

PROFESSIONAL SUMMARY:

Results-driven Product Leader with 14+ years of experience in IT, including 7+ years in product management, with a strong **ability to navigate from high ambiguity to clear product vision, execution, and measurable impact**. I have **owned 8 B2B, B2C products** and **200+ product features** that drove **\$250M+ revenue** throughout my career, including A **SaaS trading product** that **leveraged AI/ML** integrations to enhance a fraud detection platform, and **B2B** data analytics and visualization product that generated over \$97M in revenue within four years. As a passionate leader I am seeking a **Senior Product Manager** position to apply my collaborative and data-driven expertise in advancing its strategy goals, and mission.

STRENGTHS:

- **Communication:** Aligning cross-functional teams as large as 20. – Present
 - **Product Strategy:** Implemented strategic approach, with focusing on high-value customer segments to maximize business impact and growth. – Present
 - **Leadership:** Led innovation accelerator team to keep up with the new technology trends. – 2021
-

PROFESSIONAL EXPERIENCE:

Bank of America, Jersey City, NJ

Sept 2022 – Present

Technical Product Manager / Product Lead

Achievements:

- **\$15M Modernization Initiative:** Led a large-scale SaaS trading platform revamp, achieving 90% OKR completion, including UI enhancement and transformation to microservices infrastructure with over 100 APIs while maintaining compliance needs.
- **AI/ML-Powered Fraud Detection:** Partnered with data-science team and led end-to-end product lifecycle, automating fraud detection with a multimodal LLM-driven AI system, reducing false positives by 30% and preventing \$1M in indirect expense losses.
- **Cloud Scalability & Performance:** Increased cloud platform capacity by 40%, supporting 2M+ daily transactions while maintaining 99.9% uptime and 100ms latency SLA on API calls.
- **User-Centric Product Led Growth:** Drove a 60% boost in customer satisfaction by conducting user research (VOC), identifying pain points, and enhancing UX through improved user stories, prototypes, and A/B testing.
- **Agile Delivery Excellence:** Achieved a 50% reduction in scope changes and 30% faster feature delivery by refining prioritization frameworks (RICE, LNO) across three cross-functional teams.

Responsibilities:

- **Product Strategy & Execution:** Define quarterly OKRs, roadmaps, and PRDs aligned with business objectives, leveraging data-driven prioritization (RICE, weighted scoring).
 - **Cross-Functional Leadership:** Drive product vision across engineering, operations, and non-technical business internal external stakeholders. leading \$15M+ product portfolios through monthly and quarterly strategy reviews.
 - **Technical Product Leadership:** Direct engineering teams on architecture, performance optimization, and P95 latency improvements for mission-critical systems.
 - **Requirements & Feedback:** Establish systematic feedback loops with internal customers, translate product requirements into clear actionable technical specifications, provide continuous iterative solutions.
-

Verisk Analytics, Jersey City, NJ

Jan 2018 – Aug 2022

Technical Product Manager

Achievements:

- **Strategic Product Launch:** Led a SaaS data analytics platform from 0 to 1 that keeps insurers updated on latest insurance industry trends, enabling them to visualize, compare, and analyze risk factors to better assess their reinsurance needs.
- **Revenue growth: Proposed** customer segmentation and **new** subscription **revenue models** based on behavioral analytics, customers pain points, and market research, expanded mid-market reach - SMBs, driving **3x enterprise adoption** and **achieving 68% YoY revenue growth, reaching \$97M+ annually**.
- **User Interface Reform:** Redesigned UI to unify the product suite experience, leveraging customer interviews, empathy mapping, user journey mapping, resulting in a 90% customer satisfaction rate.
- **Cloud Optimization & security enhancement:** Led companywide security enhancement using cloud vaulting mechanism over 50+ products, reduced Infrastructure cost by 30% while improving app performance by 50%, enhancing speed and reliability for end users.

- **Development process optimization:** Led CI/CD automation and drove KPI - accelerating releases by 70%, improving deployment reliability, boosting feature adoption and user engagement.

Responsibilities:

- **Product vision leadership:** Align business goals with customer needs, backed by user research, and strategic PRDs to deliver measurable growth and innovation.
- **Strategic planning and execution:** Own **roadmap** planning, balancing quick wins with long-term investments. Lead **Agile** releases with OKR-driven prioritization, ensuring continuous value delivery and stakeholder alignment.
- **Requirement gathering:** Facilitate full SDLC, conduct competitive analysis, customer research, incorporate customer feedback to shape product direction and transform insights into actionable user stories.
- **Designing Excellence:** Collaborate with data science, design and engineering teams - creating wireframes, prototyping, **developing MVPs**, POCs and iterate on solutions to maximize usability and customer satisfaction.
- **Sales and marketing partnership:** Partner with sales and marketing teams, run through **GTM (go-to-market)**, to identify Marketing Qualified Leads - MQLs, marketing campaign performance, growth opportunities and track success metrics (conversion rate).
- **Customer acquisition:** Define **data-driven KPIs**, ran A/B testing, and leveraged user insights to optimize marketing strategies and improve acquisition rate.
- **Team Leadership & Mentorship:** Lead a globally distributed team of 10, driving performance through clear goal-setting, structured feedback and strategic hiring to build a high-performing, scalable team.

Verisk Analytics, Jersey City, NJ
