

Levi Valdez

Denver, CO 80250 • (803) 657-8152 • levinardoal@gmail.com • linkedin.com/in/levi-valdez-994337354

Skills

.NET 6 • .NET 7 • .NET 8 • ASP.NET Core • Entity Framework Core • SignalR • AWS (Lambda • EC2 • S3 • RDS) • Azure Functions • Kubernetes • Terraform • Datadog • Docker • Jenkins • GitHub Actions • SQL Server • PostgreSQL • DynamoDB • Planetscale • Redis • MongoDB • MySQL • Apache Kafka • RabbitMQ • AWS Kinesis • xUnit • NUnit • Playwright • SonarQube • Grafana • Prometheus • React • Angular • Blazor • Vue

Experience

01/2024 – PRESENT

Senior FullStack .NET Developer | United Health Group

- Designed and developed high-performance microservices using .NET Core and C#, improving system scalability.
- Optimized front-end performance by implementing React hooks and Context API, enhancing component reusability and reducing code duplication across the application.
- Built and optimized RESTful APIs and GraphQL endpoints for seamless data retrieval and integration.
- Implemented cloud-based solutions using AWS Lambda, Azure Functions, and Kubernetes for efficient workload management.
- Improved CI/CD pipelines with Jenkins, GitHub Actions, and Docker, reducing deployment failures by 60%.
- Integrated authentication and authorization using OAuth 2.0, JWT, and Azure AD B2C for secure API access.

03/2020 – 12/2024

Senior Full-Stack Developer | Notable Labs

- Developed scalable and secure ASP.NET Core APIs, enhancing system reliability and response times.
- Built and maintained a responsive, mobile-first UI using React, ensuring smooth cross-device functionality and delivering an intuitive user experience.
- Led database optimization efforts with Entity Framework Core and SQL Server, reducing query execution time by 40%.
- Built and deployed event-driven architectures using Apache Kafka and RabbitMQ, enabling high-throughput processing.
- Created serverless solutions using AWS Lambda and Azure Functions, optimizing cloud cost and performance.
- Developed frontend UI components using React and Blazor, improving user experience and system interactivity.

05/2018 – 02/2020

Software Engineer II | Microsoft

- Migrated legacy .NET Framework applications to .NET Core, improving performance and maintainability.
- Designed database schemas and stored procedures using SQL Server and Entity Framework Core.
- Developed enterprise web applications with ASP.NET MVC, Web API, and Angular, ensuring seamless front-end-back-end integration.

- Implemented unit and integration testing strategies using xUnit and Moq, increasing test coverage by 70%.

01/2013 – 05/2018

Software Engineer I | Cognizant

- Designed and maintained multi-tenant SaaS applications using C#, .NET, and SQL Server.
- Developed high-performance background jobs using Hangfire and Quartz.NET for task scheduling.
- Implemented authentication and authorization systems with IdentityServer4 and Azure AD.
- Optimized CI/CD pipelines, automating deployments and reducing release cycles by 50%.

Education

05/2012

Bachelor's Degree in Computer Science | University of Melbourne

3.8 GPA • Member of university's Honor Society
