

Dedicated & results-driven professional with a proven track record in Project & Product Management - known for robust analytical skills and strategic thinking, complemented by a deep background in software development. Skilled in assuming diverse leadership positions, including roles such as Product Owner and Product Manager. Demonstrated success in delivering products on schedule and within budget, maintaining superior quality standards. Effectively spearheaded projects within P&C Modernization domain (incl. Naïve & Mobile application development and testing) with extensive involvement on ART level with strong emphasis on relationship & communication management. Proficient in Agile, Waterfall, Lean, and SAFe methodologies. Dedicated to goal attainment and fostering a culture of continuous improvement & collaboration.

PROFESSIONAL EXPERIENCE

USAA (Property & Casualty) – Millennium Group, San Antonio, TX

Sep. 21 – Apr. 25

Development Product Owner

- Support delivery of Billing & Digitalization key initiatives with ~\$400 Mln. in benefit realization.
- Actively collaborate with Senior Leadership to bridge communication gaps and identify risks. Work hand in hand with other Product Owners, Team Coaches, RTEs, Program/Product Managers, Developers and Testers to define features and user stories. Representing Business and acting as the Voice of the Customer – further strengthening the relationships.
- Align with the approved Program engagement strategy. Partner with counterparts in Product Management to support & enable business objectives, elevate risks & challenges.
- During the PI sessions, decompose business & technical features into user stories and also identify & define the (committed & stretch) objectives, risks & dependencies and highlight the same on Program Board.
- Create the Acceptance Criterion & get buy-in from the stakeholders and refine the stories together with the Scrum team.
- Translate features into user stories within the team's backlog while managing, ranking and strategically prioritizing the backlog to reflect stakeholder's requirements.
- Drive and own the backlog grooming and management, prioritize the iteration and drive acceptance testing and delivery of code development (from decomposing Features to release in PROD in a time efficient manner).
- Plan and estimate 2-week sprints in a realistic yet time-efficient manner that allows the teams to deliver maximum percentage of the MVP according to the roadmap.
- Keep the Product Management & other Scrum teams informed on any new ad-hoc injects, trade-offs or carry-overs.
- Update the Sponsors on the developments, impediments, progress on the objectives and conduct System Demos on the committed Objectives and address any concerns every 2 weeks (+ Solution Demo during Inspect & Adapt Sessions).
- Manage multiple teams – on-site (San Antonio – Backend Programming/APIs), near-shore (Mexico – Communication & Digitalization) and off-shore (India – Application support & QA).
- Worked closely with UI/UX designers and engineers to ensure excellent user experience & successful feature development.

JP Morgan Chase (Court Orders and Levies - COAL), San Antonio, TX

Jul.18 – May21

Product Owner

- Act as liaison between Business, Product Management & IT teams to refine the product and incorporate features based on business/regulatory requirements. Make evidence based recommendations, data driven story & defect prioritizations.
- Partner with DEV team & Product leadership to drive and manage the solution development process and ensure the product team understands the direction & vision. Identify impact of system shortfalls and proactively provide immediate communication to affected parties on problem resolution.
- Actively participate in PI Planning – break features down into user stories within the team's backlog while managing, ranking & prioritizing the backlog to reflect stakeholder's requirements. Coordinate with teams to refine & drive the ordering of the backlog.
- Work with Program Management and business leadership to support new business requirements.
- Draft the Approach documents (on new Requirements & detected issues) in consultation with team members and presenting the same in the Product Cabinet meetings.
- Take the lead on daily PROD issues & eventually resolve within the defined SLA - Cases/Processes deviating from the path defined during electronification, identify areas of application enhancements/improvements to automate the processes, document Requirements as JIRA features & user stories and provide T-shirt sizing.
- Develop & update functional Use Cases and develop business process flow documentation to explain business requirements to Development, QA teams and Senior Management.
- Prepare all weekend validation tasks (prior to deployment), arrange resources from the operations, run the coordinated validations – work together with the Deployment team on weekends and share updates with the stakeholders & Senior Management.

Hamburg Suedamerikanische Dampfschiffahrts - Gesellschaft KG, Hamburg, Germany
