EDUCATION

KCA University

Bachelors of Science in Software Development

Relevant Courses: Data Structures and Algorithms, Object Oriented Programming, Software Engineering, ML/AI, Data Science

2019 – April 2025

Nairobi, KE

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, C++, C#, JavaScript, Golang, SQL

Technologies: React, NodeJS, NextJS, PostgreSQL, MongoDB, Express, REST API, AWS, Google Cloud, Microsoft Azure, .NET, Digital Ocean, Flask, Modal.com

EXPERIENCE

TechNova Solutions

Full Stack Developer

April 2021 – Present

Remote

- Developed and maintained 5+ production-level web applications using React (frontend) and Node.js/Express (backend).
- Integrated RESTful and GraphQL APIs to handle real-time data updates.
- Implemented CI/CD pipelines using GitHub Actions, reducing deployment time by 40%.
- Collaborated with designers and PMs to redesign an internal dashboard, improving usability and decreasing support requests by 25%.
- Migrated legacy systems to modern React + TypeScript stack, improving code quality and maintainability.

DigitalCrafts Inc

Frontend Developer

Jan 2019 – Feb 2021

Remote

- Built responsive, mobile-first interfaces using React, Redux, and Tailwind.
- Improved page performance across multiple SPAs, reducing load times by up to 60% using lazy loading, code-splitting, and Lighthouse optimization.
- Led accessibility efforts (WCAG compliance) across major products.
- Wrote unit and integration tests, reaching 90% code coverage.

Hilalium & Sons

Software Engineering Intern

Oct 2018 – Dec 2018

Nairobi

- Assisted in developing trading strategies and backtesting tools using **OCaml**, contributing to the refinement and validation of trading models.
- Streamlined data ingestion processes, improving the efficiency of real-time data handling and storage.
- Conducted performance testing and optimization of trading systems, ensuring robustness and scalability under high-load conditions.
- Implemented a new data visualization tool, increasing analysis speed by 30%.

PERSONAL PROJECTS

News Room – Pulse News | React, Tailwind CSS, News API | [vercel.app](#)

A modern news aggregation platform delivering real-time updates across global categories using the News API.

- Built a sleek, responsive interface for browsing the latest headlines in technology, business, entertainment, health, and more.
- Integrated the News API to dynamically fetch and render news articles from multiple trusted sources.
- Designed category-based filtering and search functionality for personalized content delivery.
- Focused on performance optimization and clean UI/UX to ensure smooth reading experiences across devices.

Marketing System | React, Tailwind CSS, Firebase | [vercel.app](#)

A full-featured marketing and client management system built to streamline campaigns, monitor performance metrics, and manage leads.

- Streamlined marketing campaign management with dynamic dashboards and client tracking tools, enabling data-driven decision making.
- Built responsive UI using React and Tailwind CSS, enhancing usability and visual appeal across devices.
- Integrated Firebase for secure user authentication and real-time data updates, ensuring seamless workflow and access control.
- Designed modular components for scalability and easy feature expansion.

Kenya AgriNexus | Next.js, Tailwind CSS | [vercel.app](#)

A digital platform spotlighting innovative strategies to revolutionize Kenya's agricultural sector and boost economic impact.

- Presented innovative agri-tech solutions through a clean, interactive multi-section site.
- Designed informative layouts to communicate high-impact strategies in the Kenyan agricultural sector.
- Employed responsive design to ensure usability on all devices, targeting both stakeholders and investors.
- Focused on visual storytelling and accessibility to promote transformation and sustainability.

Kenya Motors – Premium Car Rental in Kenya | React, Tailwind CSS, Node.js | [vercel.app](#)

A modern car rental booking system designed for premium experiences with smooth listings, reservations, and user management.

- Built an elegant car rental platform with real-time vehicle listing and booking functionality.
- Implemented form validations, booking logic, and user profile management.
- Designed a modern, mobile-first UI using Tailwind and React Hooks to provide a premium user experience.
- Ensured performance optimization and search visibility through SEO best practices.

Kenya Railways | React, Node.js, Express | [vercel.app](#)

A digital railway system supporting online ticketing, real-time train management, and commuter convenience.

- Developed a digital ticket booking and railway scheduling platform to modernize travel services.
- Implemented train management, route scheduling, and reservation modules with secure user access.
- Built admin dashboards for managing train data and passengers in real time.
- Enhanced commuter experience with a clean, intuitive interface and smooth navigation.

CodeInterview – Professional Technical Interviews, Simplified | React, Node.js, Express, CodeMirror, JWT | [vercel.app](#)

A dynamic interview management platform that facilitates real-time technical assessments with live code execution and scoring.

- Developed a real-time technical interview platform with code editing and evaluation using CodeMirror.
- Implemented secure JWT-based user authentication and role-based access for candidates and interviewers.
- Created a streamlined admin dashboard to manage questions, sessions, and feedback records.
- Optimized the experience for both sides of the interview process, improving accessibility and organization.

Sanaa Market – Discover Authentic Kenyan Craftsmanship | React, Tailwind CSS, Framer Motion | [vercel.app](#)

An e-commerce platform showcasing and selling handcrafted Kenyan goods to a global audience.

- Created an e-commerce platform for showcasing and selling handmade Kenyan crafts.
- Integrated product filtering, shopping cart, and seller portals for full marketplace functionality.
- Used Framer Motion for smooth UI animations and engaging interactions.
- Focused on visual storytelling and mobile optimization for maximum reach.

Luxury Dental | React, Node.js, Express, MongoDB | [vercel.app](#)

A professional dental management platform that simplifies appointments, patient records, and clinic workflows.

- Developed a clinic management system with modules for appointment booking, patient records, and treatment tracking.
- Designed distinct interfaces for doctors, receptionists, and patients with proper access control.
- Integrated MongoDB for secure, scalable storage of sensitive health records.
- Focused on real-world usability for medical professionals in busy clinical settings.

Advanced Airline Management System | React, Node.js, Express, PostgreSQL | [vercel.app](#)

A robust airline system to manage flight schedules, reservations, and fleet details from one dashboard.

- Built a scalable airline management platform handling flight scheduling, bookings, and fleet operations.
- Designed dashboards for both users and administrators with data-driven flight statistics.
- Integrated PostgreSQL for efficient and structured flight and booking data storage.
- Focused on reliability and system modularity for future feature expansion.

Mentor Match – Connect with Expert Mentors | React, Node.js, Express, JWT | [vercel.app](#)

A mentorship matchmaking platform that bridges learners with industry experts through intelligent pairing.

- Developed a platform for mentorship pairing based on interest areas and subject tags.
- Implemented user registration, profile management, and meeting scheduling features.
- Enabled real-time messaging and match tracking for better connection management.
- Emphasized smooth UX for students and professionals alike.

Techconnect Kenya – Expert Tech Repairs At Your Door | React, Tailwind CSS, Node.js | [vercel.app](#)

A service booking platform connecting customers to certified tech repair providers across Kenya.

- Built a service-based app connecting users to nearby professional tech repair providers.
- Designed booking, service request, and quotation features.
- Ensured responsive design and high performance across all devices.
- Focused on simplicity and directness for tech-savvy and non-tech-savvy users alike.

Grace Church Management System | React, Node.js, MongoDB | [vercel.app](#)

A church management platform for handling events, members, sermons, and donation records.

- Developed an internal tool for churches to manage events, sermons, members, and announcements.
- Implemented role-based access for church leaders, admins, and community members.
- Built donation tracking and attendance recording features to support church growth.
- Emphasized security and usability in sensitive community environments.

Cinzel E-Library | React, Node.js, MongoDB | [vercel.app](#)

A digital library for academic institutions featuring book listings, borrowing logic, and reading progress tracking.

- Created a fully functional e-library system with search, filtering, and borrowing logic.
- Integrated PDF viewing, reading tracking, and user-specific libraries.
- Implemented authentication and borrowing history to simulate a real-world library.
- Focused on academic user experience and resource organization.
