PROFESSIONAL SUMMARY: Product Manager with 7+ years in banking and financial services, instant payments, and Agile. Experienced in product lifecycle management, stakeholder collaboration, and data-driven optimization of payment operations.

PROFESSIONAL EXPERIENCE

Product Manager, Capgemini

December 2021 - July 2023

- Developed product roadmaps in collaboration with stakeholders for the annual SWIFT and ISO20022 payment workflows updates, enhancing global transaction processing and ensuring compliance with evolving financial regulations.
- Led a 5-member cross-functional team, aligning technical and business teams to enhance PDLC efficiency by 25% through improved risk management and fostering strong teamwork, ensuring continuous product delivery.
- Designed and integrated RESTful APIs processing over 1M banking transactions, ensuring seamless communication between SWIFT/ACH payment systems and core banking applications.
- Spearheaded B2B portal migration, leveraging A/B testing and user feedback to enhance UX, achieving a 98% CSAT score.
- Led 30+ ad-hoc cross-platform activities, managing change requests and providing quick ServiceNow solutions to urgent issues across multiple environments, maintaining 95% sprint progress and ensuring minimal disruption to ongoing projects.
- Enhanced Agile sprint planning and backlog management, prioritizing features based on business impact and user needs, resulting in an 11% improvement in product delivery.

Technical Project Lead, Tata Consultancy Services

April 2019 - November 2021

- Led the integration of banking platforms across nine locations for a global financial client, transforming business objectives into epic user stories and test cases, streamlining development, and driving a 94% improvement in efficiency.
- Developed detailed project plans, implemented risk mitigation strategies, and managed 20+ User stories across Agile sprints, accelerating execution by 73% and enhancing deliverable quality.
- Drove budget estimation and resource allocation for an end-to-end project delivery, improving cost-effectiveness by 23%.
- Orchestrated 500+ UAT test cases, defining acceptance criteria for a banking platform and enhancing service quality by 32%.

Software Developer, Tata Consultancy Services, India

March 2016 - March 2019

- Implemented KYC and optimized payment and core banking modules for the successful merger of 15 branches, ensuring seamless system integration and operational continuity.
- Performed root cause analysis and optimized SQL queries, increasing execution speed by 67% and testing productivity by 51%.
- Conducted technical reviews, applied debugging techniques, and refactored code, reducing support inquiries by 53%.

ACADEMIC PROJECTS:

Healthcare Research Project with Startup (Ongoing)

January 2025 - Present

- Directed primary and secondary research for a healthcare startup, conducting 30+ user interviews and analyzing market data to estimate TAM, SAM, and SOM - identifying opportunities to drive revenue growth.
- Developed 5+ detailed user personas and journey maps by analyzing survey responses, identifying 5+ key pain points and proposing actionable machine learning algorithm-driven solutions to enhance healthcare accessibility and reduce medical costs.

LearnSphere - Digital Learning Platform

October 2024 - December 2024

- Designed a digital learning platform strategy with AI-powered personalized pathways and mobile access, defining business models, KPIs, and a go-to-market strategy, projecting a 15% increase in sign-ups and 25% profitability growth.
- Presented recommendations to professors on platform adoption and engagement strategies, targeting a 30% boost in user engagement, 20% increase in visibility, and 12% rise in early engagement through AI-optimized marketing channels.

SKILLS

- **Agile Product Lifecycle Management:** Requirement gathering, Roadmap Development, Backlog Management, Feature prioritization, Market Analysis, User Story Optimization & Technical Documentation, Budget Estimation & Resource Allocation
- **Project Development Lifecycle:** Sprint planning, scope and budget management, Task Prioritization, Risk management.
- **API Development & Monitoring:** GET, POST, PUT, DELETE methods, JSON/XML data formats, HTTPS protocols.
- **Tools and Methodologies:** JIRA, Slack, SharePoint ServiceNow, Confluence, Agile (Scrum & Kanban), Waterfall, GitHub.
- **Leadership and Organization:** Product Base Club - UTD, Student Mentor | Make a Difference India, Fund Raising Volunteer

EDUCATION

The University of Texas at Dallas, USA

May 2025

Master of Science, Information Technology and Management, GPA - 3.86/4

Rajiv Gandhi Proudhyogiki Vishwavidyalaya, India

July 2015

Bachelor of Engineering Degree with Honors, Information Technology, GPA - 3.60/4
