

SAI LOKESH
Sr. Front-End Developer
Email: sailokesh0691@gmail.com
Phone: +1 361-371-0897

PROFESSIONAL SUMMARY

Over 10 years of experience in Front-End Web Application Development, utilizing HTML4/5, XHTML, DHTML, CSS2/3, DOM, JavaScript, jQuery, AngularJS/Angular, Node.js, AJAX, JSON, Grunt, Gulp, Bower, and XML.

- Extensive experience in writing web applications covering front-end /UI jQuery, AJAX, and JavaScript frameworks to create rich, high-performance, user-friendly applications.
- Extensive knowledge in developing Single Page Applications(SPAs) using various JavaScript frameworks like SAAS and AngularJS.
- Proficient in developing various JavaScript frameworks such as ReactJS/Redux, BackboneJS, RequireJS, NodeJS, ExtJS, and Responsive Web Design (RWD).
- Hands-on experience developing applications using NodeJS and ReactJS, implementing Asynchronous Module Definition (AMD), and using Grunt as a task manager.
- Extensive experience in developing applications using ReactJS, Redux, JSX, JavaScript ES6, HTML5, CSS3, MVC, Web API, and Node.js.
- Experienced in implementing component life cycle architecture, store actions, using socket.io in React-Redux app to handle real time data, installing React Router, Thunk Redux for API calls in ReactJS.
- Developed multiple Angular components using controllers, services, directives, and filters.
- Proficient in creating rich interactive web pages with animations using YUI utilities.
- Strong knowledge of Bootstrap, CSS media queries, and W3C web standards to ensure cross-browser compatibility.
- Deep understanding of Object-Oriented JavaScript programming and JavaScript MVC framework.
- Extensive experience in Development, Implementation and Testing various application architectures, including E-Commerce, B2B, Distributed Applications, Internet /Intranet.
- Significant expertise in web development tools like Aptana Studio, webStorm, Photoshop, Flash, Spring Tool Suite, Atom, Eclipse, IntelliJ, Notepad++ and Firebug.
- Well-versed in Agile methodologies, including Extreme Programming, Waterfall Model, and Test-Driven Development (TDD).
- Strong database expertise with MySQL and significant experience in Linux environments.
- Ability to apply W3C web standards with great skills in achieving the best cross-browser user experience for sake of long-term user retention and engagement.
- Responsible for checking cross-browser compatibility and hence worked on different browsers like Mozilla Firefox, Google Chrome, Safari and Internet Explorer.
- Hands-on experience with RESTful APIs, application development using HTTP-based REST Web Services, and Angular UI components like GRID.
- Experience in implementing cross-browser style-sheets.
- Performed unit testing, along with integration testing using Chrome Inspector to fix bugs and worked closely with QA.
- Extensive experience using Scaffolding tools like Git, SVN and Grunt.
- Application development experience in E-Commerce to develop the site more attractive and powerful.
- Strong understanding of the Document Object Model (DOM) and its functionalities.
- Used GIT and perforce for driving the application repo.
- Extensively used Agile, Kanban methodologies in the projects.

TECHNICAL SKILLS

UI Web Technologies: HTML/HTML5, CSS/CSS3, JavaScript, jQuery, DOM, AJAX, JSON, AngularJS/Angular 2+, ReactJS, NodeJS, D3.js, Bootstrap, LESS, SASS, WebSockets, Node.js, Express.js.

IDEs & Editors: Notepad++, IntelliJ, Webstorm, Sublime Text, Adobe Dreamweaver, Aptana, Visual Studio, Microsoft FrontPage.

Developer Tools (IDE): Sublime Text 2/3, Brackets, WebStorm, Visual Studio Code

Web/App Servers: HTTP Web Server, Apache Cordova, Web Hosting Platforms (Shared, Dedicated, VPS).

Database: MySQL, Oracle, MS-Access, SQL 2000/2005, DB2, MongoDB.

Version Control: Git, Perforce, SVN.

Browser: Chrome, Firefox, Safari, Opera, Internet Explorer.

PROFESSIONAL EXPERIENCE

Client: Experian, Costa Mesa, CA | | Mar 2023 - Present

Role: Sr. Front End Developer

Responsibilities:

- Developed custom Angular directives to enhance accessibility and eliminate cross-browser compatibility issues.
- Followed the Agile methodology to implement the application.
- Built user interfaces using HTML5, CSS3, JavaScript, XHTML, jQuery, AJAX, JSON, AngularJS, NodeJS, Kendo UI and Bootstrap.
- Worked in a team and was involved in developing the responsive and interactive UI, layout, and front-end programming (HTML) from the wireframes.
- Coded and tested reusable JavaScript, CSS3, HTML5, and GWT widgets/libraries for complex UI controls.
- Tested cross-browser functionality and fixed major layout bugs for supporting browsers using Angular. Implemented form validations across the site using jQuery and JavaScript.
- Used AngularJS as a framework to create a Single Page Application (SPA), binding data to specific views and synchronizing data with the server.
- Displayed tabular data using AngularJS by applying filters on table data.
- Used HighCharts and D3.js for creating graphs and charts for the payments section and implemented filtering functionality for graphs.
- Used AngularJS HTTP requests to read data from web servers and process JSON data for UI rendering.
- Debugged applications across different browsers using Firebug and tested applications using JUnit, Jasmine, Karma, Mocha, and Grunt tools.
- Implemented functional programming in JavaScript, front-end design patterns, and UI component architecture while mentoring junior developers and maintaining enterprise-grade code quality.
- Developed hybrid mobile applications using AngularJS.
- Redesigned the application using HTML5, CSS3, JavaScript, AngularJS, and jQuery.
- Developed web service components using REST, SOAP, and WSDL.
- Responsible for designing various search forms, prototypes, and creating error validation code using JavaScript and jQuery.
- Designed and maintained Privacy Policy and Terms of Use pages for their public website.
- Developed in environments using application servers like WebSphere MQ, BEA WebLogic, Oracle WebLogic, Apache Cordova, JBOSS, Tomcat, and AWS (Amazon Web Services).
- Used jQuery-Ajax plugins to retrieve data in JSON format and display it on HTML pages.
- Implemented model-view-controller (MVC) architecture using the Angular framework.
- Performed extensive JavaScript and jQuery programming to enhance AJAX functionality on the website.
- Developed and maintained a cross-browser-compatible, dynamic website using HTML5, CSS3, and JavaScript.

Environment: HTML5, CSS3, JavaScript, jQuery, Bootstrap, AngularJS, Node JS, Ember.js, Bootstrap, Cordova, Amazon Web Services (AWS), Jasmine, Mocha, Grunt, d3js, AJAX, Hibernate, Karma, EXTJS, Web Sockets and Canvas, Maven, hybrid, Rest APIs, Mobile (Windows, iOS, Android), GIT, JAWS, Grunt, version one SVN, Sublime Text.

Client: CBRE, Texas, United States | | Jul 2021 – Mar 2023

Role: Front End Developer

Responsibilities:

- Developed the front end of the web application using HTML5, CSS3, JavaScript, jQuery, and AngularJS.
- Followed the Kanban methodology to track project progress and ensure timely delivery.

- Collaborated with product owners and business analysts to discuss and understand business rules and application flow.
- Designed Class Diagrams, Sequence Diagrams, and Event Diagrams for documentation purposes.
- Used SaaS as a software distribution model through which apps are available to the customers.
- Designed and developed the application to be responsive for desktops, mobile devices, and tablets using Twitter Bootstrap, HTML5, CSS3, JavaScript, and Angular.
- Developed E-Commerce sites for online trading using Electronic Data Exchange.
- Utilized WebStorm for front-end development and Subversion as a version control system with the Tortoise SVN client.
- Developed application design guidance and consulted on technology usage, tools, and design patterns.
- Utilized the AngularJS framework to store backend data in models and populate it in the UI.
- Created AngularJS controllers to isolate scope and perform UI operations efficiently.
- Developed custom AngularJS directives to manipulate and display data in company-standard formats.
- Mentored team members on project technologies and best practices.
- Converted pages from XMI (XML Metadata Interchange) to AngularJS, managing XML requests and responses conversions to JSON for the front end.
- Collaborated with multiple teams to design, develop, implement, test, and continuously improve software applications, databases, and websites.
- Performed complex analysis, design, development, and implementation of new software procedures, data modifications, and user requests.
- Used SQL queries to perform backend data validations.
- Decomposed requirements to the lowest level for thorough verification and validation.
- Ran standalone front-end applications on the Grunt server.
- Used Google Chrome Developer Tools for debugging the application.
- Managed source and version control using SVN and tracked project status using JIRA.
- Participated in team meetings regularly and handled integration room responsibilities.
- Other daily tasks included unit testing, documentation, fixing defects, root cause analysis, code reviews, defect resolution, and QA support.

Environment: Angular.js, React.js, Node.JS, JavaScript, JQuery, Twitter Bootstrap, Ajax, HTML5, CSS3, SVN, Sublime, Maven, GIT, PostgreSQL, MongoDB, TDD, Jasmine, Karma, Gulp, Protractor.

Client: Verizon, Delaware, United States | |Oct 2019 – June 2021

Role: Front End Developer

Responsibilities:

- Designed web application user interfaces, interaction scenarios, and navigation workflows based on business requirements and use cases.
- Developed configuration widgets using CSS3, JavaScript, and the jQuery framework in the UI layer with tag libraries.
- Tested and deployed applications on Linux.
- Developed a JavaScript framework as a wrapper on top of the jQuery framework and AJAX to create UI configuration widgets.
- Implemented AJAX, JavaScript, JSP, jQuery, HTML, and CSS to enhance system interactivity and performance.
- Used JavaScript and CSS to create UI design mockups and wrote code in jQuery, JavaScript, CSS, and AJAX for navigation-oriented applications.
- Developed dynamic integrations with jQuery Tab and various jQuery components using AJAX.
- Worked extensively with AngularJS, which integrates Model View Controller (MVC) capabilities for efficient development and testing.
- Implemented jQuery Filter Search, a JavaScript tool for adding a search widget next to page listings, hiding non-matching list items dynamically.
- Utilized jQuery plugins such as Isotope and Masonry for multi-column layouts, search functionality, calendars, AJAX queuing, and auto-populating multiple select boxes.
- Used the jQuery Fancy Box plugin to add stylish drop shadows to images on webpages.
- Worked with Jasmine for JavaScript testing.
- Developed UI components and implemented plugins using JavaScript, HTML, CSS, and XML.
- Applied and tested CSS3 throughout the site as both inline styles and imported files.

- Resolved various CSS compatibility issues and conducted research for implementing CSS3 enhancements in the framework.
- Designed pages rendered from custom CSS/CSS3 using LESS preprocessors.
- Developed and implemented JavaScript throughout the site, both inline and as imported files.
- Used Git for distributed version control.
- Created a rich user experience prototype for managing users and roles.
- Participated in testing, bug fixing, and documenting application processes step by step.
- Worked with jQuery Mobile, an HTML5-based framework for designing user interfaces for web applications.
- Utilized JavaScript Object-Oriented Programming (OOP), Selenium, and Cucumber to synchronize data.

Environment: HTML4/HTML5, CSS/CSS3, JavaScript, AJAX, jQuery, Git, perforce, XML, SQL, Python, Windows Platform.

Client: NISUM, Hyderabad, India | | May 2017 – Sep 2019

Role: Front End Developer

Responsibilities:

- Worked on the continued development of custom, industry-specific iOS and web-based software products.
- Used Photoshop, Illustrator, PHP, JavaScript, AJAX, XML, MYSQL, and other front-end and middle-tier technologies and standards, including content management systems.
- Collaborated on designing and developing scalable, responsive web applications for AT&T's customer-facing platforms using React.js and modern front-end technologies.
- Designed, developed, and tested HTML5, CSS3, Bootstrap, JavaScript, jQuery, and ReactJS to meet accessibility and web browser standards.
- Developed user interfaces using ReactJS and Flux for SPA development.
- Implemented ReactJS code to ensure cross-browser compatibility across Mozilla Firefox, Internet Explorer 7/8/9, Safari, and Firefox.
- Used React-Router to convert the application into a Single Page Application.
- Worked with ReactJS components, forms, events, keys, routing, animations, and Flux concepts.
- Attended college career fairs to promote careers in web development.
- Created a standardized email template for all Q-Tech email campaigns.
- Developed brochures and templates for email marketing campaigns.
- Managed the CMS for blogs and other pages using WordPress, including modifying themes, creating themes from PSD, integrating plugins, and maintaining a secure WordPress installation.
- Designed and created a shopping cart with integrated payment gateways.
- Developed user-friendly navigation for various data sections using jQuery Accordion and Tabs.
- Designed and updated user integrations with various APIs.

Environment: HTML5, jQuery, CSS, JS, Ajax, XHTML, XML, PHP5.2.11, WordPress.

Client: ESM Square Technologies, India | | Jun 2015 – Apr 2017

Role: WEB UI Developer

Responsibilities:

- Communicated with clients to understand website requirements and gained experience in project planning.
- Contributed to writing the Project Design Document and Project Plan Document.
- Participated as a team member in designing the user interface using HTML and CSS, ensuring a user-friendly experience, especially for children.
- Implemented user interface guidelines and standards throughout website development and maintenance using JavaScript, jQuery, CSS, and HTML.
- Built modern web applications with responsive front-end designs using React/Redux or pure HTML, CSS, and JavaScript (Bootstrap/Foundation/jQuery).
- Developed backend architecture using RESTful APIs, JSON, and Oracle.
- Designed and developed web applications using HTML5, CSS3, JavaScript, ReactJS, NodeJS, and jQuery.
- Utilized ReactJS to build encapsulated components, pass rich data through applications, and manage state outside the DOM.
- Developed responsive web design (RWD) applications following a component-based approach using React, Redux, ES6, and Bootstrap.

- Built reusable UI components for React applications, including trees and slide views.
- Wrote application-level code to interact with APIs and web services using AJAX, JSON, and XML.
- Enhanced user experience by designing new web features using MVC frameworks like Backbone.js.
- Developed customer-facing software for managing advertisements using Backbone.js, JavaScript, jQuery, HTML, and CSS.
- Worked extensively on Spring MVC framework to develop new internal web applications.
- Developed cross-browser-compatible designs and fixed bugs across multiple browsers.

Environment: HTML, CSS, JavaScript, JQUERY, AJAX, JSON, XML, ECLIPSE, SVN, Linux, MySQL.
