

Cisco Certified Internetwork Expert #51690

Shabaz Sahik

shabazsahik@gmail.com

703-945-7665

Candidate Overview:

- Excellent troubleshooting and problem solving skills
- Experience in deploying large scale Data Centers
- Deep understanding routing protocols such as EIGRP, OSPF, BGP, MPLS, and LISP
- Planning and Implementing MPLS network, L3VPN, and L2VPN technologies
- Experience in ACI (Software Defined Networking)
- Experience in deploying SDWAN solutions.
- Deep understanding in deploying IPSEC, GRE, DMVPN, Site-to-Site VPN technologies
- Experience in deploying VXLAN BGP EVPN environments.
- Experience with Nexus 2k, 5k, 7k and 9k
- Experience with creating a High Availability and Disaster recovery implementation plan
- Experience with implementing basic wireless, VoIP, and Video support solution
- Experienced in implementing different types of QOS
- Extensive experience with managing Cisco Routers, Firewalls, and Switches
- Experience with storage networking
- Experience in deploying and managing large scale Cisco UCS and hyper-converged systems.

Education:

Bachelors in Information Technology

George Mason University, Fairfax, VA, (Not complete)

A.S, Information Technology

Northern Virginia Community College, Alexandria, VA

Certifications:

CCIE #51690

CCIE Data Center Written

CCIE Data Center Lab – In progress

Cisco Certified Data Center Professional (CCNP, 2019)

Cisco Certified Network Professional (CCNP, 2019)

Cisco Certified Network Associate (CCNA, 2012)

Security +, 2013

Clearance:

Clearance information will be provided upon request

Experience

Cisco, Herndon, VA (05/2019 – Present)

Senior Network Engineer – Cisco/ DEA

- Experienced in deploying ACI supporting Multi-Tenancy in Network Centric and Application centric modes
- Deployed redundant ACI Data centric fabrics in Multi-pod and Multi-Site environment to support high availability and Disaster recovery.
- Extended On-Premises Data Center sites to hybrid multi-cloud environment such as AWS, Microsoft Azure, and Google Platforms.
- Extensive knowledge in integrating ACI Fabric with virtual services like VM vCenter, Nutanix, Microsoft Hyper-V and through L4-L7 services like virtual ASA Firewalls, and F5 load balancers.
- Designed Planned and implemented End-to-End Data Center solutions including Route/Switch, Security, Compute, Virtualization, and Storage networking.
- Expert in deploying and managing Hyper-Converged systems like Nutanix AHV and Cisco Unified Computing System
- Expert in Data Center protocols such as IS-IS, BGP EVPN, VxLAN, vPC, Fiber Channel, iSCSI, and vSAN's.
- Experienced in deploying configuration using automation tools like Postman, Terraform, and Python.

Verium, Washington, DC (10/2018 – 05/2019)

Senior Network Engineer – The White House

- Experienced In Managing Cisco Nexus 9k, 7k, 5k, & 2k Series Switches
- Maintain and Troubleshoot Cisco Unified Computing Systems
- Plan and Implement High Availability and Redundant Data Centers
- Develop & Perform Migration From Traditional Data Centers To Nexus Environments (Physical & Virtual)
- Monitor Network Performance & Troubleshoot Problem Areas as Needed.
- Create Low & High-Level Implantations In Accordance To Customer Standards
- Hands On Experience in Deploying Cisco ACI Including Tenants, Application Profiles, Endpoint Groups, Contracts, Subjects & Multi-Network Domains (Lab Environment)
- Implement and design Multicast, Auto-RP, BSR, Anycast, and MSDP.
- Sound Understanding of SDN Concepts, Virtualization Technology and Architecture. Including Hands on Experience with SDN Controller Architecture (ex. Cisco APIC, VMWare).

Intelligent Decisions, Ashburn, VA (03/2015 – 10/2018)

Senior Network Engineer – US Courts

- Experienced in managing Cisco 7200, 3900 and 3800 series routers
- Designed and built WAN infrastructure
- Maintain and troubleshoot Layer 3 switch, Routers, and Nexus Switches
- Troubleshoot MPLS, BGP, and VPN issues
- Plan, design, coordinate router installs and design
- Plan and implement VPN gateways, IPsec, DMVPN and GRE tunnels from various remote sites
- Implement and design Multicast, Auto-RP, BSR, Anycast, and MSDP.
- Implement and design QOS features such as policers and shapers based on requirements
- Experienced in implementing High availability and redundancy protocols like HSRP, GLBP,

and VRRP

- Troubleshoot connectivity during network outage
- Experience with implementing and maintaining all IGP and WAN routing protocols

Intellidyne-LLC, Falls Church, VA (06/2013 – 03/2015)

Network Engineer (DoD)

- Experienced in managing Palo Alto Firewall
- Designed and built network infrastructure
- Maintain and troubleshoot Layer 3 switch, Routers, and Nexus Switches
- Deep understanding in DoD based STIG implementation
- Experienced in utilizing and maintaining network monitoring tools such as Solarwinds and SRTG
- Hands on experience in planning and implementing security policies for Cisco ASA, IPS, and IDS
- Experienced in utilizing log correlation tools such as NitroSiem, Splunk, and Juniper STRM
- Plan and implement VPN gateways, IPsec, and GRE tunnels from various remote sites
- Understanding in IP Multicasting
- Experienced in implementing High availability and redundancy protocols like HSRP, GLBP, and VRRP
- Deep understanding in Network Threats, malware, and log analysis
- Respond and detect potential malware, intrusions and minimize network security threat
- Troubleshoot connectivity during network outage
- Experience with implementing and maintaining all IGP and WAN routing protocols

American Diabetes Association, Alexandria, VA (11/2010 - 06/2013)

IT Division- Telecom/Network/System Administrator

- Experienced in designing, configuring, and installing Routers, Layer 3 and 2 switches.
- Experience in QOS implementation
- Responsible for network performance by monitoring performance; troubleshooting network problems and outages; scheduling upgrades; collaborating with network architects on network optimization
- Maintain T1, MPLS and WAN connections
- Experience with creating, implementing and troubleshooting VLAN and STP connections
- Troubleshoot and program Avaya and Cisco IP phones
- Implement SIP, QOS primer, Codec and Media Gateway
- Troubleshoot connectivity during network outage
- Experience with implementing OSPF, EIGRP, RIP, Frame Relay protocols
- Deep Understanding in Large Scale Project Management
- Extensive experience with Microsoft exchange server and Active Directory.

Satellite Tracking of People, Reston, VA (05/2010 - 06/2011)

IT Helpdesk and Customer Service

- Assist Clients with troubleshooting their accounts
- Troubleshoot and track the GPS devices.
- Assisted and trained all our agents with using the GPS tracking software.
- Create a daily report on inventory and emailing it to appropriate department.
- Set up new user accounts and assigning the GPS clients and GPS device under their account.
