PROFESSIONAL SUMMARY

Over 5 years of experience as a Full Stack Java Developer with a strong foundation in Java/J2EE technologies and Java concepts. Portfolio includes successful development and deployment of E-Commerce and B2B applications across domains. Expertise extends to web development with JavaScript, and frameworks such as React and Angular. Hands-on experience with containerization technologies like Docker, and serverless computing. Proficient use of configuration management tools such as Jenkins and GitLab CI/CD.

TECHNICAL SKILLS

- Programming Languages: Java 17, Python, Natural, C
- Frameworks and Tools: Spring (MVC, Boot, Cloud, Security, Data, Batch), Hibernate, Struts, Kafka, Node.js, Junit 5, Jasmine, Maven, Gradle, JProfiler, Jenkins, Git, JIRA, GitLab, Postman
- Databases: PostgreSQL, Oracle, MySQL
- Cloud Platforms: AWS, Lambda, SNS, DynamoDB, Secrets Manager, KMS, SQS, S3, EC2, RDS, ElastiCache, AWS Migration Services, AWS Blu Age Tool
- Infrastructure Management: Terraform, CloudFormation
- Containers and Orchestration: Docker, Kubernetes
- Web/Application Servers: Apache Tomcat
- Front End Technologies: HTML5, CSS3, JavaScript, Angular, React
- Web Services: RESTful, APIGEE, Amazon API Gateway
- Monitoring and Logging: Grafana, Prometheus, Log4J
- Development Methodologies: Agile (Scrum, Kanban), Test-Driven Development (TDD), Behavior-Driven Development (BDD), Functional Equivalence Testing
- Development Environments: Eclipse, IntelliJ IDEA, Natural ONE, Visual Studio

CERTIFICATIONS

- **VMware Spring Certified Professional** [Certificate](#)
- **AWS Cloud Practitioner CLF-C02** [Certificate](#)
- **AWS Blu Age L3 Certified** [Certificate](#) 2024

WORK EXPERIENCE

Virtusa, *Senior Software Engineer* | Dallas, Texas July 2024- Present

Project: Amazon

-Building AWS Blu Age Tool framework for seamless mainframe migration, transitioning Natural and COBOL applications to Java.

- Led a **mainframe migration** project, migrating legacy applications written in **Natural** to **Java** using the **AWS Blu Age Tool**, ensuring seamless transitions with minimal disruption.
- Applied **functional equivalence testing** to validate and ensure the functionality of the new Java-based applications mirrored the legacy system's behavior, improving user trust in the migration.
- Collaborated with cross-functional teams to optimize performance, reducing system latency by **70%** through code enhancements and database query tuning on Oracle DB.
- Integrated **SonarQube** and **JaCoCo** into the CI/CD pipeline for code quality assurance, increasing test coverage by **95%** and reducing critical vulnerabilities in the codebase.
- Deployed applications to **AWS EC2** instances, ensuring high availability and security, and utilized **Oracle DB** for efficient data storage and retrieval.
- Mentored junior developers on best practices in **Java 17**, **Spring Boot**, and **performance optimization**, improving the team's overall productivity.
- Developed and optimized modern, dynamic web applications using **Angular 17**, implementing advanced features such as standalone components, signal-based state management, and enhanced TypeScript support to improve performance and maintainability.

Advanced Knowledge Tech, *Java Developer* | Lewisville, Texas

February 2024 – June 2024

- Engineered, tested, and maintained Java code to meet stringent project specifications, ensuring high performance and reliability.
- Orchestrated the transition from a monolithic application to a microservices architecture using **Spring Boot**, **Spring Data**, and **Hibernate ORM**, enhancing scalability and system efficiency.
- Developed User Interface by using **Reactjs**, **Redux** for SPA development.

- Leveraged **React Hooks** to manage state and side-effects, enhancing code readability and scalability.
- Coordinated with **QA** teams and product stakeholders to validate software quality, ensuring adherence to release timelines and standards.
- Diagnosed and rectified critical software issues by conducting in-depth analysis, minimizing disruptions and optimizing application stability.
- Researched and integrated emerging Java technologies and methodologies, driving continuous improvement in development practices.

Red Rock IT Solutions Private Ltd, Full Stack Java Developer | Hyderabad, India

November 2021 - July 2022

Project: New York Police Department

-Maintained a SaaS-based client application designed for requesting medical claims by on-duty NY police officers.

- Led the design, development, and deployment of web applications based on client requirements, ensuring functionality and performance.
- Facilitated team code reviews, improving application performance by 15%, and enforced coding standards using tools like **SonarQube**.
- Utilized **Spring Boot** and **Spring Data JPA** for rapid application development and efficient database interactions with **PostgreSQL**.
- Designed and developed dynamic, role-based dashboards and Advanced search functionality with multi-filter UI, enhancing user experience and data retrieval.
- Automated **CI/CD** pipelines using **Jenkins** and implemented **Test-Driven Development (TDD)** for reliable and robust code.
- Integrated **Admin** modules and implemented features to improve workflow efficiency, including data feed automation and seamless system management.
- Built custom modules in **Angular 11**, extending core functionality and ensuring seamless operation.
- Developed a feature to visualize spatial trends using **ArcGIS**, providing valuable insights into accident locations and claims data.
- Created an efficient system to retrieve 20-year-old legacy data using **PostgreSQL** stored procedures and schema optimization.

Red Rock IT Solutions Private Ltd, Java Backend Developer | Hyderabad, India

June 2018 – October 2021

Project: New York Fire Department

-A SaaS-based project involving developing and maintaining the client's Vendor Management Application.

- Implemented **RESTful** web services using **Spring MVC**, **Hibernate ORM**, and **Oracle** database for efficient communication and secure data storage.
- Developed and optimized **PL/SQL** and **SQL** queries, enhancing database performance and ensuring integrity in financial transactions.
- Leveraged **Test-Driven Development (TDD)** methodologies and created automated testing scripts using **JUnit** and **Mockito** for improved testing coverage and reliability.
- Debugged and resolved production issues promptly, reducing downtime and ensuring smooth system operations.
- Designed and implemented features to automate data updates, reducing manual effort by ~**2 hours** daily and improving operational efficiency.
- Developed **Java** utilities to convert text documents into PDF and Excel, streamlining client reporting processes.
- Utilized **AWS S3** for secure storage of generated documents, enabling seamless vendor communication and data access.
- Built role-specific admin modules and enhanced UI functionality using **Angular**, achieving a 34% increase in positive user reviews.
- Collaborated on the full software development lifecycle, contributing to coding, testing, and debugging phases to ensure project success.
- Managed source code versioning and tracking using **Git** and **JIRA**, fostering transparent and efficient collaboration.
- Participated in structured training and utilized **Agile** methodologies, improving development strategies and delivery timelines.

EDUCATION

University of Dayton, Master of Science in Computer Science | Dayton, Ohio

December 2023

ACE Engineering College, Bachelor of Technology in Computer Science & Engineering | Hyderabad, India

June 2019
