

Stephen Kabingue

Miami, FL | (321) 364-3831 | kabinguestephen@gmail.com | <https://www.linkedin.com/in/sdkabingue/>

Skills

- C#, C/C++, JavaScript, TypeScript, VB.NET, Python, HTML, CSS, T-SQL
- ASP.NET, .NET Core, MVC, Web API, Web Forms, Angular, React, Vue.js, Razor, Blazor, WPF, Bootstrap
- Microsoft SQL Server, Azure SQL, MySQL, PostgreSQL, AWS DynamoDB, Azure Cosmos DB, Mongo DB
- Azure: Azure DevOps (ADO), App Services, Storage, Functions, Service Bus, API Gateway, Entra ID, Application Insights, AKS, OpenAI, Cognitive, Key Vault
- AWS: Lambda, Step Functions, S3, EC2, EKS, CloudFormation, CloudWatch
- Terraform, Docker, Kubernetes
- Azure DevOps, GitHub Actions, AWS CodePipeline, Jenkins, GitLab
- XUnit, NUnit, Cypress, Selenium, Postman, SonarQube
- Agile Methodology, Scrum, JIRA, Confluence, Trello

Experience

BAYCARE HEALTH SYSTEM | CLEARWATER, FL
SENIOR SOFTWARE ENGINEER, .NET LEAD

DEC 2022 – DEC 2024

Led the development of a robust **microservices based lab management system** using **C#, .NET Core 6, React, Next.js, SQL Server**, incorporating **Saga**, and **HIPAA**.

- Architected **5 critical microservices** including patient data management, test result processing, and billing by following **DDD (Domain Driven Design)** pattern.
- Refactored **micro frontend architecture** utilizing **React and Next.js**, enhancing rendering performance by 20% through the implementation of **React Hooks** and Memoization techniques.
- Optimized **database operations** by updating **Stored-Procedures** and implementing **advanced indexing, partitioning, and caching strategies** in **SQL Server** and **Redis**, and **Azure Cosmos DB**, resulting in a 30% improvement in query performance under high transaction loads.
- Developed a **real-time lab result processing system** using **Azure Service Bus, Azure Functions**, and **Azure App Service, Azure Cosmos DB**.
- Implemented **Azure Cognitive Services** to **automate data entry** and **result verification** processes, reducing manual effort and enhancing lab efficiency and accuracy.
- Integrated **Azure Entra ID** with **Azure API Gateway** and **Kubernetes Services**, streamlining identity management across 3 microservices and ensuring secure, **role-based access control (RBAC)**.
- Engineered a secure and scalable infrastructure using **Terraform** for provisioning and resource management, including the creation of custom **IAM** roles and policies, and centralized secrets management with **Azure Key Vault**.
- Built **CI/CD** pipelines using **Azure DevOps & Azure Kubernetes Service (AKS)** to automate the build, test, and deployment process for 2 Microservices.
- Configured **performance monitoring** using **Datadog** and **Azure Monitor**, implemented distributed tracing for 3 microservices, identified performance bottlenecks, enhanced **Azure Function** reliability.
- Engaged in **Test Driven Development (TDD)** practices, utilizing **NUnit, xUnit, Jest** and **Mocha**, resulting in a 25% reduction in post-release patches and improved software reliability.

- Conducted **code reviews** and provided **mentorship** to 2 junior developers via code reviews and pair programming, fostering a collaborative environment.

KANDA SOFTWARE | NEWTON, MA
SENIOR SOFTWARE ENGINEER

NOV 2018 – NOV 2022

Led the migration of a legacy **ASP.NET WebForms** physician management platform backend to a modern **ASP.NET Core**-based microservices architecture, leveraging **AWS Lambda** and **Step Functions**.

- Decoupled business logic from infrastructure by leveraging **MediatR** and **Domain-Driven Design (DDD)** principles, resulting in 7 independent microservices with clear separation of concerns, enhanced modularity, and highly maintainable code for complex business domains.
- Built responsive **Single Page Application** using **Angular 13.0** using **Typecript**, **NgRX** and created a **WPF** desktop application to manage report content, generated patient reports from **ASP.NET Razor** views.
- Configured **effective query strategies** with **Entity Framework Core** and **Dapper**, reducing database load by 25% during peak usage.
- Redesigned and migrated API endpoints from **REST** to **GraphQL**, enhancing data querying efficiency, reducing over-fetching, while ensuring compliance with **HIPAA** and other regulatory standards.
- Created a secure and high-performance backend communication for a telemedicine platform using **gRPC**, enabling seamless integration of scheduling systems, video conferencing services, and patient record management.
- Engineered a scalable **API Gateway** and real-time processing architecture for high-volume healthcare transactions, leveraging **.NET**, **Node.js**, **AWS Lambda**, **EKS**, and **RabbitMQ**.
- Transformed legacy **ETL** workflows by adopting **EKS** and **AWS Lambda**, achieving a 70% reduction in infrastructure costs and enhancing reliability for claims and records processing.
- Improved system observability by configuring **AWS CloudWatch**, **Grafana Dashboards**, and **Splunk**, reducing issue resolution times by 40% and enhancing system reliability.

VERIFONE | MIAMI, FL
FULL STACK SOFTWARE ENGINEER

JUN 2014 – OCT 2018

- **Designed and documented RESTful APIs** with well-defined JSON schemas and **implemented API versioning** to support evolving business requirements for ACH transfers, reducing development time by 25%.
- Performed **ASP.NET Web Forms validations** using **.NET Validation Controls** and **Angular 4** for client-side validation, leveraging Telerik controls for interactive data visualization to enhance user experience and ensure data accuracy.
- Architected a **data access layer using ADO.NET** to interact with **Amazon RDS**, crafting optimized **T-SQL** stored procedures to streamline transaction tracking and reporting, reducing operational errors by 20%.
- Automated container orchestration workflows by integrating **Docker Compose** for multi-container applications.
- Executed the **integration and testing** of more than **10 distinct Web Services** coupled with **WCF services**, ensuring accurate transaction handling for ACH transfers validated through **SoapUI**.

Education

B.S. IN COMPUTER SCIENCE | MAY 2014 | TEMPLE UNIVERSITY
