SKILLS

- **Languages:** JavaScript, Java, Python, TypeScript, SQL
- **Frontend Technologies:** ReactJS, AngularJS, HTML5, CSS3, SCSS, Sass, Bootstrap, Tailwind CSS, jQuery
- **Backend & Databases:** Node.js, Express.js, RESTful APIs, MySQL, PostgreSQL
- **Development Tools & Practices:** GitHub, Version Control, VS Code, Chrome DevTools, Agile, Scrum, Jira, CI/CD, Webpack
- **Testing & Debugging:** Jest, Selenium, Manual Testing, Automation Scripts, Console Debugging, Unit Testing
- **Problem Solving:** Solved 156+ LeetCode problems focused on data structures and algorithms using python
- **Other Skills:** Word, Excel, PowerPoint, Machine Learning, Artificial Intelligence

WORK EXPERIENCE

Community Dreams Foundation | Software Engineer

Dec 2024 - Present

- Developed and deployed over 15 full-stack features using React for the frontend and Node.js with Express for the backend, delivering performant user interfaces and RESTful APIs that powered key product workflows used by 2,000+ active users.
- Designed and optimized database schemas and complex SQL queries in MySQL and PostgreSQL, cutting API response times by 35% and improving query performance across high-traffic endpoints.
- Built secure authentication and authorization modules using JWT and role-based access control, increasing platform reliability and reducing security-related incidents by 40%.
- Automated testing and deployment pipelines by implementing Jest and Supertest with GitHub Actions, achieving 90% test coverage and cutting manual release effort by 60%.
- Partnered with product, QA, and design teams in Agile sprints to deliver end-to-end features from wireframe to production; improved observability with structured logging and error tracking, reducing mean time to recovery (MTTR) by 25%.

Motorola Solutions, Inc. | Web Developer

Mar 2022 - Jun 2023

1 yr 3 mos

- Built and maintained 10+ scalable Angular components for a mission-critical Dispatcher web application, collaborating within a 13-member front-end team to deliver clean, modular code using ES6 and object-oriented principles.
- Diagnosed and resolved 20+ high-impact production bugs, significantly improving application stability and reducing support turn-around time.
- Wrote and optimized complex SQL queries to support business analytics and reporting pipelines, directly influencing data-driven decision-making across internal teams.
- Refactored and maintained 5000+ automated test cases using TypeScript and Selenium in a CI/CD pipeline, ensuring consistent test coverage and minimizing deployment issues.
- Ensured front-end code adhered to WCAG/ADA accessibility standards, enhancing usability and inclusivity for all users, including those with disabilities
- Led manual QA efforts by identifying and documenting over 1000 issues post-deployment, enabling faster iteration and higher release confidence.
- Created comprehensive technical documentation for debugging workflows, feature rollouts, and regression testing, enabling seamless knowledge transfer across teams.
- Recognized with a cash award for completing a high volume of pull requests in a sprint, significantly advancing team objectives through high-quality code and strong contributions

PrepMaestro, Inc. | Frontend Developer

May 2020 - Apr 2021

11 mos

- Led the design, development, and maintenance of a responsive web application for a test-prep platform, collaborating within a lean 3-member team to enhance user experience across desktop and mobile, resulting in improved user engagement
- Actively contributed to sprint planning, user story estimation, and Agile ceremonies, managing deliverables across 10+ weekly sprints and conducting thorough code reviews to maintain clean, scalable code aligned with industry best practices.
- Built and integrated core frontend components using React, JavaScript, HTML5, and SCSS; implemented dynamic UI features, handled form validation, consumed RESTful APIs, and optimized performance for load speed and responsiveness.

PROJECTS

Template Portfolio

Oct 2020 - Dec 2020

- Built a visually engaging, mobile-optimized portfolio site using HTML, CSS (Grid/Flexbox), and JavaScript to demonstrate frontend skills, design sense, and project presentation in a polished multi-page experience.
- Adopted by 100+ graduating students from my university as their personal portfolio, enabling customization and improving presentation through clean UI, intuitive navigation, and mobile-first design.

Vikram's Recipes

Jan 2022 - Mar 2022

- Developed a responsive recipe web app using JavaScript and HTML/CSS that integrated 1000+ cooking recipes via RESTful API, with features for bookmarking, personal recipe submissions, and streamlined browsing.
- Provided a personalized cooking resource for 50+ dormitory residents and hobby chefs, combining simplicity with practical functionality to enhance everyday meal planning.

EDUCATION

University Of Cincinnati

Master of Science, Information Technology (GPA: 4.0)

Aug 2023 - Dec 2024

Cincinnati, OH

KL University

Bachelor Of Technology, Computer Science and Engineering (GPA: 3.4)

Mar 2019 - Apr 2023

Hyderabad, India
