

Chandra Vardhan Singareddy

React Developer

Chandravardhan118@gmail.com | (201) 423-0482 | Jersey City, NJ | [LinkedIn](#)

SUMMARY

Dynamic Front-End Developer with 5+ years of experience in building high-performance web applications. Proficient in HTML5, CSS3, JavaScript (ES6+), Typescript, and frameworks like React, Angular, Ionic and Vue.js. Skilled in developing scalable SPAs using Redux and integrating RESTful APIs. Experienced in full-stack development with Java, Spring Boot, and Hibernate, and databases like PostgreSQL and MySQL. Proficient in cloud platforms such as AWS and Azure, with CI/CD pipelines using Jenkins, Docker, and Kubernetes. Adept at performance optimization, troubleshooting, and collaborating with cross-functional teams using Agile/Scrum methodologies to deliver exceptional user experiences.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, C, C++, C#
Frameworks: React.js, Angular, Ionic, Vue.js, Next.js, Node.js, Express.js
Web Technologies: HTML5, CSS3, Bootstrap, Tailwind CSS, SASS, LESS
UI/UX: Responsive Design, Single Page Applications (SPA), AJAX, JSON, REST APIs, Figma, Adobe XD
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Microservices & APIs: RESTful APIs, GraphQL, Microservices Architecture
Cloud Platforms: AWS (EC2, S3, CloudFront, Lambda), Microsoft Azure
Containerization: Docker, Kubernetes
CI/CD: Jenkins, GitHub Actions, GitLab CI/CD, Travis CI
Version Control: Git, GitHub, GitLab, Bitbucket
Cloud Deployment: AWS Amplify, Vercel, Netlify, Heroku
Testing: Jest, Mocha, Cypress, Selenium, Postman, JUnit
IDEs: Visual Studio Code, WebStorm, Sublime Text, Notepad++
Development Methodologies: Agile (Scrum, Kanban), Test-Driven Development (TDD), DevOps practices
Serverless Architectures: AWS Lambda, Azure Functions
Cloud-Native Solutions: Microservices, Event-Driven Architectures
Security: OAuth2, JWT, API Security Best Practices

WORK EXPERIENCE

Tenet Health, USA | Software Developer

Jun 2024 - Present

- Developed responsive web applications using HTML5, CSS3, Bootstrap, React.js, Node.js and jQuery, enhancing application performance and accessibility across devices.
- Built and maintained single-page applications (SPAs) with React.js, JSX and Node.js integrating RESTful web services to streamline data exchange and server-side logic.
- Created interactive tables with HTML5, CSS3, and SASS to display patient order information with improved data clarity, leveraging Node.js for efficient data processing.
- Resolved cross-browser compatibility issues across multiple browsers using JavaScript and SASS and Node.js to ensure consistent user experience.
- Built reusable React components, including Tree, Slide-View, and Table Grid, to support scalable development.
- Applied advanced React Native techniques, Redux, and Flex to build high-performance mobile applications, increasing customer engagement by 35%, while utilizing Node.js for server-side support.
- Conducted thorough testing of UI components using manual and automated tools like Jasmine and Selenium, ensuring cross-browser compatibility and adherence to quality standards.
- Optimized application performance by identifying and resolving front-end issues using debugging tools like Chrome DevTools, Firebug, and Visual Studio and Node.js debugging resulting in a 30% improvement in load times.
- Developed custom Bootstrap themes and enforced responsive layouts, improving the overall user interface.
- Collaborated with backend teams to integrate RESTful APIs and GraphQL services using Node.js, enhancing data retrieval speed and server-side efficiency.
- Executed unit and integration tests with Jest, Enzyme, and Cypress to ensure application reliability and performance.
- Implemented CI/CD pipelines using GitHub Actions, optimizing the deployment process for both frontend and Node.js backend services and reducing manual efforts by 60%.

- Built and optimized responsive web interfaces using HTML5, CSS3, and JavaScript, incorporating React.js and Angular frameworks to ensure cross-platform functionality and enhance user interaction.
- Applied robust state management techniques with Redux and Context API, streamlining data handling processes and improving application reliability by reducing error occurrences.
- Created modular and reusable UI components using Material-UI and Bootstrap, ensuring design consistency and accelerating development timelines for new features.
- Integrated dynamic data handling through AJAX and JSON, enabling real-time updates and seamless communication between the front end and back end.
- Integrated dynamic data and real-time updates into the front end by collaborating with backend teams to consume RESTful APIs and GraphQL services, improving application responsiveness.
- Performed extensive testing with tools like Jest and Enzyme to validate UI functionality, resulting in high code quality and significantly reduced production-level bugs.
- Enhanced web performance through optimization strategies such as lazy loading, code splitting, and leveraging modern bundlers like Webpack and Babel, leading to faster page rendering.
- Designed accessible and user-friendly interfaces in compliance with WCAG 2.1 guidelines, broadening usability for diverse audiences, including users with disabilities.

EDUCATION

Master in Computer & Information Science | Pace University, NY, USA

Bachelor in Mechanical Engineering | Hindustan University, TN, India
