

RODAN ANYI

SQL Server Database Administrator

Delaware | Tel: (302) 867-7097 | Email: rodananyi1@gmail.com | LinkedIn: [linkedin.com/in/rodananyi](https://www.linkedin.com/in/rodananyi)

PROFESSIONAL SUMMARY

SQL Server Database Administrator with 5+ years of experience managing mission-critical databases in enterprise environments. Expertise in high availability/disaster recovery (Always On, Log Shipping, Clustering), performance tuning, database security, and automation of administrative tasks. Skilled in upgrades, migrations, backup/recovery strategies, and ensuring system uptime through proactive monitoring. Known for optimizing SQL Server environments to deliver reliability, scalability, and compliance while collaborating closely with cross-functional teams.

TECHNICAL SKILLS & TOOLS

Database Platforms: SQL Server 2008–2019

Core DBA Skills: Backup & Recovery | High Availability & Disaster Recovery (Always On, Log Shipping, Clustering) | Database Security | Query Tuning & Index Optimization | Replication | Database Upgrades & Migration | Monitoring & Maintenance

Performance & Monitoring Tools: SQL Server Management Studio (SSMS) | SQL Profiler | Extended Events | Query Store | Redgate | SentryOne | SolarWinds

Automation & Scripting: T-SQL | SQL Agent | PowerShell (basic)

Cloud (Basic Exposure): Azure SQL Managed Instance, Azure SQL Database (supporting skill)

KEY ACCOMPLISHMENTS

- **Increased system availability** to 99.9% by implementing Always On Availability Groups and Clustering across production environments.
- **Reduced query execution time by 40%** through indexing strategies, query optimization, and use of Query Store.
- **Migrated 50+ databases** (up to 2 TB) to newer SQL Server versions with zero downtime impact.
- **Automated maintenance plans** (backups, patching, job scheduling) using SQL Agent and T-SQL, reducing manual effort by 30%.

PROFESSIONAL EXPERIENCE

SQL Server Database Administrator

SEVITA HEALTH – Wilmington, DE | 2020 – 2025

- **Administered** 200+ SQL Server databases across development, QA, and production environments, ensuring high availability and stability.
- **Implemented** Always On Availability Groups, Log Shipping, and Clustering, achieving **99.9% uptime** and improved disaster recovery readiness.
- **Migrated** 50+ mission-critical databases (up to 2 TB) from SQL Server 2012 to 2019, delivering **zero downtime** during cutovers.

- **Optimized** performance by tuning queries, refining indexes, and leveraging Query Store, reducing execution times by **40%**.
- **Automated** backups, patching, job scheduling, and alerting using SQL Agent and T-SQL, cutting manual workload by **30%**.
- **Monitored** database health with Redgate, SQL Profiler, and Extended Events, proactively resolving issues and maintaining SLA compliance.
- **Troubleshoot** blocking and deadlocks in collaboration with development teams, enhancing application performance and reliability.

SQL Server Database Administrator

Tata Consultancy Services – Wilmington, DE | 2019 – 2020

- **Supported** daily administration of 50+ SQL Server databases, ensuring consistent uptime and performance.
- **Configured** and monitored log shipping and replication to strengthen disaster recovery capabilities.
- **Applied** patches and service packs, securing SQL Server environments against vulnerabilities and maintaining compliance.
- **Automated** repetitive DBA tasks through SQL scripts and maintenance plans, reducing downtime during scheduled operations.
- **Monitored** performance using SQL Profiler and Extended Events, identifying and resolving deadlocks and blocking issues.
- **Managed** logins, roles, and permissions within SQL Server, enforcing least-privilege access to safeguard sensitive data.

EDUCATION | TRAINING

Bachelor of Science in Computer Science

Advanced SQL Server Database Administration, T-SQL and Azure SQL DBA Training (300+ hours) |

KiawiTech IT Academy – Texas
