

Tejaswi Singanaboina | Full Stack Java Developer
(334) 294-1437 | tejaswi.dev123@gmail.com | [LinkedIn](#)

SUMMARY

- Experienced Software Engineer with over 4 years of experience in designing SaaS web applications using Java/J2EE and RESTful APIs for performance and scalability.
- Proficient in microservices architecture with Spring Boot, Node.js, and Java 17, Hibernate (ORM), JPA optimizing system scalability and reliability while reducing operational overhead.
- Strong background in front-end technologies such as React.js, Angular, TypeScript, JavaScript, Bootstrap, HTML, CSS and jQuery to build engaging user-friendly UI interfaces with operating systems.
- Skilled in implementing object-oriented programming (OOPs) principles and multithreading techniques to optimize application performance, leveraging REST and SOAP web services within a Service-Oriented Architecture (SOA)
- Implemented efficient Data Structures and Algorithms while following best practices in Software Design Patterns.
- Hands-on experience in cloud development with Azure Kubernetes Service (AKS), AWS, Azure, GCP, Docker for containerization, and Kubernetes, openshift for orchestration.
- Adept at automating CI/CD (continuous integration and deployment) using Azure DevOps, Jenkins, Bitbucket, GitLab, integrating Apache Kafka, Flink, Redis and RabbitMQ for message-driven architecture, reducing deployment time.
- Utilized TDD (Test Driven Development)/BDD methodologies, and unit testing using JUnit, Mockito, Selenium, Postman, TestNG, and Cucumber for test automation.
- Proficient in relational databases (RDBMS), GraphQL and NoSQL databases, including MySQL, PostgreSQL, Oracle10g/11g, MongoDB, and Cassandra, ensuring high performance and scalability.
- Collaboration with Product Owners, Business Analysts, and stakeholders to gather requirements, analyze business needs, and deliver scalable solutions that align with organizational goals.
- Strong Communication and collaboration skills, working with cross-functional teams in Agile Scrum environments to deliver high-quality problem-solving with Software Development Life Cycle (SDLC).

TECHNICAL SKILLS

- **Programming Languages:** Java 8/11+, Python, TypeScript, SQL
- **J2EE Technologies:** Servlets, JSP, JPA, JSTL, JNDI, JMS, JAXB, JDK 17+, XML Parsers, JBoss
- **Frameworks:** Spring Boot, Spring MVC, Spring AOP, Spring Batch, Spring Security, Hibernate (ORM)
- **Web Technologies:** HTML5, CSS, JavaScript, jQuery, Bootstrap, React, Angular 2+, Vue.js, PHP, Node.js, JSON
- **Database Technologies:** MySQL, Oracle (10g/11g), PostgreSQL, PL/SQL, MongoDB, Cassandra, GraphQL, Django
- **Messaging & Streaming:** Apache Kafka, Flink, RabbitMQ
- **Cloud Technologies:** AWS (ECS, Lambda, RDS, S3, API Gateway, terraform), GCP, Azure
- **Observability & Logging:** Datadog, Grafana, Splunk, Open Telemetry
- **Testing & Automation:** JUnit, Mockito, Postman, Cucumber, Selenium, ETL Testing, Apache Tomcat, Tableau
- **Build & Dependency Management:** Maven, Gradle, Jenkins, Kafka
- **Version Control Tools:** Git, GitHub, SVN, Bitbucket, GitLab
- **Development Tools & OS:** IntelliJ IDEA, Eclipse, Spring Tool Suite (STS), Windows, Linux, Unix, swagger, Visual Studio

EXPERIENCE

Software Developer | Blue Cross Blue Shield, Michigan

January 2024 - Present

Responsibilities:

- Designed and optimized RESTful APIs to streamline data transfer, reducing response times by 30% and enhancing overall application performance.
- Architected and developed scalable microservices architecture with Spring Boot, Spring MVC, Node.js, and Java for the back end, enhancing system robustness and improving scalability by 40%.
- Enhanced UI with React, and VueJS for frontend, boosting engagement by 25% and reducing bounce rates by 15%, while standardizing design with reusable React components.
- Developed user interface with React, Redux, and JavaScript ES6+, integrating NPM and Redux components to enhance user experience with distributed system.
- Monitored and optimized system health metrics using Grafana and Apache Kafka for real-time data streaming, reducing downtime by 35%.
- Optimized core functionality with Spring Boot and Hibernate ORM, leveraging JPA for efficient data persistence, transaction management, and security integration.

- Built and managed MongoDB aggregation pipelines for real-time analytics, optimizing SQL queries for Postgres, DB2 and Oracle stored procedures to boost performance by 50%.
- Conducted comprehensive API Gateway testing with Postman, improving test coverage by 40% and reducing API-related defects by 30%.
- Enabled HTTPS with SSL certificates and secured authentication using JWT and Spring OAuth 2.0, strengthening API security and access control with Content Management System.
- Automated application deployment using Azure DevOps and GitLab CI/CD pipelines, optimizing workflows and reducing deployment time by 50%.
- Experience in Server infrastructure development on AWS Cloud, extensive usage of, Elasticsearch, Dynamo DB, S3, Route53, SNS, and SQS and technical documentation with swagger.
- Automated application deployment using Azure DevOps and GitLab CI/CD pipelines and implemented containerized deployments with Docker and Kubernetes.
- Managed high-priority (P1/P2) support tickets, consistently meeting SLA targets for response and resolution times.
- Streamlined development with Maven for dependency management and build automation, ensuring unit testing and integrated testing with JUnit and Selenium reducing production issues by 45%.

Java Developer | RealPage, Inc., Hyderabad, India

July 2020 - May 2023

Responsibilities:

- Led the transition from Spring Framework to Spring Boot, reducing deployment time and boosting productivity by 30%.
- Developed front-end with Angular 8, Angular Material, Bootstrap, HTML5, CSS3, and TypeScript, integrating MVC architecture with Spring Controllers for seamless routing.
- Created TypeScript reusable components and services to consume REST APIs and gRPC using Angular's component-based architecture and Webpack.
- Contributed to the DevOps process to automate the build and deployment using Jenkins, shell scripting, Python, AWS Lambda, and CloudFormation Template, reducing deployment time by 40%.
- Migrated the project to Azure Cloud, using Azure Kubernetes Service (AKS), Azure App Service, and Azure SQL Database to deploy scalable applications, improving performance and reducing operational overhead by 35%.
- Developed an internal application for QA testing, facilitating test data load from multiple files into tables, ensuring edge case handling and exception management in agile methodologies.
- Experienced in debugging, troubleshooting, and code review using logs, monitoring tools, and breakpoints while analyzing user stories to ensure efficient issue resolution and code quality.
- Ensured 80% clean code coverage with JUnit, Cucumber, and Mockito for automated testing use cases with minimal errors.
- Collaborated with cross-functional teams using JIRA to track tasks, manage sprints, and automate test execution, integrating with SonarQube for continuous testing and defect tracking.
- Optimized business logic and code by improving SQL, Cassandra, and PostgreSQL tuning query performance instead of filtering data in the backend.

EDUCATION

Auburn University at Montgomery, AL

June 2023 - December 2024

Master of Computer Science

CGPA:3.82/4.0

Coursework: Object-oriented programming, Python, Operating Systems, Data Structures and Algorithms, Database Management Systems, Machine Learning, Frontend and Backend Development.

Sreyas Institute of Engineering and Technology - Hyderabad, India

July 2018 - July 2022

Bachelor of Technology in Computer Science

Coursework: Computer Architecture, Java, Software Engineering, Computer Networks, Web Technologies, Artificial Intelligence, Software Testing, Cloud Computing, Data Mining, Cryptography and Network Security.

CERTIFICATIONS

- **Full Stack Web Developer** – LinkedIn Learning
- **AWS Cloud Development** – Sreyas Institute
- **Java and Python Programming** – Unique Computers
- **Git and GitHub** – Geekster Academy
- **C Programming** – Integrated Institute of Advanced Studies
- **Machine Learning with Python** – Sreyas Institute
- **Fundamentals of Deep Learning** – NVIDIA
