Professional Summary

A self-driven and skilled **Java Developer** with **18+ years of experience** in **Java 8 and 17**, **Spring Boot**, **Microservices**, and cloud technologies like **AWS**, **Docker**, and **Kubernetes**, with expertise in **backend and full-stack development**, **REST APIs**, **event-driven architectures**, and **database management**, adept at **solving complex technical challenges** and **leading high-performing teams**.

Technical Skills

- **Programming Languages:** Java (8, 17), JavaScript, Python, Node.js, Shell Scripts
 - **Frameworks & Libraries:** Spring Boot, Hibernate, Spring MVC
 - **Web & Microservices:** REST APIs, GraphQL, Microservices Architecture
 - **Databases:** Oracle, SQL, PL/SQL, NoSQL, Redis
 - **Event-Driven Architectures:** Kafka, JMS, DMAAP, IEBUS
 - **Cloud & Containers:** AWS (IAM, EC2, S3, RDS, Lambda), Docker, Kubernetes
 - **Web Technologies:** HTML5, React, JSF, JSP, Servlet, XML, XSD, JSON, Adobe Flex
 - **Application/Web Servers:** WebLogic Server 12, IBM WebSphere, Apache Tomcat
 - **DevOps & Automation:** CI/CD (Jenkins, AT&T Eco Tool), UNIX Shell Scripting, Batch Processing
 - **Configuration Management:** GitHub, Gerrit, Code Cloud, Jfrog
 - **IDE/Build Tools:** Eclipse, IBM Rapid Application Developer, Granite Inventory 16.1, Toad for Oracle, SOAPUI, Maven, Postman, JIRA, PyCharm, Visual Studio, MobaXterm, GitBash
-

Professional Experience

Granite Inventory Management System – [Client AT&T]

(Working on same project from Infosys Ltd. → Ericsson Inc.)

Ericsson Inc. - Lead Software Engineer (Jan 2017 – Present)

Infosys Ltd. - Senior Software Engineer (Feb 2014 – Jan 2017)

Role: Lead Software Engineer | **Technologies:** Java, Spring Boot, Microservices, REST/SOAP, Kubernetes, Docker, Redis, Oracle 12g, JMS, Kafka, Python, Shell Scripting, CICD, Jfrog.

- Developed and maintained Granite Inventory System, a critical **network inventory** platform for AT&T's U-Verse and Mobility services using **EAI API**.
- Led a team in the **analysis, design, and development** of software modules for the **Granite Inventory Management System**.

- Led the **migration of 30+ applications** from Java 1.4 to 8, Oracle 10 to 12g, and WebSphere to WebLogic, improving system performance and efficiency.
- Optimized **Python-based provisioning tools**, reducing processing time from **hours to minutes** for enterprise requests.
- Automated deployments using **CI/CD pipelines (AT&T Eco Tool)** and contributed to performance tuning efforts.
- Designed and developed **RESTful APIs** using **Spring Boot microservices, event-driven architectures** using **Kafka**. Led cross-functional collaboration with interfacing teams to improve system modularity, performance, and scalability.
- Developed RESTful web applications integrated with **JWT authentication and Redis caching**.
- Managed **containerized deployments** with **Docker and Kubernetes** for efficient scaling.
- Enhanced system performance by optimizing **SQL and PL/SQL queries** in Oracle databases.
- Coordinate with cross functional units, Ericsson's Global Service Center and Product Units, as well as Customer, Technical and Business Development teams.

Developer and Team Lead | Infosys Ltd.

Feb 2007 – Jan 2014

Technologies: Java, J2EE, HTML, JSP, JSF, CSS, Servlets, Hibernate, Struts, Spring MVC, SQL, Weblogic Server, Weblogic Workshop, Nuance, Shell script, Oracle 9i and PL/SQL, JMS, ARC GIS server.

MGI-IVR (Mobile Gateway Interface - Interactive Voice Response) – AT&T

- Developed voice and mobile applications enabling **AT&T technicians and supervisors** to troubleshoot DSL issues, close jobs in real-time, and track technician performance.
- Optimized system performance by **migrating applications from WebLogic 8.1 to 10.3** with minimal downtime.
- Enhanced user experience by implementing **UI improvements using JavaScript, JSP, Adobe Flex, and HTML**.

TRACE (Technician Route Analysis & Calculation Engine) – AT&T

- Built a **street network analysis engine** for **route optimization and drive-time calculations** using geospatial mapping.
- Developed full-stack applications with **Struts 2, Hibernate, WebLogic, and Oracle 10g**, ensuring performance and scalability.
- Led **defect prevention, quality assurance, and code reviews**, improving system stability and reducing bug resolution time.

Education

Master's in computer applications from Sri Vasavi College, Erode, India. 2003-2006

Certifications Certified SAFe 5 Practitioner– 2020
