

TEJA KODATI

tejaeswark95@gmail.com | 219-318-9662

Professional Summary

Results-driven **Senior React Developer** with **8+ years** of experience in front-end development, including **5+ years** in senior developer/tech lead roles. Expertise in designing, developing, and optimizing complex web applications using **ReactJS, TypeScript, JavaScript, Redux, and modern front-end frameworks**. Strong understanding of **SPA frameworks, API integrations (REST & GraphQL), performance optimization, and unit testing**. Adept at **leading development teams, mentoring junior developers, and collaborating with cross-functional teams** to deliver high-quality solutions. Passionate about innovation, performance, and usability.

Technical Skills

- **Core Technologies:** ReactJS, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS
- **State Management:** Redux, Advanced Context API, Web Hooks
- **API Integration:** RESTful APIs, GraphQL
- **Testing & Tools:** Jest, React Testing Library, Jasmine, Karma, Storybook
- **Build & Deployment:** Webpack, Azure DevOps, GitHub, AWS
- **Agile & SDLC:** Agile methodologies, CI/CD pipelines, Jira

Education

- Bachelors in Electronics and Communication Engineering from **Vasireddy Venkatadri Institute of Technology** (2012-2016)
 - Masters in Computer Information Technology from **Purdue University** (2018-2019)
-

Professional Experience

Tech Fabric, Arizona

Senior React Developer | 07/2021 - Present

- Designed, developed, and maintained **scalable React applications** with optimized **performance and modular architecture**.
- Led API integrations using **RESTful APIs & GraphQL** for seamless front-end and back-end communication.
- Implemented **Advanced Context API, Redux, Web Hooks, and TypeScript** for state management.
- Spearheaded **performance enhancements**, reducing page load times and optimizing rendering using **code splitting and lazy loading**.
- Conducted **code reviews, mentored junior developers**, and enforced coding best practices.
- Implemented **unit testing with Jest and React Testing Library** to improve application reliability.

- Improved React application performance by optimizing re-renders using **React.memo()**, **useMemo()**, and **useCallback()**.
- Utilized advanced TypeScript features like **Generics**, **Utility Types**, **Interfaces**, and **Enums** for better type safety and reusability.

Delta Airlines, Atlanta, GA

React Developer | 05/2020 - 06/2021

- Developed and optimized **React-based UI components** for the airline's booking system.
- Utilized **Redux & Context API** for seamless data flow across components.
- Integrated REST APIs and **GraphQL** endpoints for real-time data fetching.
- Used **React Router** for client-side routing, enabling seamless navigation between views in SPAs.
- Implemented **conditional rendering** and dynamic component loading to enhance user experience.
- Developed and maintained **custom React hooks** to encapsulate and reuse logic across components.
- Implemented **lazy loading**, **dynamic imports**, and **code splitting** using `React.lazy()` to improve performance.
- Led **React performance optimizations**, reducing **DOM re-renders** and improving application efficiency.
- Implemented **unit testing** with Jest and React Testing Library.

Adroit, Reston, VA

React Developer | 06/2019 - 05/2020

- Built and maintained **React single-page applications (SPA)** with **Next.js & TypeScript**.
- Developed **reusable UI components** following **design patterns & best practices**.
- Enhanced **state management** using **Redux**, **Context API**, and **Web Hooks**.
- Designed and implemented responsive and accessible UIs using **CSS3**, **SCSS**, **Material UI**, and **Styled Components**.
- Developed type-safe React applications using **TypeScript**, ensuring better maintainability and reducing runtime errors.
- Worked closely with backend teams to define API specifications and improve data flow efficiency.
- Developed **Storybook component libraries** to standardize UI development.
- Worked with **Git**, **GitHub** and **Azure DevOps** for version control and collaborative development.
- Used **React DevTools** to analyze and improve app performance.

Creneo IT, Hyderabad, India

UI Developer | 07/2016 - 12/2017

- Created **responsive and dynamic UI components** using React, JavaScript, HTML5, and CSS3.
- Designed and developed **custom React components**, utilizing React Router for seamless navigation.
- Integrated **RESTful APIs** for data handling and managed asynchronous operations efficiently.
- Utilized CSS preprocessors (SASS/SCSS) and CSS frameworks for styling consistency and maintainability.
- Followed best practices for **UI/UX design**, **accessibility**, and **cross-browser compatibility**.
- Reduced JavaScript bundle size by **lazy loading assets**, **images**, and **dynamically importing modules**.
- Integrated **React Router** for client-side navigation, route-based code splitting, and lazy loading.
- Wrote unit and integration tests using **Jest**, **React Testing Library** to ensure application reliability.
- Conducted code reviews and debugging to maintain high code quality and enforce best practices.
