Professional Summary

Passionate and results-driven software engineer with expertise in object-oriented design, cloud computing, high-performance systems, and data analysis. Skilled in AWS cloud computing services, Python scripting, and Java development.

Technical Skills

- **Programming Languages/Libraries:** C++, Java, F#, C#, JavaScript, R, Python, C, Pandas, Jupyter Notebook
- **Cloud Computing:** AWS Lambda, Batch, EC2, ECS, EKS, SpotFleet, CloudFormation, CloudWatch
- **Database:** MySQL, DynamoDB

Professional Experience

Data Analyst – Robert Half (with Exponent)

Bellevue, WA

06/24 – Present

- Automated data management processes by developing Python scripts using pandas, improving operational efficiency.
- Data cleansing and processing time was reduced by 40% through script development and optimization.

Software Engineer I – Amazon

Seattle, WA

11/22 – 06/23

- Implemented critical alarms and metrics using AWS CloudWatch, enabling proactive monitoring and diagnosing health issues within AWS Batch.
- Conducted an audit to identify and resolve top issues contributing to sev-2 tickets, reducing incidents by 30%.
- Technologies: AWS CloudFormation, CloudWatch, S3, EC2, ECS, EKS, DynamoDB, SpotFleet, Java.

Amazon Technical Academy Intern – Amazon

Seattle, WA

02/22 – 11/22

- Collaborated to design and develop a scheduling application leveraging DynamoDB, AWS CloudFormation, and CloudWatch.
- Created a reward application enabling Prime members to earn and redeem purchase-based rewards.
- Technologies: AWS CloudFormation, CloudWatch, Java, DynamoDB.

Education

Bachelor of Engineering in Computer Science

University of Illinois at Chicago (UIC)

05/20
