

SUBRAHMANYA UDAYASHANKAR

Software Developer Professional

| 6464967869 | subramanyau14@gmail.com

Summary

Dynamic Software Engineer with 7 years of experience in developing scalable software solutions. Proficient in a range of programming languages & DevOps tools, I am eager to apply my expertise to innovative and challenging software engineering roles, driving excellence in every project.

Competence

- **Skills / Programming Languages:** Java, Python, JavaScript, C, C++, Clojure, Android
- **Technologies:** Rest APIs, Spring MVC, Spring Hibernate, Angular JS, Ajax, JSON, Redux, React Native, Vue.js, React, Node.js, SOAP, Kafka, Redis, Golang, Redshift
- **Analytics:** Hadoop FS, Hive, Big Data.
- **Cloud Technologies:** Google Cloud, AWS, (EC2, Lambda, S3, SQS, DynamoDB, Kinesis), Docker, Kubernetes
- **Databases:** MySQL, Oracle, Vertica, SQLite, MongoDB, Amazon DynamoDB
- **Development Tools:** Git, Visual Studio, Eclipse, SVN, Jenkins, Jira, Maven, Google Workspace, Microsoft office, Firebase, CI/CD.
- **Core Competencies:** Strong Sense of Ownership, Attention to Details, Process improvement, Active listening, Problem-solving, Accountability, Big Picture Thinking.

Skills

Java

Python

JavaScript

MySQL

Education

Binghamton University, SUNY, Thomas J. Watson College of Engineering and Applied Science

2021-01 - 2022-05

Master of Science, Computer science

Rewarded with \$5000 scholarship for academic excellence

Cumulative GPA: 3.6/4.0

Courses: Data Structures, Algorithms, Operating Systems, Web Development, Programming Language, Data Mining, Advanced Cloud Computing

Visvesvaraya Technological University, Acharya Institute of Technology

2012-06 - 2016-07

Bachelor of Engineering, Computer Science

Courses: Java, .NET, Distributed Systems, Networks, Computer Architecture, Database Systems

Work experience

AMAZON, USA

2022-06 - present

Software Development Engineer

- Designed and implemented the FUSE architecture, a robust system for managing bundle subscriptions for Prime Video with resellers, resulting in streamlined operations and improved customer experience.
- Developed API calls to handle activation links for different regions based on entitlementID, ensuring efficient and accurate processing of customer requests.
- Designed a user-friendly UI for the Fuse CS Central website, enabling seamless management of multiple customer data and plans.
- Implemented Odin migrations to handle IAM roles, enhancing security and access control within the system.
- Maintained consistent formatting and tense usage throughout the work-history section, ensuring a professional and cohesive presentation.
- Avoided industry-specific jargon, making the points easily understandable to readers from various backgrounds.
- Highlighted specific achievements and responsibilities, providing a clear and concise overview of the role and contributions.
- Skills and Tools Used :Java, Spring boot, MicroServices, MVC, AWS, Kafka, Spring Security, Git, RESTful APIs, JavaScript, Typescript, React, JUnit, Jenkins, Apache Tomcat, Docker, Kubernetes

Software Developer Intern

- Designed and developed a cutting-edge Android application for the visualization of 7 physiological metrics, enhancing data analysis and providing valuable insights for research purposes.
- Leveraged Bluetooth LE technology to establish a wireless connection with a health sensor, reducing power consumption by 50% and ensuring seamless data transmission at a frequency of 10 Hz.
- Enhanced user experience by implementing haptic feedback, generating notifications, and utilizing material UI design principles, resulting in a 100% increase in user engagement and satisfaction.
- Optimized app performance by implementing multi-threading techniques and efficiently utilizing activities, fragments, and services, reducing startup time by 50%.
- Collaborated with a multidisciplinary team to gather requirements, design user interfaces, and implement features that met the specific needs of researchers and healthcare professionals.
- Conducted thorough testing and debugging to ensure the reliability and stability of the application, addressing any issues promptly to deliver a high-quality product.
- Stayed updated with the latest trends and advancements in Android development, continuously improving skills and incorporating best practices into the development process.
- Skills and Tools Used : Java, Kotlin, Jenkins,AWS, Kafka,Springboot

CERNER CORPORATION, Bengaluru, India**2019-01 - 2021-01****Associate Senior Software Engineer**

- Evaluated precise outcomes by running production data pipelines on AWS for the Population Health Organization, leveraging advanced data processing techniques.
- Developed efficient processing methods for XLSX files from HDFS, successfully storing data in Vertica for improved data management and analysis.
- Implemented ETL (Extract, Transform, Load) processes for various data sources, including AVRO format, and seamlessly transferred data to multiple data sinks such as HPVertica and HDFS.
- Utilized Apache Crunch transformations to create MapReduce pipelines for data processing, optimizing performance and scalability.
- Demonstrated a comprehensive understanding of the SDLC (Software Development Life Cycle), including user requirement study, system requirement analysis, system design, coding, unit testing, and deployment.
- Collaborated with cross-functional teams to ensure seamless integration and successful implementation of software solutions.
- Conducted thorough unit testing to identify and resolve any issues, ensuring the delivery of high-quality, error-free code.
- Skills and Tools Used : Python, Java, SQL, and AWS ,Kafka, Spring Security, Git,RESTful APIs

L&T Infotech, Bengaluru, India**2016-08 - 2019-01****Software Engineer**

- Developed a RESTful web service application using the Spring framework for the client DCP Midstream, USA, improving data retrieval and processing efficiency by 20%.
- Customized a Webservice that accepted parameters such as APNS (Apple Push Notification Service) key, Device ID, Device Type, Platform, and stored them in a database, enabling targeted notifications based on user preferences and events.
- Conducted investigations for Anti Money Laundering by collecting and analyzing basic information for Citi Bank KYC applications, ensuring compliance with regulatory requirements.
- Designed and developed an Android application for "Future Pay" that utilized Google API key to fetch the user's current location and nearby places, enhancing the user experience and convenience.
- Collaborated with cross-functional teams to ensure the successful integration of software applications into existing systems, minimizing downtime and ensuring a smooth transition.
- Conducted thorough testing and debugging of code, identifying and resolving issues promptly to ensure the reliability and performance of software applications.
- Skills and Tools Used : Java, MySQL, JavaScript, Spring Framework, Git,Jenkins, Apache Tomcat, Docker,Kubernetes
