes were done promptly.
- Generated data models, data maps, and reports of numerous processes used by the business and coworkers.
- Modified and improved with vendors and teammates our current business processes, jobs and data reports.
- Streamlined and automated jobs and reports for our business users and managers to increase efficiency.
- Assisted with standing up Amazon EC2/RDS tenants with coworkers for our next big migration project.
- Worked with internal and external auditors for auditing information about our business environment.
- Helped DevOps process by testing our environment changes and then submitting to PROD weekly.
- Investigated for issues and reported them promptly to teammates and vendor to fix these weekly.
- Worked to help store secrets in our Key Vault and ensure our Data Warehouse was accessible.
- Monitored our job environment and scripting environment to mitigate and reduce issues.
- Followed the SDLC standards for Azure DevOps to facilitate daily workload.
- Ensured we had corrected access and license usages for the organization.
- Collaborated with members across other teams to knowledge share.
- Trained in numerous work concepts in LinkedIn Learning.

Intelligent Generation – IT Operations Engineer

04/2023 – 01/2024

- Maintained our IT Operations at 99% from 80% in NERC/FERC energy markets increasing weekly revenue.
- Ensured IT SQL DB entries are appropriate for run scheduling every week to improve business continuity.
- Generated and improved a remote login audit script in PowerShell for auditing in our virtual environment.
- Generated documentation of business processes, procedures, workflows, ensuring smooth operations.
- Executed commands for environment health, ensuring system capacity is available for 99% uptime.

Solotech – System Administrator

08/2022 – 11/2022

- Worked with Microsoft to adjust ADSync/ADConnect system capacity and adjusted VMWare system capacity.
- Consistently propose new project ideas, evidence gathering and functional solutions for the environment.
- Supported virtual environments on Windows Server, VMWare ESXi, Cisco Meraki and Catalyst.
- Managed Intune, AzureAD, Defender 365, Office365, ADConnect, ADSync and L3 escalations.
- Provided Defender SME level service and support for many of our teams in many capacities.
- Provided enterprise level support for many Server 2016/2019/2022 environments for sites.
- Assisted with security implementation and auditing with IT engineers for cost saving ideas.
- Performed root cause analysis on cost-saving measures for applications and processes.
- Utilized PowerShell to automate evidence of users, data, mailboxes, and environments.
- Executed server commands and performed maintenance on SuperMicro VM servers.

CompuCom/Excell (Contract) – System Analyst (Client: NextEra Energy (FPL))

03/2022 – 07/2022

- Ensured that new assets are compliant weekly by gathering digital evidence for large data packages.
- Worked with VMWare engineers to gather VM environment data for data packages.
- Provided strong NERC-CIP IT support for our power projects in many capacities.

KForce (Contract) – System Support Analyst (Client: Restaurant Brands International)

11/2021 – 02/2022

- Supported RBI Popeye's brand by correcting various POS IT equipment issues internally and externally.
- Lowered JIRA ticket counts 50% and monitored reoccurring issues with multiple vendors and teams.
- Monitored OI health to ensure close to 99.99% efficiency for Popeye's brand.

- Migrated from McAfee EPO to Defender for Endpoint Protection, documenting previous file & process exclusions.
- Collaborated between vendor and Microsoft across cross-functional teams ensuring our smooth deployments.
- Tested and Deployed Intune & Defender Policies with Azure AD for Windows, Android and Apple Devices.
- Managed daily Azure AD, Defender GCC, Intune Endpoint Manager, Exchange and Office365.
- Oversaw security policies, user policies, account and machine policies for our entire tenant.
- Ensured machine and data security through consistent and verifiable business processes.
- Provided explanation of cloud data procedures to many other teams and to management.
- Verified automatic machine data logs from Defender Security Center for compliance.
- Monitored Azure AD and AD Connect to ensure all machines Azure Hybrid Joined.
- Provided SME service for access control in Defender, MFA, and in security policies.
- Worked with federal vendor to deploy Windows Defender & Android WVD Phones.
- Worked with federal vendor for Samsung KNOX and Apple directly for our MDM.
- Created and verified multiple process documents in IT on SharePoint.
- Supported City of Miami PD processes, CSU and IT Support Section.
- Utilized PowerShell to create security scripts for Defender ATP/AV.
- Worked to ensure system planning and system capacity changes.

Social Mobile – Helpdesk Technician

10/2020 – 01/2021

- Supported Windows 10, Office365, Endpoint Manager, Intune, Azure AD, Exchange, Android, iOS.
- Ensured that operations of the business ran smoothly and researched new projects to implement.
- Created business processes and training documentation for many applications and systems.
- Audited corporate software for each department and audited licenses for each application.
- Blocked domains from AD DNS, resolved Wi-Fi issues and monitored IT emails.

Olivieri Designs (Contract) – System Engineer (Clients: Univision, Zayas Dental, NuTech)

12/2017 – 10/2020

- Resolved and analyzed many issues of business enterprise systems and applications to improve our efficiency.
- Provided remote system support to multiple businesses and neighboring medical client ensuring continuity.
- Provided IT infrastructure support process improvements and recommendations for business operations.
- Installed, configured, managed infrastructure system hardware and software for multiple businesses.
- Viewed system logs on all servers and workstations to diagnose and pinpoint many specific issues.
- Managed all networked devices, systems and applications ensuring high availability for business.
- Acted as a single contact for multiple businesses providing guidance and execution for projects.
- Maintained system security policies, standards, access, controls for our business compliance.
- Ensured system integrity and security of all Windows Servers and archived employee data.
- Resolved all assigned service requests through ConnectWise ensuring timely completion.
- Resolved application and printer issues remotely relating to Windows OS and Servers.
- Resolved WAN, LAN, Ethernet, Wi-Fi AP issues, and CISCO VPN hotspot issues.
- Resolved Exchange, Office365, Active Directory, Outlook, CISCO VOIP issues.
- Utilized CITRIX Director and Hyper-V to start and stop remote sessions.
- Ensured all migrations and changes were followed meeting all SLA.
- Worked with a client for planning and capacity upgrading to fiber.

Tracfone Wireless (now Verizon) – Application Analyst

06/2016 – 12/2017

- Maintained system capacity and administered UNIX production environments ensuring our 99.9% uptime.
- Worked with other System Engineering experts to provide system planning, audit and perform analysis.
- Performed system maintenance and analysis to perform hardware repair on system fault issues.
- Created and executed security scripts with InfoSec to significantly reducing the external access.
- Tested and diagnosed server issues and cleared faults on the SP within all server environments.
- Collaborated with Oracle to log and resolve errors by updating firmware and replacing memory.
- Facilitated root cause analysis for each issue by monitoring numerous support systems.
- Created virtual environments in UNIX allocating CPU, RAM, Disks and system devices.
- Analyzed, monitored and resolved production environment issues in Service Manager.
- Worked in a data center to monitor server environments and our server equipment.
- Worked with DBAs to document, query and map Oracle PL/SQL environments.
- Collaborated with network team to get IPs associated on VLANs and our DNS.

- Installed, documented and developed Oracle Solaris Servers for UNIX teams.
- Worked with T-Mobile and internal teams ensuring data packages were sent.
- Used PuTTY to configure LDOMs, disable connections and manage IPs.
- Created SSH-key pairs to disable external access on UNIX servers.
- Created Oracle Solaris server documentation procedures.
- Documented scripts and commands for IT management.
- Deployed background patches, updates and packages.
- Used Docker for creating VM's for testing Java PROD.
- Executed VI commands in PuTTY to work remotely.

KrowdFile / KrowdByz (Contract) – QA Analyst

06/2014 – 03/2015

- Corrected and created XPath Query statements in all active PHP scripts for many websites.
- Modified and updated report spreadsheets of active scripts to help lower errors significantly.
- Cross-checked team members page scripts for errors and worked efficiently reducing error.
- Tested scripts with sample data to track how data is inserted and executed into databases.

Education**University of Miami – Bachelors in Computer Science**

08/2011 – 08/2014

Skills

- **OS:** Windows 7, Windows 8, Windows 10, Windows 11, Server 2019, Server 2022, Unix, Linux
- **Cloud:** Citrix Director, Defender, Office365, Endpoint, Intune, Azure AD, Exchange, Teams
- **Apps:** Active Directory, Oracle APEX, Enterprise Architect, Remote Desktop, SQL, Meraki
- **Servers:** Virtualization, Optimization, Configuration, Deployment, Installation, Patching
- **Console:** Lights Out Manager in Windows, Service Processor for Solaris in PuTTY
- **Other:** Security Scripting, Software/Hardware Troubleshooting, DNS, Web

Certifications

- | | |
|---|---------|
| • Exam 70-480: Programming in HTML 5 with JavaScript and CSS3 | 08/2018 |
