

Daniel Yannes

Technology & Business Leader

415 Island Way, Unit 409, Clearwater Beach, FL, 33767, (215) 518-7521, dan.yannes@gmail.com

Professional summary

Strategic technology leader with decades of experience driving enterprise transformation through Agentic AI, machine learning, and integrated financial intelligence platforms. Skilled in overseeing full software lifecycles, leading global engineering teams, and architecting scalable cloud and hybrid infrastructures. Brings deep cross-industry expertise across fintech, pharma, and manufacturing, delivering secure, high-impact solutions aligned with business objectives. Combines geopolitical awareness with sharp business acumen to anticipate disruption and lead with agility. Known for building high-performance teams through clear communication, hands-on mentorship, and a relentless focus on value creation.

Employment history

Associate AI Development Director, Staff Software Engineer & Technical Product Owner, Jul 2022 - Apr 2025

IQVIA

- Served on the core architecture team responsible for designing a multi-tenant, multi-cloud (AWS and Azure) infrastructure for the Strategy Workbench (SWB) platform, positioning it as a commercial SaaS product for external customers.
- Led architecture and delivery for GenAI-powered trial pricing and planning tools, simulating 1.5M+ trial scenarios across 70+ countries to support predictive pricing models.
- Owned and expanded the Country Strategies application, accelerating proposal turnaround by over 50% and boosting global sales win rates.
- Mentored engineers, enforced DevOps best practices, and delivered low-defect roadmap features recognized by executives for speed and precision.
- Delivered multiple roadmap features with near-zero post-release defects and accelerated timelines, increasing user adoption and earning executive recognition for reliability and speed of execution.
- Led cross-functional initiatives to enhance AI model performance, resulting in measurable improvements in operational efficiency, prediction speed, and accuracy across strategic planning workflows.

Associate, Technical Contractor, Nov 2020 - Jul 2022

Endo International plc

- Led end-to-end architecture and implementation of the QWO sales portal on Azure, enabling early commercial launch while ensuring HIPAA compliance for secure handling of physician and patient-related data and supporting merchant payment acceptance and physician training via video streaming.
- Developed secure authentication and authorization workflows, including role-based access control for physicians, sales reps, and administrators across web and mobile clients.
- Developed a GenAI-driven analytics tool that unified data from Salesforce Marketing Cloud, web interactions, questionnaires, and CRM systems to assess campaign performance and predict sales behavior for QWO and Xiaflex.
- Collaborated with internal security teams and external partners to conduct penetration testing and offensive intrusion simulations, identifying and remediating vulnerabilities in the platform prior to launch.

Web Engineering Lead & Interim Director of Development, Oct 2017 - Oct 2020

BankMobile

- Designed and implemented a secure, scalable architecture for the white-labeled T-Mobile Money platform, migrating core systems from on-prem to Azure.
- Oversaw full-stack delivery of web and mobile banking applications, including authentication, fraud prevention, and regulatory compliance features.
- Managed base image creation and optimization for containerized services, ensuring quick startup, reduced image bloat, and simplified dependency management in the Azure CI/CD pipeline.
- Improved onboarding workflows, decreasing user abandonment, and optimized front-end performance and design across devices.
- Partnered with external cybersecurity firms to conduct red team simulations and penetration tests, proactively identifying and mitigating high-impact vulnerabilities to strengthen fraud prevention and overall platform security.
- Directed UI/UX strategy, ensuring intuitive, responsive interfaces across platforms to drive user engagement and satisfaction.
- Built and maintained core banking logic, including account creation, transaction processing, and secure authentication workflows.
- Served a dual role as lead engineer and hands-on developer. Delivered critical features while guiding team execution, and successfully cleared a multi-sprint backlog within a single sprint through focused coordination and execution.

Software Delivery Team Manager, Jan 2015 - Oct 2017

Hansen Technologies

- Led performance optimization of long-running EDI jobs by analyzing IOPS and bottlenecks in Oracle-based systems, improving processing speed and reliability.
- Headed the cloud migration project for a multinational utilities client, designing and executing the transition from on-prem to AWS.
- Ensured GxP compliance, managed system validation, and led CI/CD process modernization.
- Reduced AWS costs by 90% through performance tuning and infrastructure analysis.

Partner, Jul 1995 - Present

Vie-Solutions

- Architected and delivered a global bridal retail platform managing site presence, customer engagement, sales data collection, and commission workflows for sales reps.
- Built Clarity, a proprietary manufacturing performance monitoring tool that improved shop-floor visibility and increased operator efficiency by 40%.
- Designed and developed @Law, a comprehensive legal case management system that stored and organized detailed case file information, integrated with a custom legal document generator using firm-specific templates, and enabled full-text indexing and profiling for rapid document retrieval all within a secured, access-controlled environment ensuring confidentiality of legal data.
- Designed and launched financial and operational intelligence tools for clients across pharma, logistics, and finance sectors.

Education

MBA, Business Administration, 1993

Temple University, Fox School of Business, Philadelphia, PA

Completed graduate degree in just two years while working full-time as a Financial Analyst at SEI Corporation.

BS, Accounting, 1991

Temple University, Fox School of Business, Philadelphia, PA

Full athletic baseball scholarship; Dean's List & Academic Merit List recipient

Skills

Agentic AI , Agile, Angular, CI/CD, Compliance-Driven Development (GxP, FDA, PCI-DSS, FFIEC, SOC 2), DevOps, Docker, Enterprise Architecture , Kubernetes, Linux, Load Balancing, Machine Learning, Microservices, ML Modeling, Multi-Cloud Infrastructure (AWS, Azure, GCP) , .Net, n8n, Network Monitoring (e.g., Wireshark, NetFlow), Network Security, Pandas, PHP, Python, React, SaaS Design.

Sales Force Marketing Cloud, Scikit-learn, Secure Payment Systems, SQL, Team Leadership, TensorFlow, Terraform, Video Streaming.

Additional information

Selected Projects

- AI-Driven Trial Pricing Engine – ML-enhanced estimator for IQVIA clinical planning
- Strategy Workbench – Cross-functional agentic tool for IQVIA ACOE
- Clarity - Manufacturing performance monitoring enterprise software
- T-Mobile Money – White-label banking solution led at BankMobile
- QWO Pharma Sales Portal – Full-stack, secure platform at Endo
- @Law - Legal Case Manager software
- DocHound – Document intelligence platform developed via Vie-Solutions
