PROFESSIONAL SUMMARY

Versatile Software Engineer with 5+ years of experience designing scalable systems, developing Full Stack AI solutions, and deploying ML models. Proficient in Python, SQL, and AWS, with expertise in microservices, APIs, and workflow automation. Adept at aligning technical solutions with business goals to drive impactful outcomes.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, SQL

Frameworks & Libraries: PyTorch, TensorFlow, Keras, Scikit-learn, Hugging Face, Spring Boot, FastAPI

Big Data & Databases: Apache Kafka, Apache Spark, Hadoop, BigQuery, NoSQL (MongoDB, Neo4J)

Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD, Datadog

Data Engineering & Visualization: ETL, Airflow, Pandas, Matplotlib, Gradle, Maven

EXPERIENCE

AI Engineer Intern

June 2024 – Dec 2024

City Furniture

Florida, USA (Remote)

- Led the development of a Python-based recommendation engine, boosting CVR by 8% through behavior analysis.
- Integrated APIs for "KevinAI" chatbot with RAG, streamlining workflows and enhancing interactions.
- Designed forecasting models to minimize stockouts by 12% using predictive analytics.
- Developed an Overstock feature with recommendation algorithms, driving revenue by targeting surplus inventory.

Skills: Python, Flask, Microservices, REST APIs, Docker, Kubernetes, CI/CD, AWS, LLM

Full Stack AI Developer (Freelance)

Mar 2023 – Mar 2024

DocMedEHR

Florida, USA (Remote)

- Collaborated with cross-functional teams to create a medical chatbot using OpenAI, achieving 90% query resolution accuracy through fine-tuned models.
- Improved document retrieval with RAG, enhancing response quality and efficiency.
- Built end-to-end solutions with Python, Next.js, and React.js, ensuring seamless user experiences.
- Deployed ML models on Azure, achieving 99.9% uptime through optimized monitoring.
- Streamlined diagnostic workflows by collaborating on Python-based AI features.

Skills: Python, LLM, RAG, Azure, Flask, Next.js, React.js, REST APIs, MLOps

Jr. Data Integration Engineer

Sept 2021 – Sept 2022

Kavida.ai

London, UK (Remote)

- Developed RESTful APIs for real-time and batch data integration in supply chains.
- Optimized ETL pipelines, cutting processing time by 3 hours for 1M+ records via SQL query optimization.
- Built MongoDB-based onboarding solutions, improving system reliability and enhancing user acquisition.
- Automated data ingestion using Python web scrapers, leveraging FastAPI to expose real-time insights, improving predictive accuracy by 15%.
- Designed Metabase dashboards for KPI tracking and data-driven decision-making.
- Integrated data workflows using AWS services like Redshift and RDS for large-scale data processing.

Skills: Python, REST APIs, FastAPI, SQL, ETL, MongoDB, Data Engineering, AWS, Data Visualization

Sr. Software Engineer

Jul 2019 – Dec 2021

Capgemini

Pune, India (Onsite)

- Built and integrated a secure payment gateway into McDonald's menu app using Python, enabling seamless transactions and improved user experience.
- Automated 265+ test cases, boosting testing efficiency by 22% with TDD.
- Optimized CI/CD pipelines with Jenkins and Docker, cutting deployment time by 15%.
- Engineered real-time data processing pipelines using AWS services, including Kinesis, Lambda, and API Gateway.
- Applied Agile and Extreme Programming (XP) practices, including paired programming and CI/CD.

Skills: Python, CI/CD, Microservices, REST APIs, Docker, Kubernetes, Jenkins, MLOps

EDUCATION

Yeshiva University

Master of Science in Artificial Intelligence

New York, NY

Sept. 2023 – Dec 2024
