

Business Analyst with 5 years of experience in finance and e-commerce, skilled in requirements gathering, process re-engineering, and data analysis. Proficient in SQL, Python, Excel, and BI tools (Power BI, Tableau, QuickSight) with hands-on expertise in ETL workflows (Informatica, Alteryx, Airflow, AWS Glue), data warehousing (Redshift, Snowflake), and ERP/CRM systems (SAP, Salesforce). Experienced in Agile delivery, UAT, API integrations, and compliance, with a proven ability to improve efficiency, automate workflows, and support strategic initiatives.

PROFESSIONAL EXPERIENCE

JPMC	March 2024 – Present TX
Business Analyst	
- Partnered with business stakeholders, IT, and compliance teams to define functional and non-functional requirements for credit card, payments, and digital banking initiatives; created BRDs, FRDs, user stories, and Traceability Matrices (RTM) to ensure alignment across teams. - Conducted gap analysis and process re-engineering with cross-functional teams (operations, finance, risk, IT), improving workflow efficiency by 25% and reducing manual interventions in transaction processing. - Collaborated with data engineering teams on ETL workflows (Informatica, Alteryx) and AWS Redshift data consolidation; performed data validation, anomaly detection, and scenario modeling using SQL and advanced Excel (Pivot Tables, VLOOKUP, Macros, What-If scenarios). - Designed and developed Power BI dashboards to track KPIs, customer onboarding metrics, loan approvals, and fraud detection; collaborated with risk, compliance, and business teams to reduce reporting delays by 40%. - Partnered with Salesforce CRM and operations teams to automate client onboarding, case management, and reporting workflows, improving operational efficiency by 20%. - Supported ERP (SAP) integrations for finance and HR processes, ensuring accurate financial reporting, payroll reconciliation, and regulatory compliance. - Led UAT and QA activities, preparing test plans, coordinating regression testing, documenting defects, and validating workflows to ensure full alignment with business requirements. - Defined and coordinated REST API integrations with third-party vendors to enable real-time payment processing, fraud detection, and client verification; collaborated with IT and risk teams to reduce transaction errors by 20%. - Created process flows, wireframes, and diagrams in Visio to clearly communicate complex banking workflows and data pipelines across teams. - Facilitated Agile ceremonies (standups, backlog grooming, sprint planning, retrospectives) while managing change impacts and ensuring timely delivery of sprint goals. - Supported migration of legacy data pipelines to cloud platforms using AWS (EMR, Redshift, Lambda, Glue, S3) and Snowflake, improving data scalability and processing performance. - Delivered executive-level reports and Power BI dashboards combining business and financial metrics, scenario analysis, and project risks to enable data-driven strategic decisions. - Acted as a primary liaison between stakeholders, IT, and data teams, driving data governance, change management, risk mitigation, and process improvements across multiple banking projects.	

Amazon	April 2020 - June 2023 India
Business Analyst	
- Led a project to optimize end-to-end order fulfillment and inventory operations across multiple fulfillment centers, analyzing 5M+ daily transactions using SQL, Python, and Excel, providing actionable insights that reduced shipment delays by 15%. - Gathered, documented, and prioritized business requirements from cross-functional teams (operations, finance, supply chain, product) using Jira, Confluence, and Visio, creating BRDs, FRDs, user stories, BPMN process maps, and wireframes to ensure alignment with stakeholder objectives. - Performed end-to-end business analysis, including process modeling, gap analysis, root cause analysis, and workflow re-engineering, resulting in improved operational efficiency and a 15% reduction in delivery delays. - Designed and maintained interactive dashboards and MIS reports using Tableau and QuickSight, monitoring KPIs such as delivery SLA adherence, inventory turnover, and order accuracy, enabling real-time decision-making for leadership. - Built automated ETL pipelines and API-based data integrations using Airflow, AWS Glue, and REST APIs, processing JSON and XML data from multiple internal systems, improving reporting accuracy by 40% and reducing manual data reconciliation. - Conducted financial and operational analysis leveraging SAP ERP and Salesforce, tracking revenue, operational costs, and customer/account metrics, providing insights for quarterly planning and cost optimization. - Executed UAT and scenario testing for new process implementations and dashboard features, ensuring solutions met functional requirements and operational readiness before rollout. - Managed access and compliance workflows, including UAR (User Access Review), maintaining SOC2 and GDPR compliance for sensitive financial and customer data. - Worked in Agile sprints, collaborating with stakeholders, maintaining product backlogs, prioritizing requirements, and facilitating adoption of dashboards, reports, and automation tools. - Performed ad-hoc analytics and reporting, transforming complex datasets into actionable insights and visual storytelling to support leadership strategy sessions. - Collaborated on cross-team analytics initiatives, standardizing reporting formats, KPIs, and ETL best practices to ensure consistent, high-quality data delivery across business units. - Served as liaison between IT, operations, finance, product, and customer teams, translating business challenges into structured data solutions that informed strategic decision-making.	

TECHNICAL SKILLS

Business Analysis & Project Management: BRD/FRD, User Stories, Use Cases, Process Modeling (BPMN, Flowcharts), Workflow Re-engineering, Wireframing & Mockups (Visio, Lucidchart, Balsamiq), Agile/Scrum, Backlog Management, Sprint Planning, UAT & Scenario Testing, Stakeholder Collaboration, Change Management.

Data Analysis & Reporting: SQL (Queries, Joins, Stored Procedures), Python (Pandas, NumPy, Data Cleaning, Automation), ETL & Workflow Automation (Airflow, AWS Glue, Apache NiFi), Dashboarding & Visualization (Tableau, QuickSight, Excel Pivot Tables, Interactive Reports), API & Data Integration (REST APIs, JSON, XML), Cloud Platforms & Programming: AWS (Lambda, S3, Redshift), Azure (Data Lake, Synapse).

ERP & CRM Systems: SAP, Salesforce, Oracle ERP, NetSuite

Data Management & Governance: Data Quality & Cleansing, Validation, Profiling, Data Warehousing & Storage (SQL Server, Snowflake, Redshift, Azure Data Lake), Compliance & Security (GDPR, SOC2, UAR), Master Data Management (MDM).

Analytics & Insights: KPI Tracking & Reporting (Operational & Financial Metrics, SLA Adherence), Forecasting & Trend Analysis (Time Series, Regression, Scenario Modeling), Ad-hoc Analysis & Storytelling, Predictive Analytics, Anomaly Detection, Operational Metrics Optimization.

Tools & Technologies: Jira, Confluence, Trello, Visio, Lucidchart, Balsamiq, Excel (Advanced Formulas, Pivot Tables, Power Query, Macros), Python (Pandas, NumPy), SQL, VBA, Tableau, QuickSight, Airflow, AWS Glue, REST APIs, JSON, XML, SAP ERP, Salesforce, Oracle ERP, NetSuite, Snowflake, Redshift, Azure Data Lake.

EDUCATION

Master’s In Information Technology	Aug 2023 – May 2025
Lindsey Wilson university, Kentucky
