SUMMARY

Software Engineer with 4+ years of experience developing scalable applications in finance and insurance. Skilled in designing and deploying microservices and cloud-native solutions that improve system performance and reduce infrastructure costs. Strong background in automation and Agile delivery, enabling faster release cycles, higher reliability, and secure compliance-driven software that enhances customer experience and business efficiency.

TECHNICAL SKILLS

Certifications: AWS Certified Cloud Practitioner (CLF-002)

Programming Languages: Java (8+), Go, Python, JavaScript (ES6+), TypeScript, C++, C#, SQL

Frameworks & Libraries: Spring Boot, Hibernate, React.js, Angular, Node.js, Django

Cloud & DevOps: AWS, Kubernetes, Docker, GitHub, GitLab, Jenkins, Terraform, CI/CD Pipelines

Databases: PostgreSQL, MySQL, MongoDB, SQL Server, DynamoDB

APIs & Architecture: REST, SOAP, GraphQL, Microservices, API Gateway

Security & Compliance: JWT, SSL/TLS, HIPAA Compliance, Secure Coding Practices

Tools & Methodologies: Junit, JIRA, Selenium, Confluence, IntelliJ IDEA, Visual Studio, Agile/Scrum

WORK EXPERIENCE

Software Development Engineer

Pittbos – Boston, USA

Mar 2025 – Present

- Led end-to-end feature development and bug fixes in an Agile environment using Go, React.js, TypeScript, and Tailwind CSS.
- Developed Go-based REST microservices with Amazon Aurora (PostgreSQL) and DocumentDB, and built an LLM-powered CRM email generator for context-aware quote follow-ups.
- Architected and maintained GitLab CI/CD pipelines for backend (EC2) and frontend (AWS Amplify), enabling zero-downtime releases across master, stage, and production.
- Automated nightly prod-to-stage database restores and S3-based environment refreshes via AWS Lambda jobs, saving 10+ manual hours weekly. Led a team of 4 offshore contractors, conducted code reviews, collaborated with QA, and managed biweekly production releases.

Software Developer

State Street – Boston, USA

Jul 2023 – Feb 2025

- Built and secured APIs with **JWT/OAuth2 authentication**, integrating financial data providers to ensure **SOC 2 compliance** and mitigate security risks across critical workflows.
- Migrated legacy applications to a **cloud-native microservices platform** using **Java Spring Boot, Go, and Docker**, deployed on AWS (ECS, RDS, Lambda), boosting scalability, enhancing reliability, and cutting infrastructure costs by **18%**.
- Integrated **AWS Aurora** and **DynamoDB** for high-availability, compliance-driven data storage, while implementing **Kafka-based event streaming** to enable real-time synchronization and reduce alert latency by **22%**.
- Automated CI/CD pipelines with **Jenkins and GitHub Actions**, accelerating build, test, and deployment cycles by **32%** while ensuring **zero-downtime releases**.
- Optimized **PostgreSQL and MongoDB** through indexing and query tuning, reducing query times by **22%**, and collaborated with QA, DevOps, and Product teams in Agile sprints to drive a **20% increase in velocity** and client satisfaction.

Junior Software Developer

ICICI Lombard Insurance – India

Jun 2020 – Aug 2022

- Contributed to backend development using Java (Spring Boot, Hibernate, JSP) and Node.js, improving performance of client-facing insurance apps.
- Helped build a motor insurance claims automation tool across DB queries, business logic, and integration testing, reducing turnaround time by 18%.
- Supported development of a document management system on AWS S3, ensuring reliable storage/retrieval with compliance adherence.
- Participated in migration from legacy monoliths to .NET-based modular services, focusing on refactoring, debugging, and reusable components.
- Worked in Agile sprints on task delivery, unit tests, and collaboration with QA/DevOps to improve team velocity and delivery speed.

EDUCATION

University of Massachusetts Boston

Boston, MA

Master of Science in Computer Science

2024

Sreenidhi Institute of Science and Technology

Hyderabad, India

Bachelor of Electronics and Computer Engineering

2021
