

Summary

Software Developer with around 3 years of hands-on experience in designing, developing, and deploying scalable web applications using Python (Django, Flask), Java (Spring Boot), React, HTML, and CSS. Proficient in building robust APIs, optimizing backend services, and integrating microservices. Skilled in cloud platforms such as AWS (Lambda, S3, EC2, RDS), Docker containerization for streamlined deployments, and Kafka for high-throughput messaging systems. Adept at collaborating with cross-functional teams, implementing structured code review processes, and achieving high test coverage through rigorous unit testing. Committed to delivering high-performance, cost-efficient solutions by combining technical expertise with strong problem-solving abilities.

Experience

Software Developer

May 2024 - Present*AdventHealth**Remote, USA*

- Engineered a scalable real-time data processing system using Java and Spring Boot for a web application, implementing solutions like real-time user activity tracking and analytics for personalized content delivery to over 10,000 concurrent users.
- Leveraged Docker to containerize microservices for consistent development and deployment environments and orchestrated these services using Kubernetes, ensuring high availability, scalability, and fault tolerance.
- Collaborated extensively with senior engineers to integrate frontend and backend systems, creating tailored REST API endpoints specifically for a React and JavaScript-based UI and Spring Boot backend.
- Set up structured code review practices within Git, incorporating pull request templates and peer review protocols. Conducted unit and integration testing using JUnit and Mockito, achieving 76% test coverage and reducing bugs by 43%.
- Utilized CI/CD pipelines to automate deployments, ensuring consistent and reliable software delivery automating deployments, and reducing deployment times by 50%.
- Built software using a microservices architecture and designed distributed messaging systems using Kafka, enabling efficient communication between microservices and improving processing speed by 45%.

Software Developer

Sept 2023 – May 2024*Labster**Plymouth, MN*

- Developed critical platform components in Python, optimizing large-scale data handling by streamlining processing pipelines with efficient algorithms, and enhancing system performance.
- Collaborated with the UX team and developed front-end components using React and Next.js. Reduced page load times by 40% through code splitting and server-side rendering, increasing user engagement by 59%.
- Migrated storage solutions from on-premises to AWS S3, enabling scalable and secure storage for high-traffic, data-intensive applications, reducing storage costs by 20% and improving data accessibility.
- Achieved 85% code coverage and reduced bugs by 40% by implementing rigorous testing with Jest, ensuring reliability and attention to detail across core features.

Associate Software Developer

Jun 2020 - Dec 2021*Sonata Software**Hyderabad, India*

- Developed Python REST APIs (Django), optimizing AWS S3 storage policies to increase data retrieval ability by 80%.
- Active participant in Agile ceremonies, contributing to sprint planning, daily standups, and retrospective sessions for effective project management. Maintained a strong GIT presence, ensuring collaborative version control for the development team.
- Automated data migration pipelines from relational databases to AWS S3, reducing manual effort by 60% and improving data accuracy in storage workflows.

Student Intern

Jun 2019 – Jul 2019*Ennoble Technologies**Hyderabad, India*

- Designed a user-interactive e-commerce web application using Java SE/EE and Spring, reinforcing Java modules for data storage while implementing security measures against XSS and brute force attacks.
- Executed Firewall deployment to prevent data breaches and utilized CI/CD tools to streamline development, achieving a 72% improvement in operational efficiency by optimizing application performance and deployment pipelines.

Skills

Programming Languages: Python (Pandas, NumPy, TensorFlow), Java, C, JavaScript, HTML/CSS, SQL**Frameworks & Libraries:** React, Node.js, Django, Scikit-learn, Flask, Spring Boot, Jest, pytest, Apache Spark**Databases:** PostgreSQL, MySQL, SQL Server**Tools:** Git, Visual Studio Code, IntelliJ IDEA, Jupyter Notebook, Apache Maven, Wireshark, Datadog**Certifications:** Microsoft Azure Administrator(AZ-104), Java SE 8 programmer(1Z0-808)**Research Paper:** [IEEE Xplore 2021](#)

Education

University at Buffalo*Master's in Computer Science***Jan 2022 – Aug 2023***Buffalo, NY***Jawaharlal Nehru Technological University, Hyderabad***Bachelor's in Computer Science***Aug 2017 – May 2021***Hyderabad, India*
