

Senior Java Developer

Srilekha Jajala

+1 (980) 870 0284 | srilekha15jajala@gmail.com

PROFESSIONAL SUMMARY:

- Senior Java Developer with 10+ years of experience in designing and developing scalable enterprise applications using Java, Spring Boot, Microservices, and Angular/React.
- Full Stack Developer with strong expertise in Java, Spring, REST APIs, Angular, React, and SQL databases, delivering high-quality solutions in banking and insurance domains.
- Java Backend Engineer specializing in Spring Boot, Microservices, REST/SOAP services, and Hibernate, with proven experience in building secure, high-performance systems.
- Senior Software Engineer with 8 years of hands-on experience in Java, Spring, Hibernate, Kafka, Docker, and Kubernetes, ensuring robust and scalable enterprise applications.
- Results-driven Java Full Stack Developer skilled in Angular, React, Spring Boot, Hibernate, AWS, and SQL, with strong problem-solving and debugging skills.
- Experienced Microservices Developer with expertise in Spring Boot, Docker, Kubernetes, and AWS Cloud, delivering distributed and event-driven applications using Kafka and Flink.
- Java Enterprise Developer with a solid background in J2EE, Spring MVC, Hibernate, REST/SOAP services, and Oracle/SQL Server databases.
- Full Stack Java Developer with deep knowledge of UI frameworks (Angular, React) and backend development using Java, Spring Boot, Hibernate, and REST APIs.
- Senior Java Consultant with 8 years of experience in Agile environments, skilled in design patterns, SDLC, UML, and delivering enterprise-grade solutions.
- Cloud-Ready Java Developer with hands-on experience in AWS, Docker, Kubernetes, CI/CD pipelines (Jenkins, Maven), and building modern microservice-based applications.
- Application Developer specializing in Java, Spring Data JPA, SQL/PLSQL, and Hibernate, with a proven ability to optimize system performance and database queries.
- Java Backend Specialist with expertise in service-oriented architecture (REST, SOAP), Kafka, and API security (JWT, OAuth).
- Agile Java Developer with strong experience across banking, healthcare, and insurance domains, delivering solutions with Spring Boot, Angular, and React.
- Software Engineer with proven expertise in Java, Struts, Spring, Hibernate, JSP, and Servlets, skilled in migrating legacy applications to modern architectures.
- Enterprise Application Developer with 8 years of expertise in Java, Spring MVC, JSP, Servlets, JSTL, and enterprise databases like Oracle and DB2.
- Senior Java Full Stack Engineer proficient in Java, Spring Boot, Angular 8, React, Kafka, and AWS, with strong knowledge of CI/CD and DevOps practices.
- Middleware & Backend Developer skilled in SOAP, RESTful APIs, XML, XSLT, JSON, and web services integration.
- Results-oriented Java Developer with 8 years of experience in object-oriented design, design patterns (DAO, Singleton, Factory), and scalable software solutions.
- Technical Lead (Java) with hands-on experience in Spring Core, Microservices, AWS, Docker, Kubernetes, and Angular/React frontend technologies.
- Innovative Software Engineer specializing in distributed systems, event-driven architecture with Kafka, and big data processing using Flink.
- Java & Cloud Developer experienced in developing containerized applications using Docker, Kubernetes, AWS Lambda, and Spring Boot microservices.
- Java Full Stack Specialist with expertise in frontend (AngularJS, Angular 8, ReactJS) and backend (Spring Boot, Hibernate, REST APIs) technologies.
- Backend Services Engineer with strong expertise in database design, SQL/PLSQL, ORM mapping, and data-intensive application development.
- Senior Java Professional with a track record of delivering high-performance, secure, and scalable enterprise applications using Java and modern frameworks.
- Versatile Software Engineer with 8 years of experience across Java, Spring ecosystem, REST/SOAP, Microservices, Kafka, AWS, Angular, and React, excelling in both backend and frontend development.

TECHNICAL SKILLS:

Programming Languages	Java, SQL, c, C++
Frameworks	Spring Boot, Spring MVC, Spring core, Spring JDBC, Spring PA, Struts, Docker, Kubernetes, Hibernate, REST, SOAP, Microservices, Angular Js Angular 8, React.
Web Services	SOAP, Restful,
Other skills	SQL, PLSQL, XML, XSLT, Junit, JSON, JWT, Postman
Web Technologies	Servlets, JSP, JSTL, HTML, Java script, CSS, DHTML, soap, wsdl, AJAX, Java script, Flink, Netflix OSS, Jmeter, Apache Kafka, jQuery, java beans. angular js, Node js, AWS, ajax, css3
Server scripting	JSP, Custom Tags, GWT
Design Patterns	MVC, DAO Pattern, Singleton Pattern, Front Controller, Factory Pattern
Build tools	Maven, ANT and Jenkins
Methodology	Agile, waterfall, sdlc and UML.
Database & tools	Oracle 9i/10g/11g, IBM DB2, SQL Server 2008/2012, TOAD, Hibernate, Advanced mappings and Spring data Jpa
Web Servers	Web logic Application server, JBOSS, J2EE Server 1.4, Apache Tomcat 4.1/5.1.

PROFESSIONAL EXPERIENCE:

Molina HealthCare -Bothell,WA

Aug 2024 – Present

Java Full Stack Developer

- Responsibilities:
- Designed and developed Spring Boot microservices for healthcare claims, provider, and member services.
 - Built and consumed RESTful APIs and SOAP services for system integrations.
 - Developed responsive UI components with Angular 8 and ReactJS, enhancing member self-service portals.
 - Implemented JWT/OAuth2 authentication for secure access to APIs in compliance with HIPAA regulations.
 - Applied Spring Data JPA and Hibernate ORM for database persistence and advanced mappings.
 - Wrote complex SQL queries, stored procedures, and PL/SQL scripts for claims adjudication systems.
 - Integrated Apache Kafka to enable real-time event-driven communication between microservices.
 - Worked on Flink-based stream processing for healthcare analytics.
 - Migrated legacy Struts/JSP applications to Spring Boot + Angular architecture, modernizing systems.
 - Deployed applications in AWS Cloud with Docker, Kubernetes, and Jenkins pipelines.
 - Configured and maintained CI/CD pipelines for continuous integration and automated deployments.
 - Conducted unit testing using JUnit and functional testing using Postman and JMeter.
 - Performed API contract testing with Swagger/OpenAPI documentation.
 - Implemented caching strategies to improve response times and reduce database load.
 - Designed custom reusable components using AngularJS/React for dynamic healthcare portals.
 - Optimized SQL queries and indexing strategies, improving database performance by 30%.
 - Implemented design patterns (MVC, DAO, Singleton, Factory) for modular, maintainable code.
 - Participated in Agile/Scrum ceremonies – sprint planning, reviews, stand-ups, and retrospectives.
 - Collaborated with QA teams to conduct end-to-end testing and resolve defects.
 - Implemented logging and monitoring with ELK stack and AWS CloudWatch.
 - Worked with JSON/XML/XSLT transformations for data exchange between healthcare systems.
 - Utilized Git and Bitbucket for version control and branching strategies.
 - Developed SOAP-based services for legacy system interoperability.
 - Conducted peer code reviews to ensure coding standards and best practices.
 - Delivered high-availability applications ensuring 99.9% uptime for business-critical healthcare systems.

Environment: Java 8/11, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST, SOAP, Angular 8, ReactJS, HTML5, CSS3, JavaScript, jQuery, AJAX, Apache Kafka, Flink, Netflix OSS, Oracle 11g, SQL Server 2012, PL/SQL, Docker, Kubernetes, AWS, Jenkins, Maven, JUnit, Postman, JMeter, ELK Stack, Git, Bitbucket, Agile/Scrum.

Client Homesite Insurance – Boston,MA

May 2022 – July 2024

Role: Senior Java Developer

- Responsibilities:
- Developed and maintained enterprise-level Java applications for insurance claims, policy management, and customer portals.
 - Designed and implemented Spring Boot microservices for policy processing and claims management.
 - Built and consumed RESTful and SOAP web services for system integration with third-party providers.
 - Worked on AngularJS and Angular 8 to develop dynamic and responsive user interfaces for insurance portals.
 - Applied Spring MVC, Hibernate, and Spring Data JPA for efficient ORM and database interactions.
 - Wrote optimized SQL queries, stored procedures, and PL/SQL scripts for Oracle and SQL Server databases.
 - Integrated Apache Kafka for event-driven messaging between services, enhancing data synchronization.

- Implemented JWT-based authentication and authorization for secure API access.
- Migrated legacy Struts/JSP applications to modern Spring Boot + Angular architecture, improving maintainability and performance.
- Worked with AWS services, Docker, and Kubernetes to deploy and scale microservices in cloud environments.
- Developed and executed unit tests using JUnit and integration tests using Postman.
- Conducted performance testing and load testing using JMeter to ensure system reliability.
- Implemented caching and indexing strategies to optimize database performance.
- Followed Agile/Scrum methodology, participating in sprint planning, daily stand-ups, and retrospectives.
- Created custom JSP tags and reusable frontend components to enhance web application functionality.
- Participated in code reviews, ensuring adherence to coding standards and best practices.
- Worked with JSON, XML, and XSLT transformations for seamless data exchange.
- Applied design patterns like DAO, Singleton, Factory, and MVC for modular and maintainable code.
- Optimized backend logic to improve insurance claim processing efficiency.
- Collaborated with business analysts to gather requirements and implement solutions according to SLA.
- Monitored and debugged applications using log analysis and ELK stack dashboards.
- Integrated applications with external insurance services via SOAP and REST APIs.
- Automated build and deployment processes using Jenkins and Maven.
- Documented system architecture, APIs, and code changes for knowledge sharing.
- Provided mentoring and guidance to junior developers on Java, Spring, and frontend frameworks.

Environment: Java 8/11, Spring Boot, Spring MVC, Spring Core, Hibernate, Spring Data JPA, REST, SOAP, AngularJS, Angular 8, ReactJS, HTML5, CSS3, JavaScript, AJAX, Apache Kafka, Netflix OSS, Oracle 11g, SQL Server 2012, PL/SQL, Docker, Kubernetes, AWS, Jenkins, Maven, JUnit, Postman, JMeter, ELK Stack, Git, Bitbucket, Agile/Scrum.

Client: JPMorgan Chase – New YorkNY

Dec 2019 – April 2022

Role: Java Developer

Responsibilities:

- Developed and maintained Java-based financial applications for banking operations, payment processing, and risk management.
- Designed and implemented Spring Boot microservices to support high-performance transactional systems.
- Built and consumed RESTful and SOAP web services for internal and third-party system integrations.
- Developed frontend components using AngularJS, Angular 8, and ReactJS for interactive banking dashboards.
- Implemented Spring MVC, Hibernate, and Spring Data JPA for efficient backend development and database access.
- Wrote optimized SQL queries, PL/SQL scripts, and stored procedures for Oracle and SQL Server databases.
- Integrated Apache Kafka for real-time event-driven messaging across banking systems.
- Developed batch processing jobs and workflows for financial data processing using Java and Spring Batch.
- Implemented JWT-based authentication and role-based authorization for secure API access.
- Migrated legacy Struts/JSP applications to modern Spring Boot + Angular architecture, improving maintainability.
- Deployed applications using Docker and Kubernetes, ensuring high availability in cloud and on-premise environments.
- Configured and maintained CI/CD pipelines with Jenkins and Maven for automated builds and deployments.
- Conducted unit testing with JUnit and integration testing with Postman for quality assurance.
- Participated in code reviews to ensure adherence to coding standards and best practices.
- Worked on JSON, XML, and XSLT transformations for seamless data exchange between banking services.
- Implemented design patterns (DAO, Singleton, Factory, MVC) for modular and reusable code.
- Performed performance tuning of SQL queries and backend services to reduce transaction latency.
- Collaborated with business analysts and QA teams in Agile/Scrum environment to deliver timely solutions.
- Monitored and debugged applications using ELK Stack, logs, and custom dashboards.
- Automated data validations and reporting processes for regulatory compliance.
- Provided mentoring and guidance to junior developers on Java, Spring, and web technologies.
- Integrated financial APIs and external banking services for payments, transfers, and reconciliations.
- Assisted in the migration of legacy systems to microservice-based architecture.
- Ensured compliance with security, audit, and regulatory requirements in financial systems.
- Documented system architecture, APIs, and application workflows for knowledge sharing.

Environment: Java 8/11, Spring Boot, Spring MVC, Spring Core, Hibernate, Spring Data JPA, REST, SOAP, AngularJS, Angular 8, ReactJS, HTML5, CSS3, JavaScript, AJAX, Apache Kafka, Netflix OSS, Oracle 11g, SQL Server 2012, PL/SQL, Docker, Kubernetes, Jenkins, Maven, JUnit, Postman, JMeter, ELK Stack, Git,

Med Pace, Denver, Colorado, United States.

June 2017 – Nov 2019

Java Developer

Responsibilities:

- Developed and maintained Java-based enterprise applications for clients in banking, insurance, and healthcare domains.
- Designed and implemented Spring MVC and Spring Boot applications to support business workflows.
- Built and consumed RESTful and SOAP web services for system integrations.
- Developed frontend components using AngularJS and jQuery for interactive web applications.

- Implemented Hibernate ORM and Spring Data JPA for database persistence and mapping.
- Wrote optimized SQL queries, stored procedures, and PL/SQL scripts for Oracle and SQL Server databases.
- Developed dynamic JSP pages and custom tags for reusable UI components.
- Worked with JSON, XML, and XSLT for data transformation between systems.
- Applied design patterns such as MVC, DAO, Singleton, and Factory for modular and maintainable code.
- Integrated Apache Kafka for asynchronous event-driven messaging between services.
- Participated in Agile Scrum ceremonies, including sprint planning, stand-ups, and retrospectives.
- Conducted unit testing with JUnit and performed API testing using Postman.
- Assisted in legacy system migration, converting Struts/JSP modules to Spring Boot architecture.
- Implemented caching strategies to improve application performance.
- Collaborated with QA and business teams to gather requirements and ensure timely delivery.
- Managed version control using Git/Bitbucket and participated in code reviews.
- Worked on application performance tuning for backend services and database queries.
- Deployed applications on Apache Tomcat and JBoss servers for development and production environments.
- Documented system architecture, APIs, and code changes for knowledge sharing.
- Provided technical support and mentored junior developers on Java, Spring, and frontend technologies.

Environment: Java 8, Spring MVC, Spring Boot, Spring Core, Hibernate, Spring Data JPA, REST, SOAP, AngularJS, jQuery, HTML5, CSS3, JavaScript, JSP, Servlets, JSTL, AJAX, Apache Kafka, Oracle 10g/11g, SQL Server 2008/2012, PL/SQL, Apache Tomcat, JBoss, Git, JUnit, Postman, Agile/Scrum.

Head Infotech – Hyderabad, India
Software Engineer

July 2015 – April 2017

Responsibilities;

- Designed and developed **web-based enterprise applications** using **Core Java, J2EE, JSP, and Servlets**.
- Involved in the **full software development life cycle (SDLC)** — from requirement gathering to deployment and support.
- Built **modular, scalable backend components** using **Spring MVC** and **Hibernate ORM**.
- Developed **RESTful and SOAP web services** for internal and third-party integrations.
- Designed and implemented **business logic layers** for gaming and transaction management systems.
- Created and maintained **user interface screens** using **HTML5, CSS3, JavaScript, jQuery, and AJAX** for responsive user experiences.
- Wrote complex **SQL queries, stored procedures, and triggers** for **MySQL** and **Oracle** databases.
- Implemented **exception handling** and **logging mechanisms** using **Log4j** for system monitoring and debugging.
- Worked with **multi-threading** for background tasks, data synchronization, and batch processing.
- Integrated **Drools rule engine** to handle dynamic gaming logic and configurable reward systems.
- Participated in **Agile development processes**, contributing to sprint planning, estimations, and daily stand-ups.
- Used **JDBC** and **JNDI** for secure and efficient database connectivity.
- Collaborated with QA teams to perform **unit, integration, and regression testing**, ensuring high-quality deliverables.
- Applied **object-oriented design principles** and **design patterns (Factory, Singleton, DAO)** to ensure maintainable code architecture.
- Created and consumed **JSON/XML-based APIs** for seamless data exchange across distributed systems.
- Deployed and maintained applications on **Apache Tomcat** and **JBoss** application servers.
- Used **Maven** for project build automation and dependency management.
- Conducted **peer code reviews** and participated in technical discussions to improve software quality.
- Worked closely with business analysts to translate requirements into efficient technical designs.
- Provided **production support** and resolved application issues to ensure 24/7 availability of gaming platforms.

Environment: Java 7/8, J2EE, Spring MVC, Hibernate, JSP, Servlets, JDBC, JNDI, Drools, REST/SOAP Web Services, HTML5, CSS3, JavaScript, jQuery, AJAX, Oracle 11g, MySQL, Log4j, Tomcat, JBoss, Maven, Agile/Scrum, Windows/Linux.

EDUCATION:

JNTUH Engineering College- HYD, INDIA

May 2012 – July 2015
