LinkedIn

SUMMARY

- Full Stack Java Developer with 3 years of experience creating enterprise-grade applications using Java17, 11, Spring Boot, React.js, and Angular with cloud deployment expertise.
- Expert in microservices architecture and performance optimization through advanced Java programming, database integration, and automated testing frameworks achieving measurable efficiency improvements.
- Proficient in delivering scalable solutions using modern development practices, CI/CD automation, and cross-platform technologies while maintaining high code quality standards.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Languages & Core Technologies: Python, Java, JavaScript, HTML5, CSS3, SQL, TypeScript, REST API, GraphQL

Frontend Technologies: React, Angular, Vue.js, jQuery, Bootstrap, Tailwind CSS, Webpack

Backend Technologies: Node.js, Apache, Tomcat

Java Frameworks & Build Tools: Spring Boot, Spring MVC, Spring Security, Hibernate, Maven, Gradle, Django, Flask, FastAPI

Databases & Data Management: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Database Design

Testing Frameworks: Pytest, JUnit, Mockito, Jest, Unit Testing, Test-Driven Development (TDD)

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, Jenkins, Terraform

Development Tools: VS Code, PyCharm, IntelliJ IDEA, Eclipse, Postman, Swagger, JIRA

Version Control: Git, GitHub, GitLab

Soft Skills: Critical thinking, Problem-solving, Attention to detail, Communication Skills, Stakeholder Management

EDUCATION

Master of Science in Information Systems and Cybersecurity

University of Central Missouri, Warrensburg, MO

May 2025

Bachelor of Technology in Computer Science and Engineering

Qis Institute of Science and Technology, India

June 2023

WORK EXPERIENCE

Full Stack Java Developer | PNC, Kansas

August 2024 - Current

- Developed and maintained **Java 17 microservices** with **Spring Boot** and **AWS RDS** for financial transaction processing, designing system architecture and robust validation rules that reduced transaction failures while working in an **Agile Scrum** environment.
- Built secure **RESTful APIs** using **Spring Security** with frontend-backend integration for multiple payment networks, ensuring PCI compliance and regulatory standards throughout the **SDLC** while effectively collaborating with cross-functional teams.
- Implemented asynchronous message processing using **Apache Kafka** with **RabbitMQ** integration for real-time notifications, developed event-driven architecture patterns, improving system scalability and reducing processing latency by 35%.
- Improved performance using **Java Streams and multi-threading**, cutting memory usage by 30% and boosting response efficiency.
- Designed responsive transaction monitoring dashboards using **React.js** and **Bootstrap** with API integration, enabling operations teams to quickly identify and resolve issues, improving incident response time.
- Implemented **CI/CD pipelines** using **Jenkins**, **GitHub** for version control, and **AWS CodeDeploy** for cloud deployment, performing code reviews and writing **JUnit** and **Mockito** tests with performance optimization that reduced deployment time.
- Containerized microservices with **Docker** and automated infrastructure provisioning using **Terraform**, deploying on **Kubernetes (AWS EKS)** clusters to ensure scalability, resilience, and cost-efficient cloud operations.
- Troubleshoot critical production issues within SLA using IntelliJ debugging and optimized **AWS RDS/MySQL schemas**, improving transaction processing speed by 20% and overall system throughput.

Full Stack Java Developer | Vivma Software Inc, India

August 2021 – July 2023

- Architected comprehensive authentication system using **Spring Boot** and **Spring Security REST APIs** with **JWT tokens** and **OAuth2** integration, implemented **TypeScript** validation with **Redis** caching, reducing user login failures by 70%.
- Engineered internal task management dashboard through **Angular** and **Material-UI** with **PoDB** backend, developed **WebSocket** real-time updates and **Azure Blob Storage** integration, improving operational efficiency.
- Resolved cross-browser compatibility issues by implementing responsive **Angular** interfaces with **Tailwind CSS** and **Bootstrap**, collaborated with UI/UX teams using **AJAX** calls, achieving 98% browser compatibility across devices.
- Established automated **CI/CD deployment** pipelines using **Jenkins** and **GitHub Actions** with **Docker** containerization for **microservices**, integrated comprehensive **Cypress** testing frameworks, achieving consistent automated deployment success rates.
- Coordinated **agile** development workflows by conducting **Git** and **GitLab** code reviews and **Maven** build processes, translated stakeholder requirements into **GraphQL API** implementations, maintaining 95% code quality standards across development cycles.
- Engineered data access layer using **Hibernate JPA** with **MySQL database** integration, developed comprehensive unit tests with **JUnit** and **TestNG** frameworks, achieving 95% test coverage and seamless database transaction management.
- Optimized backend data processing workflows by migrating legacy systems to **Azure Cloud Services** with **Python** microservices, implemented caching strategies reducing API response times by 60%.
