

Steve Baldwin

Full Stack Software Engineer

Full Stack .Net Developer with 5+ years of experience crafting and managing high performance web applications. Possesses a strong command of the backend development cycle, specializing in the .Net framework for robust back-end development. Proven ability to learn quickly and adapt to new technologies. Passionate about building high-quality software and collaborating effectively within a team environment.

WORK EXPERIENCE

Senior Full Stack Software Engineer October 2022 – Present
Logic Vortex

- Led the development and maintenance of web applications using .NET Core and ASP.NET MVC, delivering scalable, high-performance solutions.
- Collaborated with cross-functional teams to design, develop, and implement new features, ensuring alignment with business requirements and user needs.
- Developed and integrated RESTful APIs for seamless communication between client applications and backend services.
- Managed SQL Server databases, designing and optimizing complex queries and stored procedures to enhance data retrieval efficiency.
- Implemented automated unit testing using NUnit and xUnit, resulting in a 30% reduction in production bugs.
- Deployed applications using Azure DevOps, streamlining the CI/CD pipeline and reducing deployment time by 40%.
- Mentored junior developers and conducted regular code reviews to maintain high coding standards and improve team skills.

Full Stack Software Engineer January 2021 –September 2022
Kinship

- Participated in the development of enterprise-level web applications using .NET Framework and ASP.NET Web API.
- Worked closely with frontend developers to create responsive, user-friendly web applications integrated with JavaScript and Angular components.
- Enhanced security by implementing identity and access management with ASP.NET Identity and OAuth.
- Conducted thorough testing with MSTest, ensuring high-quality code and reliable application functionality.
- Maintained comprehensive documentation and provided technical support for end-users, contributing to smoother onboarding and training processes.

Software Engineer March 2019 – December 2020
Kinship

- Developed and deployed .NET applications for various business solutions, focusing on maintainability and scalability.
- Collaborated with project managers to gather requirements and deliver solutions on time.
- Enhanced existing software by troubleshooting issues and implementing bug fixes, reducing support tickets by 15%.
- Contributed to Agile processes, participating in daily stand-ups, sprint planning, and retrospective meetings to ensure alignment and progress.

Education

California State University
Bachelor’s

SKILLS

Backend technologies:
C#, ASP.NET, .NET Core

Frontend Technologies:
JavaScript (React), TypeScript (Angular)

API Development:
RESTful APIs, GraphQL

Databases:
PostgreSQL, MySQL, MariaDB, SQLite, MongoDB, DynamoDB, Redis, SQL Server

Cloud & Devops:
AWS (S3, SNS/SQS), Heroku, GCP
Kubernetes, CI/CD
Pipelines(Jenkins, Docker)

Monitoring:
Datadog, Segment, New Relic

Testing Tools:
NUnit, xUnit, Jest, Mocha, React Testing Library

Project Management:
Agile(Scrum, Kanban), Jira, Trello, Notion, Coda

Version Control:
Git, GitHub, Git Lab

Projects

Trainual
Trainual simplifies employee training with centralized creation,delivery, and monitoring, promoting compliance and skill development.

Crowdbotics
We are on a mission to radically transform the software development lifecycle by unlocking the code you have already built, so you can focus on the code that makes a difference.
