Professional Summary

Seasoned IBM Sterling OMS Developer with over 25 years of experience in architecting, developing, and implementing enterprise-grade OMS solutions. Extensive hands-on expertise in **Sterling OMS development, Java, SOA, XML, REST, JSON, and middleware integration**. Proven success in designing scalable order workflows, building web service integrations, and customizing Sterling OMS to meet diverse business requirements. Adept at using tools like **Eclipse IDE** and **SoapUI** to streamline development and testing.

Core Competencies

- **IBM Sterling OMS Development & Integration** (v9.x & v10.x)
 - **Java Development** – Enterprise Java, Web Applications, Custom APIs
 - **Middleware & SOA Technologies** – XML, JSON, REST, SOAP, JMS
 - **Eclipse IDE & SoapUI** – Development & Integration Testing
 - **OMS Testing & Performance Tuning** – End-to-End Workflows, Payload Debugging
 - **Relational Databases** – SQL, Postgres, Oracle
 - **Web Technologies** – HTML, JavaScript, XSL, XML
 - **Agile & CI/CD** – Jenkins, Git, Test Automation, DevOps
-

Professional Experience

Independent Contractor – IBM Sterling OMS Engineer and Technical Architect

2018 – Present

- Designed and implemented custom Java extensions within IBM Sterling OMS for order fulfillment, sourcing, and payment integrations.
- Developed REST and SOAP APIs for real-time integration with ERP, WMS, and payment platforms.

- Used Eclipse IDE to build and debug OMS service components, flows, and pipeline configurations.
- Enhanced system performance by optimizing service configurations and troubleshooting SOA-based order flows.
- Created custom XSL templates for transforming XML payloads between OMS and external systems.

Ai-Blockchain – Chief Technology Officer (Part-Time)

2015 – 2018

- **Innovative Technology Integration:** Spearheaded the development of a blockchain platform enhanced by AI, driving technological innovation and advancing company intellectual property.
- **Strategic Partnerships:** Established key partnerships with industry leaders (SAP, AWS, DocuSign) to enhance platform capabilities and market reach.
- **Funding & Growth:** Contributed to securing over \$1 million in initial funding, underpinning the company's early-stage growth and strategic direction.

Senior Managing Consultant – OMS Solution Architect, Expicient Inc.

2013 – 2017

- Architected and developed IBM Sterling OMS implementations for enterprise retail clients.
- Developed custom order flows, Java services, and UI modifications for Call Center and Store portals.
- Led SOA-based integrations with external systems using XML/REST/JSON and tested using SoapUI.
- Collaborated with clients to design scalable, high-availability OMS environments on IBM Sterling v9.x and v10.x.

Solution Architect / Technical Architect, Yantra / Sterling Commerce / IBM

2003 – 2013

- Engineered Sterling OMS customizations using Java, XSL, and JavaScript to enhance order sourcing and fulfillment logic.
- Implemented middleware integrations using MQ and JMS for asynchronous order processing.

- Built monitoring tools and dashboards for proactive OMS issue detection using logs and system metrics.
-

Education

Bachelor of Science in Computer Science

Worcester Polytechnic Institute – Worcester, MA

Certifications

- IBM Sterling OMS Architecture
 - IBM watsonx.ai Technical Essentials
 - IBM Generative AI Fundamentals
-

Technical Skills

- **Sterling OMS (v9.x & v10.x)**, Java, SOA, XML, REST, JSON
 - **Eclipse IDE**, SoapUI, SQL, Postgres, Oracle
 - **Web Technologies**: JavaScript, HTML, XML, XSL
 - **Middleware Tools**: JMS, MQ, SFTP, ERP/CRM/WMS connectors
 - **DevOps & QA**: Git, Jenkins, Selenium, JMeter, CI/CD Pipelines
-

Key Achievements

- Developed a suite of Sterling OMS Java services to handle custom order validation, fulfillment, and returns, improving order accuracy by 30%.
- Reduced integration failures by 40% through robust payload validation, XSL transformations, and middleware configuration.
- Spearheaded OMS cloud migration from on-prem to IBM Order Management on Cloud, increasing uptime and system responsiveness.
- Architected real-time REST/JSON APIs for third-party integration with OMS, reducing dependency on batch processes.
