Professional Summary

PeopleSoft Developer with 4+ years of experience in designing, developing, and maintaining PeopleSoft applications. Demonstrated expertise in People Tools, People Code, Application Engine, and integration technologies. Recently enhanced my skill set by mastering Python programming and earning certifications in Python development. Eager to apply the knowledge of both PeopleSoft and Python to deliver effective solutions in a dynamic and innovative environment.

Career Break (2019–2024): Took a professional break due to visa constraints in the USA. During this time, I focused on advancing my skills with Python certifications and personal projects. Now, I'm excited to re-enter the workforce as a PeopleSoft Developer or Python Developer, bringing my experience and newly gained Python expertise to deliver meaningful solutions.

Technical Skills

- **PeopleSoft Technologies:** People Tools, People Code, Application Engine, PeopleSoft Workflow, Integration Broker, Component Interface, BI Publisher, SQR
 - **PeopleSoft Modules:** PeopleSoft **HRMS** (HR, Payroll, Base Benefits, Benefits Administration, Time and Labor, and Employee Self Service modules) and PeopleSoft **FSCM** (Accounts payable, Accounts Receivables, General Ledger)
 - **Programming Languages:** Python, SQL, PL/SQL, PeopleCode, SQR
 - **Frameworks & Tools:** Pandas, NumPy, GitHub
 - **Databases:** SQLite, MySQL
 - **Software Development:** Python scripting
 - **Web Technologies:** RESTful APIs, JSON
-

Certifications

- **Certified Associate in Python Programming** – Python Institute (2024)
 - **Certified Professional in Python Programming** – Python Institute (2024)
 - **Python for Everybody** – University of Michigan (2020)
-

Professional Experience

Cognizant Technology Solutions (Healthcare Domain) – Associate Software Engineer

June 2018 – Feb 2019

- **Version Upgrades:** Supporting system upgrades and patches, ensuring the latest PeopleSoft versions align with healthcare industry needs.
- **Application Engine Processes:** Building and optimizing Application Engine processes for automating routine tasks such as payroll processing, billing cycle updates.
- **Role-Based Access Control (RBAC):** Customizing PeopleSoft security to define roles with restricted access, ensuring sensitive data is accessible only to authorized personnel.
- Collaborated with business analysts and functional teams to gather requirements, design solutions, and provide technical specifications for PeopleSoft implementations
- **Documentation:** Creating detailed technical documentation for integrations, customizations, and PeopleSoft modules, ensuring that future enhancements or system upgrades can be performed without issues.
- Provided ongoing support and maintenance of existing PeopleSoft applications, including troubleshooting and resolving user issues.

Larsen & Toubro Infotech (Retail/Banking domains) – Software Engineer

November 2014 – June 2018

- **PeopleSoft HRMS & FSCM Expertise:** Developed a strong understanding of **PeopleSoft HRMS** (Human Resource Management System) and **FSCM** (Financial Supply Chain Management) modules, contributing to various enhancements and integrations
 - **Data Integration:** Designed and implemented interfaces for data exchange between **PeopleSoft** and third-party systems using **SFTP** and **APIs**, ensuring seamless data flow across systems
 - **End-to-End Project Implementation:** Led the full lifecycle of projects, including **requirement gathering, preparing technical specifications, development, and migration**, ensuring timely and successful project delivery.
 - **Leave Module Customization:** Customized the Leave module to implement independent policies for permanent and temporary employees, streamlining leave management processes.
 - **Timesheet Customization:** Modified the **timesheet page** to restrict employees from entering time in Punch Format, ensuring better compliance with company timekeeping policies.
 - **Risk Parameter Estimation:** Developed **shell scripts** to estimate risk parameters of multiple portfolios within the **banking sector** and generated automated reports to help users make decisions.
 - **Custom Financial Reporting:** Developed and deployed custom financial reports accessible through the PeopleSoft portal using SQR (Structured Query Reporter) and BI Publisher, significantly reducing manual efforts for users.
 - Led code reviews and knowledge sharing sessions with junior developers, fostering continuous improvement within the team.
-

Recent Projects & Upskilling Initiatives (2024)

- **Calendar App:** Developed a GUI-based calendar app that allows users to view monthly calendars, add events, and set reminders.
 - **Simple Budgeting System:** Developed an application that helps users track their income and expenses. Implemented features like categorizing expenses, setting budgets, and generating monthly financial reports.
 - **Tic-Tac-Toe Game:** Created a simple 2-player Tic-Tac-Toe game that runs in the console. Players take turns to place their mark on a 3x3 grid, and the game checks for a winner.
-

Education

Bachelor of Technology in Electronics & Communications

Jawaharlal Nehru Technological University, India | *May 2014*

Next Steps & Career Aspirations

Looking for opportunities as a **PeopleSoft Developer** or **Python Developer**, where I can apply my background in **PeopleSoft development** alongside my recent experience with **Python programming**. I'm excited to continue learning and contribute to projects that make a real impact.

Additional Information

- Strong communication and problem-solving skills.
- Ability to quickly learn and adapt to new technologies and tools.
- Passionate about continuous learning and development in both PeopleSoft and modern programming languages like Python.
