

Shiva Krishna Reddy Kotha

+1 813-297-9940

shivakkotha@gmail.com

Professional Summary:

- Around **11+** Years of IT experience with exceptional skills in Analysis, Design, and Development of high scalable Multi-tiered Web Applications, Distributed Applications, and API Services using Microsoft Technologies in Finance, Insurance, Banking, Telecom, e-commerce, and Healthcare domains.
- Experienced in writing code and debugging, DevOps skills with ASP.NET, MVC, CORE, SQL, WCF, C#, Web services, RESTful API, Azure, AWS and Test-Driven Development (TDD).
- Expertise in developing applications using Microsoft technologies such as .NET 5.0/ .NET CORE / .NET Framework 4.7/ 4.0/3.5, Web applications using ASP.NET, ASP.NET CORE 3.1, Angular UI, Node JS, cloud computing, Win Forms using Microsoft Visual C#.NET and VB.NET, Python, MS Access, VBA Database access using ADO.NET and distributed applications using XML Web Services, ODP.NET and SharePoint 2013.
- Problem-solving, decision making, and analytical skills knowledge in PWA, IOS, and/or Android mobile Application, GitHub.
- Proficiency in SDLC methodologies and development processes such as requirement gathering, analysis, and definition, JCL, prototyping, proof of concept, designing, and implementation.
- Extensive experience in web-based page and site designs using HTML, XHTML, DHTML, CSS, Themes, Master Pages, Site Map, JavaScript, Type script, jQuery, and AJAX.
- Experience in Responsive web design developing and consuming HTML5, XML Web Services using WSDL and SOAP, REST, DocuSign API, Google API.
- Proficient in node software development, Responsive Web Framework, Entity Framework /LINQ, and dependency injection and utilizing the significant relational database.
- Effectively used MSMQ for asynchronous communication between .NET applications, allowing for component decoupling and enhanced failure of tolerance.
- Hands on Experience on the Azure Cloud Components and GCP Components and PCF.
- Experience in creating and supporting custom reports from the VSS/TFS data warehouse.
- Experience with Data Accessing, including using Data adapters, Data readers, and Dataset in ADO.NET and Language Integrated Query (LINQ) providers for data manipulation.
- Experience in developing stored procedures, triggers, packages using SQL, PL/SQL, and T-SQL in relational databases such as Oracle 10/11g and MySQL, MS SQL Server 2008/2012 R2 /2014/2016 enterprise server, ER/Studio tool.
- Experience in Object-Oriented Analysis and Design methodology with strong knowledge and experience with Design Patterns including Structural, Creational, and Behavioral Patterns.
- Experience in Agile Software Development methodologies and Test-Driven Development, developing Use Cases, Sequence Diagrams, and Class Diagrams in UML.

Skills:

Languages:	C#.Net, VB.Net, Visual Basic, Java, COBOL
Web Technology:	ASP.NET Core, HTML, HTML5 XML, XHTML, DHTML, ASP.Net MVC, WPF, WCF, Ajax, JSON, CSS, CSS3, XPATH, XSLT, UML, SOAP, SOA, IIS6/7, Angular 2/4/8/9/10/11/12 Visio, Cloud computing, Entity Framework
Web Services:	WCF, RESTful, SOAP/WSDL
Scripts:	Bootstrap, Vue.js, AngularJS, ReactJS, RxJs, NgRx, JavaScript, jQuery, Jasmine, Visual Basic, Kendo UI, Backbone JS
Database:	Oracle 9i/11g/12c, SQL Server 2008-2019, DB2, ER/Studio, T-SQL, MongoDB, OLEDB, ODBC, PostgreSQL
Testing framework:	NUnit, Visual Studio Unit Test Generator
Reporting Tools:	Crystal Reports, SSRS reports
Versioning Tools:	Team Foundation Server (TFS), SVN, Visual Source Safe (VSS), GitHub
Third-Party Tools:	Telerik, Infragistics controls, Google Web Toolkit

ETL Tools:	Microsoft SSIS
Frameworks:	Microsoft.Net Framework 1.0-4.8, Core
Operating Systems:	XP/Vista/Windows7/8/ Windows 10/MacOS
IDE:	Visual Studio 2008/2010/2012/2013/2015/2019
Cloud Technologies	AWS, Azure.

Professional Experience:

Client: Oaktree Capital Management Los Angeles, CA

Nov 2021 – till now

Role: Senior full stack .NET Developer

Responsibilities:

- Involved in Requirement Analysis, design, and development of Web application.
- Designed and developed web application using Angular, ASP.NET MVC and Entity Framework.
- Used MVC architectural pattern for developing views, controllers and models using ASP.NET MVC 5, Razor, Data Access layer as Entity Framework, Service layer as ASP.NET Web API and used C#.NET for construction of business logic for developing various abstract classes, interfaces.
- Created user interfaces using **HTML5, CSS3, Bootstrap, JavaScript, AJAX and Angular.**
- Created different business classes and interfaces using .NET Framework 4.5 with Object Oriented Programming Methodology.
- Developed various Data Service classes to connect and manipulate data using ADO.NET, and VB.Net, and using Dependency Injection (Setter Injection) in exceptional cases
- Staying updated with the latest advancements in Vue.js, ASP.NET Core, and related technologies, and continuously improving your skills as a .NET developer.
- Implemented business logic using MVC Action Filters like MVC Authorization filters, action filters and exception filters.
- Proficient in data mapping techniques, including source-to-target mapping, entity-relationship mapping, and schema mapping.
- Performed validations on Web Forms using .Net Validation Controls and Client-Side Validation using Angular 10.
- Designed, developed, and maintained packages in SSIS, SSAS, SSRS to automate data integration processes.
- Integrated Docker into CI/CD pipelines, automating the building and deployment of Docker images as part of the software development process.
- Deployed Docker containers in various environments, including development, testing, and production, using Docker Swarm or Kubernetes
- Implemented unit testing, integration testing, and end-to-end testing for microservices to ensure functionality and reliability.
- Core programming using Angular 8. REST/WEBAPI, C#. AWS. Net Core etc.
- Developed and assisted in migration of web application to Angular 10
- Used CI/CD tools Jenkins, Git/GitLab, Jira and Docker registry/daemon for configuration management and automation using Ansible
- Implemented autocomplete textbox functionality in MVC. jQuery validation and MVC unobtrusive validation were used to validate form fields, used custom error pages when needed.
- Implemented the MVC architecture and utilized Node.js for bundling to enhance application performance.
- Implemented reactive programming paradigms using RxJS within the Angular application, enhancing data flow and interactivity by managing asynchronous operations efficiently.
- Employed observables and operators to handle real-time events, ensuring a responsive and dynamic user experience.
Improved the performance of an ASP.NET MVC application by taking advantage of the output cache.
- Designed dynamic and browser compatible pages using JavaScript and Angular.
- Designed and Developed AWS Lambda APIs using Net Core.
- Designed and implemented event streaming patterns using Apache Kafka for seamless integration between disparate components in a distributed system.
- Apply to change on crystal reports in asp.net and verify neighbourhood data, Implements dynamic components UI, typescript services angular use internal data tool applications.
- Programming application using Net Core and AWS lambda API

- Developed Dynamics UI design pages, style, fields, controlled by user admits, implemented angular react forms, worked on the creating different screen using ExtJS.
- Demonstrated ability to automate testing process using Karma and Jasmine, ensuring reliable and repeatable test execution.
- Added new functionality and security on WEB API and test API with postman external, swagger UI for internal.
- End to end Manual test from backend SQL to UI design and API and handle application service exception.

Environment: .NET 5, ASP.NET 4.5,.Net Core 3.0, MVC 5, Net Framework, Docker, Kubernetes, Microservices, SSAS, SSIS, SSRS, ETL, RabbitMQ, Angular JS 13, Windows 10, CID, PWA, AWS,DEV Apps, JIRA, Jenkins, User Controls, Visual Studio 2017, GITLAB, TFS, ER/Studio, Data Modeling, ODP.NET, VB6, SharePoint 2013, VB.Net, Web Forms, JSON, Web API, AJAX, Bootstrap, SQL, Cosmos DB, PostgreSQL, MS SQL 2016 R2 enterprise server, swagger, XML, Active Directory, C# 10.0, SOA, IIS 8.0, JQUERY and CSS, HTML5, SOAP, LINQ, JavaScript, HTML

Client: Citi Bank, NYC, New York

April 2019 – Oct 2021

Role: Senior .NET Developer

Responsibilities:

- Developed dynamics UI design App, PWA (Progressive web apps) using ASP.NET 4.5, .NET CORE 5. /3.1 with external JavaScript files like Angular, React JS, d3.js, topojson.js, prism.js.
- Creating ASP.Net ASCX, HTML, JSON, Angular Typescript functions design custom controls, MVC Razor custom views, service, Scope, Business model and associated control templates and integrating and customizing (styles) 3rd party control using bootstrap CSS.
- Developed Dynamics UI design pages, style, fields, controlled by user admits, implemented angular react forms, worked on the creating different screen using Ext Js.
- Suggested and Implemented CI/CD for the complete application stack in Amazon Web Services (AWS) using GitHub. EC2. S3 Bucket, Code Build, Code Deploy, Code Pipeline.
- Developed reusable Ext JS components Such as Viewport, Panel, and Grids etc.
- GUI was developed using JQUERY with JavaScript, JSON, CSS, XAML, and ASP.NET MVC, APIs, Google API.
- Experience working with Node.js to setup Web API's using JavaScript.
- Designed end-to-end CI/CD Pipeline for a web application - API and ETL using AWS-Code Pipeline.
- Implement JSON functionality and transform JSON data to DOM UI with responsive bootstrap design.
- Design database tables, views, constraints, and stored procedures on SSMS 2018 tool in SQL server 2018.
- Add new functionality and security on WEB API and test API with postman external, swagger UI for internal.
- Extensive experience in designing, developing, and maintaining RESTful APIs in .NET, enabling seamless communication between client applications and server resources from the external interface.
- Developed and integrated dynamic user interfaces using Vue.js within .NET Core applications, resulting in enhanced user experiences, and streamlined data interaction.
- Responsible for installation & configuration of Jenkins to support various and Jenkins plugins to automate continuous builds and publishing Docker images to the Nexus repository
- Used Microservice architecture, based services interacting through a combination of REST and leveraging AWS to build, test, and deploy Identity Microservices.
- Implemented server caching techniques, state management, windows, and Forms Authentication in ASP.NET Responsive Design.
- Experience in XML, Web Services, using SOAP, RESTful web services and Messaging standards like Apache Kafka, RabbitMQ and ActiveMQ
- Developed custom controls for Windows Forms and generating reports.
- Involved in the development of SOAP-based XML Web Services like Financial account management and Purchase Orders which form the business logic components of the system.

Environment: Windows 10, CID, PWA, DEV Apps, JIRA, Jenkins, .NET 5, ASP.NET 4.5, Angular, User Controls, Visual Studio 2017, GITLAB, TFS, .Net Framework, MVC 5, ER/Studio, Data Modeling, ODP.NET, VB6, SharePoint 2013,AWS, Web Forms, JSON, Web API, AJAX, Angular.JS, Bootstrap, SQL, Cosmos DB, PostgreSQL, MS SQL 2016 R2 enterprise server, swagger, XML, Active

Client: Elevance Health, Indianapolis, IN.

Feb 2017 – Apr 2019

Role: Senior .NET Developer

Responsibilities:

- Used AGILE SCRUM methodology to deliver in sprints and Status Meetings and Code Review Meetings.

- Implemented UI using HTML5, CSS3, JavaScript, AngularJS, Angular2, AJAX, Bootstrap to create responsive web pages and developed user-friendly layouts.
- Angular Modules are created to keep all the related components of an application together.
- To transfer the application data between models and views Data Binding is used with the help of different in-built Directives.
- Bundling and minification for all HTML, JavaScript, CSS and Image assets was implemented through Gulp tasks and executed as NPM/Node commands.
- The project was about building internal departmentally used application for both web and mobile platforms with .NET Core MVC, Web API, and Angular frameworks as the foundation.
- Required development experience with Net 4.6.2 and above, C#. Web API, Angular 7. Bootstrap, CSS, HTML5, SQL Server 2016 (and above). Created Re-useable components, Custom Modules, Custom Directives. Pipes. Services in Angular 8.
- Implemented AngularJS services that were injected into the application controllers to run HTTP calls to the backend Web API endpoints and return the JSON data to the controllers and views.
- JWT Token authentication through Web API was used as the identity and access token method to provide the Angular application access to the backend Web API endpoints.
- Designed and created the backend SQL Server databases, models, and relationships through a Code First approach within Entity Framework.
- Getting requirements and design, data test from the external team and internal team on Cosmos DB and PostgreSQL access Azure API Management portal use updated Azure APP Service and test azure Active Directory groups security levels.
- Working on Azure DevOps, CI/CD Build and Release Pipelines and Deployment in AWS cloud.
- Worked on complete SSIS life cycles including creating SSIS packages, building, and executing the packages in multiple environments: development and production.
- Performed T-SQL tuning and optimization of queries for reports that take longer execution time using SQL Query Analyzer in MS SQL Server.
- Created a RESTful Web API service using ASP.NET Web API to generate data for the EMS which was then consumed in the front-end by Angular 7.
- Designed and developed Extraction, Transformation, and Load (ETL) scripts utilizing T-SQL and provided solutions to critical issues by enhancing performance of the ETL processes.
- Getting requirements and design, data test from the external team and internal team on Cosmos DB and PostgreSQL access Azure API Management portal use updated Azure APP Service and test azure Active Directory groups security levels.
- Developed powerful Single Page Application and dynamic responsive Web Application with Angular 8.
- Created complex Stored Procedures, Triggers, Views, and queries that combined multiple models and complex relationships within good execution plans to meet transactional and reporting data needs.
- Implemented SQL Server Reporting Services (SSRS) reports within the environment to meet data reporting needs.
- Implemented Unit Testing, Integration Testing and System Testing using NUNIT.

Environment: Visual Studio 2012, Visual Studio Code, .NET Version 4.5, Entity Framework, Azure App Service, Azure Functions, Azure API Management, ASP.NET Web API, C#, CSS3, HTML5, Twitter Bootstrap, JavaScript, jQuery, Angular JS, Angular 4/6/8, AJAX, SQL Server 2012, T-SQL, Gulp, NUnit, SSRS, SSIS, SSMS, JWT, IIS, VSTS.

Genpact , India

July 2014 – Dec 2016

Role: .NET Developer

Responsibilities:

- Followed Agile SCRUM Developmental approach to deliver product releases by SPRINT processes in an iterative and incremental approach (SCRUM).
- Used HTML, JavaScript, and CSS throughout the application to add content rich and interactive web pages.
- Used JSON/AJAX and Custom HTML Helper Classes to implement asynchronous calls to the server for updates.
- Implemented MVC Architecture on client side and creating Models, Controllers, and Views Scope using the ASP.NET MVC framework.
- Using Angular technologies in conjunction with .NET Core, Rest Web API.
- involved in designing and coding in C# of the Settlement operation for ERTM release of GCP. This was quite of a challenge as this was the first time such an operation was being written in WCF. previously which used to happen through batch.
- Rewritten the Reporting application from GWT to Angular5.
- Paging, filtering, sorting, and searching on the data in table was done through Telerik Grid component for a consistent look and advanced data display functionality within the application.

- Added new functionality to existing tools and web solutions using ASP.NET MVC, Razor and Entity Framework.
- Implemented communication mechanisms between View to Controller using View Bag, Temp Data and Action Results and Controller to View using Model Binder, Http Request Collection and State Models.
- Used LINQ to Entities extensively to query and filter the models to be displayed on view.
- Developed scripts using PySpark to push the data from GCP to the third-party vendors using their API framework.
- Responsible for creating efficient design and developing User Interaction screens using HTML, CSS3, Bootstrap, JavaScript, Angular 6 and Node JS
- Implemented WCF Services with various contracts like Service Contracts, Operation Contracts, Data Contracts, Message Contracts and Fault Contracts.
- Developed CRUD functionality in ASP.NET MVC with the help of Entity Framework Code First and Database First approaches.
- Designed and developed different database objects containing functions, triggers, store procedures with T-SQL to manipulate the database of the application.
- Performed daily tasks including backup and restore by using SQL Server 2012 tools like SQL Server Management Studio, SQL Profiler, SQL Server Agent, and Database Engine Tuning Advisor.
- Enhanced application performance by Angular 6 Component based development in view of future Angular framework transitions.
- Utilized Team Foundation Server (TFS) for version control during development and maintenance.

Environment: Visual Studio, .NET 4.0/3.5, C# 4.0, ASP.NET 5.0/4.0, MVC, EF, WCF, HTML, CSS, JavaScript, AJAX, JSON, SQL Server 2012, SSMS, SQL Profiler, SQL Server Agent, LINQ, T-SQL, Telerik, NUnit, IIS, TFS.

Cipla, India

Nov 2013 - June 2014

Role: .NET Developer

Responsibilities:

- Development of web-based N-Tier application developed using Toad Oracle 11g as Data Repository Tier, WCF Services and ODP.NET, Data Services (Data Access Layer) as Business Service Tier and ASP.NET as Presentation Tier and using the functional specification, with another DB interface using JDBC.
- Designed, developed, and customized several web pages using HTML4.0/HTML4.1/HTML5, DHTML, CSS3 and XSLT, Ajax, API calls, VB.NET, C#.NET, ASP.Net 4.0, Java Script and React JS with Responsive Design.
- Involved in development of UI using HTML, CSS and Angular5
- Designed and developed the complete system development life cycle like system analysis, design, development, and implementation of the architecture. Involved in status reports, design changes, meetings, and user's approval.
- Developed various Data Service classes to connect and manipulate data using ADO.NET, and VB.Net, and using Dependency Injection (Setter Injection) in exceptional cases.
- Developed API and exposed it using spring-based REST web services and consumed/integrated it in the front-end technologies like GWT and Angular5
- Experience in working with product teams to create various store level metrics and supporting data pipelines written in GCP's
- Developed the Data Access Layer (model) using Entity framework 6 in ASP.NET/MVC web application.
- Worked on creating tables, views, triggers, sequences, constraints, Stored Procedures, Functions, and Packages using Toad Oracle, SQL, and PL/SQL based on the documented user requirements.
- Extensively used Test Director to record the bug reports, Manage IIS Application Pool, and properties.
- Created batch to import the payroll data, and perform the payroll calculations, and scheduled the nightly batch jobs.
- Implemented source control and version control using CVS, create branches in TFS.

Environment: VB.NET, C#, ASP.NET MVC, VB.NET, WCF Services, HTML, CSS, JavaScript, JQUERY, JSON, MVVM, AJAX, ADO.NET, React JS, XML, ODP.NET, DML, Team Foundation Server (TFS) 2010, scrum methodology, VS 2010, UML, IIS 6.0, Active Directory, VBA, SOA Web Service, Crystal Reports, XSLT, Toad Oracle 11g, JDBC, PL/SQL, Windows Server 2007.Sep.

Education Details:

- Bachelor's in computer science – Jawaharlal Nehru Technological University (2013)
