

PROFILE

USA Army Solider and Product owner leveraging more than 8 years of proven experience in labelling, quality assurance, quality system design, quality operations, manufacturing practices, technical writer, product owner skills and supplier management.

EXPERIENCE SUMMARY

- Led Agile product development, managing and prioritizing the backlog to align with business objectives, regulatory compliance, and stakeholder needs.
- Owned and refined user stories, ensuring clear acceptance criteria and facilitating smooth sprint execution in collaboration with development teams.
- Partnered with cross-functional teams (R&D, Quality, Regulatory, and Manufacturing) to define product requirements, ensuring compliance with FDA 21 CFR 820, ISO 13485, and EU MDR.
- Managed risk assessments (DFMEA, PFMEA) and quality processes, driving continuous improvements to enhance product reliability and compliance.
- Facilitated Agile ceremonies, including backlog refinement, sprint planning, stand-ups, and retrospectives, fostering a high-performing team environment.
- Led labeling updates and regulatory submissions, ensuring medical device compliance with IVDR, FDA, and Brexit (UKCA) requirements.
- Collaborated with suppliers to improve quality performance, managing NCRs, Supplier Corrective Action Requests (SCAR), and scorecards.
- Championed process improvements using Lean and Six Sigma methodologies, optimizing workflows and reducing inefficiencies.
- Worked closely with stakeholders, translating complex technical and regulatory requirements into actionable development tasks.
- Conducted internal audits and GAP analysis, ensuring adherence to quality management system (QMS) standards.
- Provided leadership in Design Controls, guiding teams through product validation, verification (IQ/OQ/PQ), and risk management processes.

PROFESSIONAL EXPERIENCE

DANAHER BIO SYSTEMS

Sep 2023 – Present

Product Owner/Agile Lead

- Managed and prioritized the product backlog, ensuring alignment with business objectives, regulatory requirements, and stakeholder needs.
- Assisted in Agile ceremonies, including backlog refinement, sprint planning, and retrospectives, ensuring smooth sprint execution.
- Defined and documented user stories, acceptance criteria, and functional requirements to guide development teams.
- Partnered with R&D, Quality, and Regulatory teams to ensure product compliance with ISO 13485, FDA, and EU MDR standards.
- Led cross-functional collaboration between engineering, quality assurance, and regulatory teams to drive product enhancements.
- Created and maintained structured documentation templates, improving consistency and version control across teams.
- Reviewed and edited test protocols, verification & validation reports, and engineering change orders (ECOs) for accuracy.
- Worked closely with subject matter experts (SMEs) to translate technical requirements into

clear, actionable user stories.

- Facilitated stakeholder communication by maintaining detailed records of product decisions, change requests, and engineering updates.
- Contributed to risk assessment and mitigation planning by documenting potential product issues and resolutions.
- Championed process improvement initiatives, identifying inefficiencies in Agile workflows and recommending optimizations.
- Ensured documentation milestones aligned with the product development lifecycle and regulatory submission deadlines.

DJO GLOBAL Inc. (ENOVIS), DALLAS, TX

Oct 2021 – Sep 2023

Agile Product Owner

- Managed Agile administration, overseeing change control processes for Technical File (TF) retention, revision management, and BOM structure setup to ensure compliance.
- Led backlog refinement and product change management, ensuring accurate remediation of software part numbers (PNs), SKUs, and BOM updates within Agile frameworks.
- Defined and documented user stories related to Technical File BOM structure remediation, streamlining version control and document traceability.
- Collaborated with cross-functional teams (Regulatory Affairs, R&D, Quality) to ensure software and firmware classifications aligned with DHRs, TFs, and compliance standards.
- Implemented Agile best practices, initiating tickets for part number attribute updates and developing trace matrices.
- Ensured traceability of Design History Files (DHF) and Software DHFs, linking them to applicable part numbers in Agile for regulatory transparency.
- Led labeling projects, working with vendors and suppliers (translation vendors, print vendors, pre-packaged instrument label suppliers) to meet global regulatory requirements.
- Created and updated unique device labels, ensuring compliance with UDI, CE marking 2797, and address updates for international distribution.

SIEMENS HEALTHINEERS, NORWOOD, MA

Sept 2020 – Oct 2021

LABELING COORDINATOR/QUALITY ENGINEER

- Supported EU MDR efforts on remediation efforts of the CE marking, labeling requirements, re-branding efforts, and redesigning class IIa, class IIb and III products
- Responsible for redlining the IFUs, Labels and mechanical drawings and proofed that they properly implemented from the graphic designers per labeling SOPs.
- Lead and develop the labeling processes used by the Business Unit for the review and approval of compliant labeling.
- Responsible for communicating labeling objectives, achievements, and progress to the project teams.
- Develop the Business Unit's labeling processes for review and approving compliant labeling and manage the labeling team to ensure that they are efficient and successful in providing labels on schedule and away from the critical path for the projects.
- Responsible for communicating labeling objectives, achievements, and progress to the project teams.
- Experienced in 5 Whys, 5S activities 5S activities to achieve continuous cGMP compliance, Root Cause Analysis (RCA), Fault Tree Analysis (FTA) to increase the quality of the parts during the process.
- Ensured the products shipped to customers, had a certificate of conformance, RoHS compliance.
- Ensure that CE marking for IVDR medical devices are available per EU MDR regulations from on product labeling including bottles, cartons, IFUs, eIFUs and shipper boxes).

- Finalized component product drawings and QIs, manufacturing/working instructions, equipment standard instructions, and device history and risk analysis documents (DHF, PDS, ERC, FMEAs).
- Support sustaining engineering on technical file remediation, provide reviews and verify file requirements (Risk analysis, design control, clinical evaluation, test reports, manufacturing, and sterilization) and all supporting information and detail documentation.
- Worked as a CAPA facilitator and helped the team in the transition of the PQMS and coordinate its deployment.
- Editing, formatting, and QC performed during the final check of documents for spelling and grammar with corresponds to UKCA compliances.
- As a Labelling Coordinator worked with cross-sectional teams to ensure Brexit and Product Labelling regulatory plans are aligned with client strategies and SOPs.
- Review and support risk management, product lifecycle management (PLM) to ensure high level of compliance to FDA QSR 21 CFR 820, ISO 13485, EU MDR.
- To drive continuous improvement efforts, maintained constant collaboration with site leaders and facility partners.

BRAUN MEDICAL INC, DAYTONA BEACH, FL
QMS QUALITY ENGINEER

Aug 2018 – Sep 2020

- Experienced in TMV execution, writing protocols, training operators, report development and technical justification.
- Interface with Product Development engineer (PDE), Manufacturing engineer (ME) and cross functional team members to discuss the design output, hazards and hazard situation and cause of manufacturing failure to complete the remediation of Supplier manufacturing process flow.
- Part of a team lead to complete TMV, Design Verification and Membrane Characterization projects.
- Managed Lean Six Sigma Kaizen events to speed up the approval process from all the departments such as Quality, R&D, Manufacturing.
- Maintained and enforced a compliant and effective QMS for the activities in scope, as well as for effective and lean QMS structures and documents according to SOP.
- Worked with cross functional team to perform GAP analysis and develop Risk mitigation Strategies
- Conducted gap analysis in existing test methods and updating the Quality documents according to the FDA regulations and EU MDR.
- Authored ECR and DCR in the Agile software to keep track of the changes for the quality documents.
- Worked to ensure that factory ramp-down activities do not affect with Quality Management Systems or Key Performance Indicators (KPIs)
- Skills Used Knowledge of FDA regulations - 21 CFR Part 803 - Medical Device Reporting and 21 CFR Part 820 - Quality System Regulation, Word, Excel, PowerPoint, Outlook, Internal CAPA Management software.
- Hands on experience in creating the Risk Management documents including the Risk Management plan, Hazard Analysis, DFMEA, PFMEA, usability specifications & Risk Management report for the Class III Medical Devices.
- Worked within quality assurance in conducting case studies for NCR (Non-Conformance) and CAPA (Corrective Action/ Preventive Action) and ensure that CAPAs are completed in timely manner
- Participated in annual risk analysis and updated the dFMEA/pFMEA based on the trends and update the Risk Management Documents.
- Led multiple Life Cycle Engineering projects, conducted system level requirement analysis and worked closely with Cross functional team (Quality, Manufacturing, receiving) and update

Standard Operating Procedures (SOPs) for effective workflow planning, execution and successful completion of verification activities (In process/Incoming).

- Periodically review trends and update the NC tracker and follow up on corrective actions.
- Follow up on open EC's related to redlined quality procedures, instructions, checklists, control plans and quality related documents

TECHFIT DIGITAL SURGERY, DAYTONA BEACH, FL
QUALITY ENGINEER

June 2016 - Aug 2018

- Assessed change controls, facility work orders and equipment risk assessments to ensure compliant/ validated state of all GMP equipment and systems
- Assisted with the creation and revision of current manufacturing instructions and drawings
- Experienced with protocol deviation/root cause analysis planning, execution and documentation.
- Worked with cross-functional teams through continuous/system improvement projects such as the development/improvement of process validation SOPs, templates, process flow diagrams, and process information documents.
- Evaluated test protocols and reports to ensure that the testing is sufficient to meet regulatory requirements and quality objectives.
- Involved in validation process coordination within cross functional departments such as Technical Operations, Engineering, Quality Assurance, and Regulatory affairs.
- Developed test methods for some existing work instructions and performed GAP Analysis and prepared Remediation Plans to fix the identified gaps.
- Developed functional Test Methods for design verification, process characterization, process validation, and finished product.
- Reviewed supplier PFMEA and transfer the information to company created Production Risk Management (PRM) / Process Failure Mode Effects Analysis (PFMEA) per establish company risk management documentation and procedure.
- Reviewed supplier manufacturing process flow/traveler/router and worked with suppliers on all quality related issues. Such as hazards and hazard situation, cause of manufacturing failure, current control controls and reference for control to complete the Production Risk Management (PRM)/Process FMEA.

329TH CM CO, US ARMY RESERVE, ORLANDO, FL
CBRN SPECIALIST

June 2016 - Present

- Assist in Chemical Biological Radioactive Nuclear (CBRN) safeguard measures by giving preparing guidance and supervision about CBRN equipment and operations where Hazardous materials are involved.
- Operate and maintain CBRN Decontamination, Defense, Detection, Monitoring Equipment, and exposure to toxic agents while wearing CBRN protective equipment.
- Prepare for CBRN defense Actions/Procedures by training military and civilian personnel on CBRN response operations.
- Honor Graduate Award, 84th Chemical BN, 3rd Chemical BDE, US ARMY
- Commandant's Award, 84th Chemical BN, 3rd Chemical BDE, US ARMY
- HAZMAT Certified

EDUCATION

EMBRY-RIDDLE AERONAUTICAL UNIVERSITY, DAYTONA BEACH, FL

Masters of Science in Aerospace Engineering

JAWAHARLAL NEHRU TECH UNIVERSITY, HYDERABAD, INDIA

Bachelors of Science in Aeronautical Engineering
