PROFESSIONAL SUMMARY

- Over 3+ years of progressive experience in CRM applications development and administrations using Salesforce Platform.
- Certified Salesforce Administrator, Salesforce Developer and Salesforce AI Associate.
- Proficient in working across various SFDC Implementations including Sales Cloud, Service Cloud, and Chatter & App - Exchange Applications.
- Proven experience in creating Custom Objects, Custom Fields, Roles, Profiles, Email Services, Page Layouts, Workflow Alerts and Actions, and Approval Workflow for Automated Alerts, Field Updates and Outbound Messages according to the business requirements.
- Profound experience in creating pick lists, multi-Pick lists, Lookups, Master-detail relationships, data insertion and retrieving, Validation and Formula fields to the different types of custom objects.
- Worked on Salesforce SOQL and SOSL query language to analyze data and get records set into Apex Class.
- Knowledge on CRM business processes like Forecasting, Campaign Management, Lead Management, Order Management, Account Management, and Case Management, SOAP, and REST based web services.
- Administration, Installation & Deployment of Salesforce 3rd party Apps, including Salesforce Lightning and Integration with social media and other web-based applications.
- Configuration and maintenance user security permissions in compliance with organizational Needs. Experienced with Heroku as a platform of Service for designing, building and security.
- Release Management, Major and Minor Releases and deployments.
- In-depth understanding of the capabilities and constraints of the Salesforce CRM application, testing, migration, rollout, training and ongoing coupled with good understanding business goals and processes, requirements gathering, implementation administration.
- Having CRM domain knowledge and experience with Salesforce CRM and its technologies.
- Experience in interacting with all levels of customer and Sales Force management.
- Having knowledge on front-end web tier (HTML, DHTML, CSS, and cross-browser development) and back end (Java, .NET, SQL) software development.
- Experience in Sales force development including Apex Classes / Controllers, Visual force, Apex Triggers, Scheduler and Batch Processes and used Sales force API, server-to-server web services (SOAP).
- Worked with command line interface, import wizard to migrate the data from Oracle database, also used Apex Data Loader to perform the DML operations by using CSV files.
- Hands on working experience in Role Hierarchy, Custom Profiles creation and user management.
- Experienced in creating the Lightning components and Lightning Applications.
- Installed Salesforce AppExchange Apps, configured and maintained user security permissions in compliance with organizational needs.
- Experience in implementing Web-to-Case, Email-to-Case to generate cases for Case objects.
- Experience in Web Services to integrate with the third-party applications, MDM Integrations and AppExchange apps.
- Expertise in implementing field level security and page level security based on the profiles.
- Worked on sharing rules including Owner to Owner (Role/Public Group) and criteria-based sharing.
- Developed and configured various Reports and Report Folders for different user profiles based on the need in the organization.
- Working experience in Agile methodologies.
- Experience in different work environments included, Development, Test, UAT and Production.

TECHNICAL SKILLS

Force.com: Apex Language, Apex Classes, Triggers, SOQL, SOSL, Apex Web Services, Apex Data Loader, Dashboards, Reports, Analytic Snapshots, Outbound Messages, Workflow & Approvals, Field updates, Reports, Custom Objects, Custom settings, Custom labels and Tabs, Email Services, Role Hierarchy, Dashboards, Security Controls, App -exchange Package, Custom Application & Sandbox data loading.

Visual Force: Pages, Components & Controllers.

Salesforce Tools: Eclipse, Force.com Eclipse IDE Plug-in, Force.com Data Loader.

Languages: C, Java, Apex

Databases: Microsoft SQL Server 2008

Web Technologies: HTML, HTML5, CSS3, PHP, XML, JavaScript, jQuery, jQuery UI

PROFESSIONAL EXPERIENCE

Client: Bank of America, Dallas, TX

March 2024 to Present

Role: Salesforce Developer

Responsibilities

- Involved in the business meetings to gather the requirements and for salesforce implementation.
- Hands on experience on Lightning web components and Aura components.
- Configured security and organizational hierarchy for sales for salesforce implementation.
- Customized page layouts for Salesforce standard and custom objects.
- Configured Reports for custom objects and associated them to Dashboard.
- Involved in Design and development of Workflows rules, triggers, validation rules and other customizations with Salesforce.
- Responsible for all the activities related to configuring Data Loader, uploading data in CSV files into salesforce.com, checking for integrity of the data.
- Analyzed the business processes for the three divisions in the organization that are using salesforce.
- Set up visibility securities like roles, profiles, field level securities. Set up personal accounts in a sandbox.
- Created User Interfaces using HTML, CSS, NodeJS, bootstrap and JavaScript.
- Developed SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects.
- Implemented Changesets Deployment. Developed Test classes and increased the code coverage.
- Created page layouts to organize fields, custom buttons, custom links, related lists, and other components on a record detail and edit pages.
- Created workflow rules and defined related tasks, time-triggered tasks, email alerts and field updates to implement business logic.
- Created Custom Objects and defined lookup and master-detail relationships on the objects. Also created junction objects to establish connectivity among objects.
- Handling the Sparc service now incidents created by the end users.
- Hands-on experience automatically routes cases, leads, or other work to the most appropriate by using Omni-Channel Routing.
- Worked on a tool – HP ALM for testing the deployment branches in different environments.
- Retrieved some data and its functionality from Third-Party API's and displayed within the lightning component.
- Configured workflow rules and defined tasks, email alerts, and field updates to support business logic.
- Created custom objects and established relationships, including lookup and master-detail, to ensure data connectivity.
- Handled Sparc service now incidents reported by end users.
- Customized standard features like auto-response, assignment, escalation rules on Lead and Case objects.
- Developed customized Reports, Dashboards for business users and managers, developed custom reports using visual force pages.
- Created Custom Objects and fields for an application called "Service Assist", which is used on Service Console App in Service Cloud.
- Prepared data mapping documents and migrated data from Siebel to Salesforce using Data Loader, Cast Iron orchestration.
- Setting up Service Cloud Console, Cases (Web to case, Email to case), Solutions, Case Assignment and CTI Integration.
- Used Sales Cloud integration solution between Inforce ERP applications and the Sales Cloud of force.com.
- Worked with different record types to setup page layouts based on profiles, used Lightning Web Components, Apex Data Loader tool to perform DML operation using CSV files and used different deployment plans for each release and Sandbox refresh
- Written apex unit test classes for Trigger, Apex classes to meet 75 of code coverage to migrate to Production instances.
- Designed salesforce service cloud console to enhance productivity with dashboard like interface.
- Designed, developed and deployed VisualForce Page, Apex Classes, Controller Classes and Apex Triggers based on the business requirements.
- Implemented Configuration, Customization and Development with Salesforce.com on Service Cloud and Sales Cloud.
- Created and maintained the documentation for application Design, data mapping document for Migration and integration technical design document.
- Involved in Salesforce development work using Lightning Aura Components, Lightning Experience, Lightning App Builder
- Implemented best practices to avoid governor limits by writing repeated code in triggers and apex classes.
- Implemented Omni-Channel Routing to automatically route cases, leads, and other work to the most suitable agents.

- Utilized HP ALM tool for testing deployment branches across different environments.

Environment: Eclipse IDE, Force.com IDE, Salesforce.com, Apex Classes, Visualforce, Sharing Rules, Workflows, Approval Process, Data loader, Force.com platform, HTML, CSS, JavaScript.

Client: Fidelity Investments, USA

April 2023 to Feb 2024

Role: Salesforce Integration Developer

Responsibilities

- Worked on various Salesforce Standard & Custom Objects, Triggers, Classes, Pages, Report Types, Reports and Dashboards & Lightning Application in Sales Cloud and Service Cloud.
- Demonstrated expertise in Sales cloud, Service cloud, Marketing cloud, Health Cloud, Partner portal and Customer portal.
- Implemented Salesforce Lightning Components for a small set of users for customizing reports and dashboards.
- Experience in the Salesforce CPQ platform and involved in various phases of Software development including SFDC Administrator, SFDC Implementation, Business analysis, System Analysis, Design, Testing, Production Support, Implementation of SFDC and Web based Applications.
- Resolve customers' questions or problems over the telephone or Internet focusing on product functionality, system configuration/setup.
- Serve in primarily functional capacity for Support of a complex software product.
- Serve as primary support liaison between company and customer and documents incidents in required tracking systems.
- Proactively keep customers informed of how and when problems are resolved with focus on retention and reference ability.
- Developed Workflows and Process Builder.
- Based on requirements, build Advanced Formula and Salesforce Validation Rules.
- Created multiple Lightning Components, added CSS and Design Parameters that makes the lightning component look and feel better.
- Involved in discussions with customer operations managers to identify issues and areas of potential improvement.
- Provide technical assistance and end user troubleshooting for bug fixes, enhancements, and "how-to" assistance
- Leveraged APEX Controller to make a call for external requests to retrieve data from various API's and display them on to the component.
- Developed reusable salesforce Aura Lightning Components.
- Tested apps by appending multiple components to a Lightning Application thereby deployed Applications from Sandbox to Production.
- Coordinated with Salesforce QA at different levels of testing like Functional, Regression and Integration Testing for business scenarios.
- Developed and Customized User interface in Salesforce using Visualforce, Apex controllers and Force.com IDE.
- Developed Visualforce Pages to include extra functionality and wrote Apex Classes to provide functionality to the visual pages.
- Worked on Data Loading activities for loading and archiving data using Salesforce Import Wizard, Data Loader and Workbench.
- Involved in migrating data from oracle dB to Salesforce application using Apex Data Loader.

Environment: APEX, VisualForce, Eclipse IDE, Apex Data Loader, HTML, CSS, Force.com.

Client: HSBC, India

June 2021 to September 2022

Role: Salesforce Developer

Responsibilities

- Implemented Apex Classes & Triggers and linked them to manage the workflows Implemented in the system.
- Customized tabs worked with various standard objects including Accounts, Contacts, Leads, Campaigns and Cases. Designed, Implemented, and deployed the Custom objects, Page layouts, Custom tabs, Components to suit the needs of the applications.
- Designed, Developed and Customized - Custom Tabs, Objects, Record Types, Picklists, Dependent Picklists, Validation Rules,

- Created Test Classes for the Triggers and maximized the Test Coverage. Experience in preparing Documentation on Custom Apps and Objects. Worked on various salesforce.com standard objects like Accounts, Contacts, Opportunities, Cases, Leads, Campaigns, Reports and Dashboards.
- Implemented Apex Classes & Triggers and linked them to manage the workflows in the system. Customized tabs worked with various standard objects including Accounts, Contacts, Leads, Campaigns and Cases.
- Designed, Implemented, and deployed the Custom objects, Page layouts, Custom tabs, Components to suit the needs of the applications.
- Developed Visual Force Pages, Visual Force Custom Controllers Components, Advanced Search Functionality, Custom Objects, Analytic Snapshots, Tabs, Tags and Components. Created Test Classes for the Triggers and maximized the Test Coverage.
- Worked on integrations on Rest based Web services.
- Worked closely with Business Analysts and performed detailed analysis of business and technical requirements and designed the solution by customizing various standard objects of Salesforce (SFDC).

Environment: APEX, Visual Force, Eclipse IDE, Apex Data Loader, HTML, CSS, Force.com.

Client: Vodafone, India

Jan 2021 to May 2021

Role: Salesforce Admin/Developer

Responsibilities:

- Customize Salesforce applications (objects, fields, page layouts, and business processes).
- Configure workflows, approval processes, and validation rules for automation.
- Administer user roles, profiles, permissions, and security settings.
- Develop Apex triggers, classes, and Visualforce pages to implement business logic.
- Build custom Lightning Components and manage Lightning page layouts.
- Perform data migration, cleansing, and ensure data integrity.
- Integrate Salesforce with third-party applications using APIs.
- Provide end-user support, troubleshooting, and conduct training.
- Manage deployment of changes and new features from sandbox to production.
- Collaborate with stakeholders to gather requirements and document configurations.

Environment: Sandbox, production, developer console, Workflow Rules, Page Layouts, Organize Fields, Lookups, Validation Rules, Email Alerts and Formula Fields

Education Details

- Bachelor of technology in Information and Technology from Jawaharlal Nehru Technological University.
- Masters in computer science from University of Bridgeport.

Certifications

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer I
- Salesforce Certified AI Associate
