

VAMSHI KRISHNA THALAPANENI

Phone: 414-865-4859 | Email: mail2vamshi98@gmail.com | LinkedIn: linkedin.com/in/vamshi-krishna-9748502b7

PROFESSIONAL SUMMARY:

Results-driven Data & Business Intelligence Professional with 5+ years of experience in Database Development, Data Analytics, BI, ETL, and Performance Optimization. Proficient in SQL Server, Power BI, Tableau, SSIS, and Data Modeling, delivering scalable and efficient data solutions. Skilled in SQL query optimization, dashboard development, and ETL automation to enhance business decision-making. Experienced in cloud data integration with Azure and AWS, ensuring secure and compliant data management. Adept at collaborating with cross-functional teams to design interactive reports and KPI-driven analytics. Passionate about leveraging data-driven insights to optimize business performance.

TECHNICAL SKILLS:

RDBMS/Databases: MS SQL Server 2017/ 2016/2014/2012 /2008 R2, Oracle 13c/12c/11g/10g/9i/8i, TOAD 7.5, MS Access, SQL Server Management Studio, SQL Server Data Tools, Business Intelligence Development Studio (BIDS), Visual Studio, SQL Profiler, Performance Monitor, DTS, Database.**Operating Systems:** MS-DOS, Windows Server 2012/2008/2003/ XP/NT 4.0/98, UNIX, Linux.

BI Tools: Power BI Desktop, Einstein Analytics, SAP Business Objects, Tableau Desktop (2018.1.x/10.x/9.x/8.x), Tableau server (10.x/9.x/8.x), Workday, Reader, Online, Crystal reports, MS Excel, SSRS and Excel Power View

SQL Server Tools: SQL server management Studio, BIDS, SQL server profiler, FTP, TOAD.

Programming languages: Python, R, SQL, Linux, UNIX shell scripting, Java, JSP, HTML, JavaScript, JIRA, T-SQL, PL/SQL, C/C++, XML, HTML, CSS, VisualBasic6, VBScript, Java script, C#, PHP, .NET, VB.NET, ASP.NET.

Methodologies: Software Development Life Cycle, Agile, Waterfall, Data Modeling Logical/ Physical/ Dimensional, MS Project, SQL Profiler, Toad and TFS.

Cloud Services: Microsoft Azure, Confidential Web Services (AWS) and Oracle Enterprise Manager Cloud.

WORK EXPERIENCE:

Albertsons | 09/2024 – Present

Power BI Developer/Data Analyst

Job Description :Developed Power BI dashboards for sales performance, inventory management, and customer behavior analysis, enhancing Albertsons' data-driven decision-making. Automated ETL processes using SSIS, streamlining data integration from multiple retail systems. Optimized SQL queries and database solutions to improve supply chain efficiency and demand forecasting. Collaborated with business analysts, merchandising teams, and finance stakeholders to deliver actionable insights for operational improvements.

Responsibilities :

- Designed and developed Power BI dashboards for sales trends, inventory tracking, and store performance analysis.
- Automated ETL workflows using SSIS, reducing manual data processing and improving data consistency.
- Created DAX calculations and SSAS Tabular Models to generate real-time insights on customer purchasing patterns.
- Integrated multiple data sources, including SQL Server, Oracle, Excel, and Flat Files, ensuring accurate reporting.
- Optimized SQL queries, Stored Procedures, and Indexing to enhance database performance and report generation speed.
- Developed mobile-friendly dashboards, providing store managers and executives with real-time operational data.
- Implemented Power BI performance tuning techniques, enhancing data visualization and report responsiveness.
- Ensured secure data connectivity using On-Premises Data Gateway, integrating Albertsons’ retail data systems with Power BI Cloud.

Key Contributions:

- Developed sales performance and inventory management dashboards, improving Albertsons’ demand forecasting and supply chain efficiency.
- Automated ETL processes with SSIS, significantly reducing data processing time for merchandising and financial reporting.

Environment:

Power BI, SSIS, SSAS, T-SQL, SQL Server, Oracle, MS Excel, On-Premises Data Gateway, DAX, Flat Files, CSV, Azure Cloud.

Bank of America | 05/2023 – 06/2024

Power BI Developer/Data Analyst

Job Description :

Developed Power BI dashboards for financial reporting, risk management, and regulatory compliance, improving data-driven decision-making. Automated ETL processes and integrated data from banking systems, including SQL Server, SAP HANA, and Teradata. Designed predictive analytics models for fraud detection, credit risk analysis, and customer insights. Enhanced regulatory compliance monitoring through AML tracking, KYC processes, and Basel III reporting.

Responsibilities

- Designed and developed interactive Power BI dashboards for financial performance, fraud detection, and compliance tracking.
- Integrated Power BI with SQL Server, SAP HANA, Teradata, and Salesforce, ensuring seamless data extraction and transformation.
- Created DAX measures for key financial KPIs, including Net Interest Margin (NIM) and Loan-to-Deposit Ratio (LDR).
- Implemented machine learning models using Python for credit risk assessment, fraud detection, and customer sentiment analysis.
- Developed automated reporting solutions, reducing manual effort in financial, quarterly, and annual reporting.
- Conducted credit risk and fraud analysis, identifying suspicious transactions and improving compliance strategies.
- Enhanced regulatory reporting with dashboards tracking AML, KYC, and Basel III compliance requirements.
- Designed SharePoint pages to maintain financial policy updates, compliance documentation, and risk assessments.

Key Contributions:

- Developed financial dashboards that improved operational insights and executive decision-making across banking operations.
- Implemented predictive analytics models, enhancing fraud detection and credit risk evaluation strategies.

Environment:Power BI, DAX, Python, SQL Server, SAP HANA, Teradata, Salesforce, Business Objects (BOXI), SharePoint, IBM Lotus Notes, Microsoft Office Suite (Excel, Word, PowerPoint).

VB Solutions (Remote, India) | 05/2019 – 03/2022

SQL Server BI Developer:

Job Description:

Designed and developed ETL workflows using SSIS to consolidate data from multiple sources into a centralized Enterprise Data Warehouse (EDW). Created SSAS cubes and SSRS reports to support analytical reporting and business intelligence. Optimized SQL Server performance for scalable data storage and high-efficiency querying.

Responsibilities (6 Points):

- Developed SSIS ETL packages for extracting, transforming, and loading (ETL) data into SQL Server.
- Designed SSAS cubes using Star and Snowflake schemas for analytical processing and reporting.
- Created interactive SSRS reports with Tablix, Matrix, Drill-down, and Drill-through features.
- Optimized SQL queries, Stored Procedures, Views, and Indexes for enhanced performance.
- Automated cube refresh processes and ETL workflows using SSIS to improve data consistency.
- Ensured data integrity and security, managing access control measures and validation processes.

Key Contributions :

- Developed end-to-end SSIS ETL workflows, streamlining data integration and transformation.
- Designed and optimized SSAS cubes, improving multidimensional analytics and query performance.

Environment:SQL Server 2008/2016, SSIS, SSRS, SSAS, Tableau, MDX, T-SQL, VB Script, OLAP, OLTP, Microsoft PowerPoint.

EDUCATION: Master of Business Administration (MBA) – Information Systems
Concordia University | GPA: 3.74

CERTIFICATIONS:

- **Scrum Master Certification (CSM)**
- **CBDA**
- **Mobile development bootcamp iOS/Android**

KEY STRENGTHS:Strong expertise in Power BI, SQL, and DAX for creating impactful data visualizations and reports. Skilled in ETL processes and cloud platforms like Azure and AWS, ensuring seamless data integration. Proven ability to deliver financial and predictive analytics, enhancing decision-making and regulatory compliance. Effective in cross-functional collaboration and optimizing BI performance for actionable business insights.

"Excellence Award-Winning"

Vamshi revolutionized marketing and cost strategies with Power BI, transforming raw data into actionable insights through advanced DAX calculations for pricing and forecasting. His award-winning approach led to a successful product launch and earned top honors at state and school competitions. Recognized for outstanding execution and innovative strategies, Vamshi’s leadership in business analytics and Power BI sets him apart.

ACADEMIC PROJECTS:

Project Name: History on information security -September -2022

Computer security emerged with the first mainframes, initially focusing on physical security and document classification. Early threats included equipment theft, espionage, and sabotage.

Project Name: February-2023

INFORMATION SYSTEM RECENT TRENDS: DATA MINING AND TOOLS-

With advancing technology, data mining is evolving as businesses leverage AI, ML, and deep learning on cloud-based data lakes. IoT and wearable tech now turn people and objects into continuous data sources.

Project Name: Cross-Platform Analytics Dashboard for Mobile Development. –

March -2023

Project Overview: This project leverages Tableau to analyze and visualize performance metrics across This Power BI project analyzes and visualizes performance metrics across C, C++, Java, iOS, and Android environments. It synthesizes real-time mobile app data, focusing on efficiency, memory usage, and crash reports. Advanced data transformations and DAX calculations optimize insights, enhancing debugging and performance monitoring.
