

TOYIN ADEOYE

Dallas Texas (945)-364-0421 toyinadeoye101@gmail.com

PROFESSIONAL SUMMARY

Result -oriented SQL Server DBA with over 8 years of extensive experience in Production support, database architecture design and development, backup and recovery, HADR strategies, performance tuning, patching, migration, data analysis, SQL logins and permissions for On -Prem and Cloud (Azure and AWS) environments. I am proficient in MS SQL Server, AWS, ETL processes using SSIS, SSRS, PowerBI and Tableau, TSQL, and PowerShell. Skilled in Clustering, High Availability and Disaster Recovery, Index Management, Backup and Restore, Migration, and Azure (IaaS and PaaS). Strong analytical skills, a team player with excellent communication skills (verbal and written).

WORK HISTORY

SQL SERVER DATABASE ADMINISTRATOR 06/2020 to CURRENT

Independence Financial | Dallas, TX

- Provision databases and configure appropriate HADR strategy based on the RTO/RPO/SLA
- Configure, troubleshoot, and maintain HADR options – Always On (AG and FCI), Mirroring, Transactional replication, and Log Shipping
- Proficient with SQL Profiler, Extended Events, Query Store, and Activity Monitor to fix performance problems
- Assist in modeling/architecture design of OLTP (databases) and OLAP (Datawarehouse) environments

- Monitor, troubleshoot and improve database performance using maintenance plan, DMVs, Query Store, etc
- Conduct performance tuning due to slowness, high CPU load, blocking, long running query, network latency etc
- Monitor SQL Server performance using Idera, Redgate, and SolarWinds DPA
- Collaborate with cross -functional teams for performance improvement, capacity planning, upgrade, and migration
- Migrate databases from on -prem to Azure PaaS and IaaS
- Set up, monitor, and troubleshoot failures in maintenance tasks (backup, index, statistics update, integrity check)
- Support Integration Services (SSIS), Analysis Services (SSAS) and Reporting Servers (SSRS)
- Perform patching of SQL Servers to leverage the latest cumulative updates from Microsoft
- Perform database refresh for Application Developers to develop and test queries
- Manage data security via Transparent Data Encryption (TDE), dynamic data masking, column -level encryption, logins, and permissions as well as T A security with the principle of least privilege
- Manage several databases and VLDB across multiple data centers
- Design/deploy databases to the Cloud (Azure, AWS)
- Code deployment on Snowflake

DATABASE ADMINISTRATOR 06/2017 to 05/2020

Epsilon | Dallas, TX

- Migrated SQL Server from on -premises to Azure SQL database and AWS
- Monitored daily, weekly, monthly, and quarterly Maintenance Tasks, ensuring that they are successful and resolve any issues when they fail
- (Automating repetitive tasks using power shell)
- Participated in change management processes including deployment of database changes in all environments as requested, followed client change management standards and procedures
- Maintained client documentation including database topology, connection procedures, and special instruction
- Provided database administration, performance tuning support for Markets Business
- Performed database maintenance such as DBCC, Defrag, Index tuning, and monitored error logs to ensure optimum performance
- Maintained server security by assigning logins, server and database roles, and server permissions
- Periodic Patching of Standalone and Cluster instances
- Designed, developed, and administered MS SQL Server 2008 – 2019 database environments
- Monitored SQL health check and identifying issues and fixing them
- Used optimization tools such as SQL Profiler, Dynamic Management Views (DMVs) and Windows Performance Monitor for monitoring and tuning SQL Server performance
- Installed, configured and upgraded SQL Server

EDUCATION

Bachelor of Science | Geography

University of Abuja, Abuja

SKILLS

- RDBMS database design
- TSQL & PowerShell script
- High availability and Disaster recovery (HADR)
- Replication
- Backup and recovery
- SQL login implementation
- Cloud Migration (AWS & Azure)
- Performance Tuning & Optimization
- Project Management
- Data Mapping
- ETL Tools: SSIS
- Database Engine Tuning Advisor
- Query Store
- SQL Profile

CERTIFICATION:

- MS Azure Fundamentals
- Microsoft AZ -500 Microsoft Certified
- Database Administrator (MCDBA) .
