

Allu Venkata Subbareddy

Java Full Stack Developer

+1 (612) 364 -7596 | vsvenkata45@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Java Developer with 4 years of expertise in Spring Boot, React.js, and Microsoft Azure cloud solutions. Proven success in building RESTful APIs, optimizing database performance 30%+ gains and implementing CI/CD pipelines 50% faster deployments. Specialized in healthcare HIPAA-compliant systems and enterprise HR solutions 40% process automation. Strong advocate for clean code, microservices architecture, and Agile methodologies. Passionate about delivering scalable solutions and mentoring team members.

EXPERIENCE

Full Stack Developer

Elevance Health, Atlanta, GA

June 2024 – Present

- Design, build, and maintain backend services using Spring Boot, Spring MVC, and Spring Data JPA, focusing on REST APIs for internal and external clients.
- Develop reusable backend components in Java 17 with Spring Boot and integrate them with frontend modules to ensure consistent data handling and validation.
- Automated API testing (JUnit/Mockito) and validated React's API integration with Postman/Integration Tests.
- Developed dynamic and responsive front-end features using React.js, integrating with RESTful APIs for seamless real-time data exchange and enhancing user experience across devices.
- Implemented state management using Redux in React.js applications, optimizing performance and ensuring consistent UI behavior in enterprise-scale dashboards.
- Integrate MongoDB with Java/Spring Boot applications using Spring Data MongoDB, ensuring seamless CRUD operations and data consistency.
- Set up and maintained Azure DevOps CI/CD pipelines, automating build and release processes across dev and staging environments.
- Deployed microservices on Azure App Service and Azure Kubernetes Service (AKS), leveraging Azure Key Vault for credential management and Azure Functions for lightweight event-driven tasks.
- Follow Agile (Scrum) practices, participate in daily stand-ups, sprint planning, and bi-weekly demos, and use JIRA for task tracking.

Jr. Software Engineer

COGNIZANT

August 2021-December 2022

- Designed and implemented RESTful APIs with Spring Boot to streamline employee termination workflows, integrating a three-tier approval system for better control.
- Optimized PostgreSQL schemas and queries, boosting data retrieval speed by 30% and ensuring accurate benefit calculations.
- Documented RESTful APIs using Swagger/OpenAPI with Spring Boot, enabling developers and testers to interact with backend services through an interactive UI.
- Built a scalable data persistence layer with Spring Data JPA and Hibernate, improving data integrity and transaction handling.
- Optimized API calls in React by debouncing inputs, lazy-loading data, and implementing React Query for efficient caching/synchronization.
- Developed dynamic and responsive user interfaces using React.js, integrating with REST APIs and enhancing UX with reusable components and state management via Redux.
- Integrated Spring Security with OAuth2 to enable secure authentication and authorization workflows using JWT tokens across microservices.
- Practiced Test-Driven Development (TDD) and Behavior-Driven Development (BDD) using JUnit and Cucumber, ensuring clean, testable code and validating feature behavior through user stories.
- Deployed Spring Boot applications on Azure App Service and managed PostgreSQL databases via Azure Database for PostgreSQL for scalability and availability.
- Configured Azure DevOps CI/CD pipelines using Maven and GitHub for continuous deployment and version control.

- Implemented Apache Kafka producers and consumers for asynchronous communication between microservices, improving system scalability and decoupling.
- Developed custom Kafka message handlers for stream processing and configured topic partitions for high throughput distributed data pipelines.
- Followed Agile (Scrum) methodologies, participating in stand-ups, sprint planning, and retrospectives to meet deadlines.
- Configured Prometheus for metrics collection and integrated Grafana to build real-time monitoring dashboards, improving observability of microservices and Kubernetes clusters.
- Used Docker to containerize applications and deployed them on Kubernetes for easier management and scaling.
- Used Git for version control, enabling efficient team collaboration and code management.

Associate Developer

WebCode IT, Hyderabad – INDIA

January 2020 – July 2021

- Designed and developed backend modules using Java (8/11) with Spring Boot and Spring MVC, implementing RESTful APIs for data management across services.
- Collaborated on frontend enhancements using JavaScript and React.js, integrating components with backend APIs to ensure smooth user interactions.
- Implemented role-based access controls using Spring Security, enhancing the security posture of web applications.
- Wrote SQL queries and managed schema changes in PostgreSQL to support new feature requirements and data reporting.
- Used Git, GitHub Actions, and Jenkins for version control and automated deployments across development and test environments.
- Participated in daily stand-ups, sprint planning, and retrospectives in an Agile Scrum setup, contributing to continuous delivery of incremental updates.
- Built and tested microservices in a Spring Cloud environment, coordinating inter-service communication via REST APIs and messaging queues.
- Debugged and resolved issues across frontend and backend stacks, improving overall application stability and performance.

SKILLS

Project Methodologies: Agile (Scrum), Waterfall, Kanban, SDLC

Programming Languages: Java (Java 8, Java 11, Java 17), SQL, JavaScript/TypeScript

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring Cloud, Hibernate/JPA

Core Frontend: React.js, Redux, Angular.js, NgRx, HTML5, CSS3

RESTful APIs & Microservices: RESTful APIs, microservices architecture, GraphQL

Database Management: SQL databases (MySQL, PostgreSQL) and NoSQL databases (MongoDB)

Cloud Platforms: Microsoft Azure – App Service, AKS, Functions, Key Vault, Storage, DevOps

Build & Testing Tools: Maven, Gradle, JUnit, Mockito, Jenkins, GitHub Actions, GitLab CI/CD

DevOps: CI/CD pipelines, Docker, Kubernetes

EDUCATION

Master Of Science (M.S.) In Data Analytics

January 2023 – May 2024

Concordia University- Saint Paul, Minnesota

Bachelor Of Technology in Computer Science

August 2017 – July 2021

Sir C R Reddy College of Engineering, Andhra Pradesh, India

CERTIFICATIONS

- Spring Certified Professional by VMware – Validated expertise in Spring Framework and Spring Boot
- NPTEL certification of IIT Madras on Python for Data Science.
- Hacker Rank certification on Java.
- Master Spring Boot & Spring Framework (Udemy).
