[LinkedIn Profile](#)

Dynamic Full-Stack Developer with 8.7 years of experience specializing in enterprise software development and R&D. Proven expertise in creating responsive web applications and implementing complex software solutions. Core member of QAD's Adaptive Web Application development team with strong capabilities in both front-end and back-end technologies.

SKILLS

Frontend: Angular Js, TypeScript, React Js, JavaScript, HTML, CSS

Backend: Java, C++, C#, .NET, Progress 4GL, Object-Oriented ABL

Database: MongoDB, RDBMS (MySQL, PostgreSQL)

Tools & Platforms: Spring Framework (Boot, MVC), ORM Framework, GIT, Subversion, Bamboo, JIRA, SonarQube, CI/CD, Unix, Linux

API Development: REST **Methodologies:** Agile/Scrum, Test-Driven Development

EDUCATIONAL BACKGROUND

B.Tech, Computer Engineering University of Mumbai

July 2010-May 2014

WORK EXPERIENCE

QAD Manufacturing & Supply Chain Solutions, Mumbai, India

June 2017-June 2023

Software engineer II

- Led the full-stack development of 45+ responsive web application features using AngularJS, HTML, CSS, Java, and object-oriented methodologies, significantly enhancing user experience and optimizing application performance
- Architected and implemented RESTful web services and server-side logic using Java, Spring Boot, MVC, and Microservices architecture, improving system scalability by 30% and reducing response times by 20%
- Developed large, complex applications for Configurator products by designing features, implementing code, and testing with Java, contributing to increased revenue and enhanced customer satisfaction
- Developed customer-centric coding solutions for CRM software using C++ and C#, enhancing customer retention
- Established and maintained CI/CD pipelines, streamlining large-scale software deployments and reducing release times
- Mentored junior developers and conducted regular code reviews, improving code quality and reducing bugs by 30%
- Collaborated with cross-functional teams using Agile methodologies, contributing to sprint planning and retrospectives, which accelerated time-to-market by 30% and increased development efficiency
- Created comprehensive technical documentation, improving team onboarding and reducing troubleshooting time
- Executed unit tests to validate the functionality of components and ensure proper performance, leading to improved software quality and reliability
- Highly adaptable, quick learner with experience working on various technologies to deliver customer-focused results

Thirdware Global Services, Mumbai, India

Jan 2015 –May 2017

Software engineer

- Delivered end-to-end solutions as a techno-functional consultant on a million-dollar project, leading requirements gathering, analyzing root cause, and collaborating with users to optimize application usage and enhance satisfaction through customer-focused development
- Developed custom programs and reports, implementing bug fixes and feature enhancements based on JIRA tickets, improving the system functionality and reducing the issue resolution time

Certification And Projects worked on

2024 – Present

-HTML, CSS, and JavaScript for Web Developers

Developed a fully responsive website for a restaurant, integrating sophisticated features such as an interactive menu, online ordering system, dynamic reservation system, and real-time customer engagement tools.

- Meta Front End Developer -Introduction to AI and Machine Learning on Google Cloud

KEY ACHIEVEMENTS

- Successfully delivered multiple high-impact projects within deadlines
- Recognized for excellent problem-solving abilities and technical leadership
- Consistently maintained high code quality standards and documentation
- Improved team collaboration through effective communication channels
