

Mohammed Kashif

Java Full Stack Developer

718-200-8978 | Kashif.fullstack86@gmail.com | [LinkedIn](#) | Miami, FL

SUMMARY

Java Full Stack Developer with 7+ years of experience in designing and developing scalable, high-performance web applications using Java, Spring Boot, Spring Cloud, Hibernate, React.js, Redux, and TypeScript. Skilled in building microservices, RESTful APIs, and GraphQL endpoints for efficient data handling. Proficient in containerization (Docker, Kubernetes), CI/CD automation (Jenkins, GitLab CI), and cloud infrastructure (AWS). Strong expertise in relational and NoSQL databases, including MySQL, PostgreSQL, and MongoDB, optimizing system performance and handling large-scale data. Adept at implementing security best practices, authentication (OAuth2, JWT), and improving system reliability with real-time monitoring using Prometheus and Grafana.

EXPERIENCE

Full Stack Developer, Shopify

Jun 2022 – Present | New York

- Developed and maintained Java-based microservices using Spring Boot and Spring Cloud, improving scalability and reducing response times by 30%.
- Designed and implemented RESTful APIs and GraphQL endpoints in Java, enhancing data retrieval efficiency and reducing API call latency by 40%.
- Built a full-stack React.js and Redux dashboard for real-time data visualization, increasing user engagement by 25% through enhanced responsiveness.
- Implemented Spring Security with OAuth2 and JWT for authentication in Java microservices, reducing security vulnerabilities by 40% and ensuring compliance with security audits.
- Automated CI/CD pipelines using Jenkins and GitLab CI for Java-based applications, streamlining code deployment and reducing release time by 60%.
- Integrated PostgreSQL and MongoDB for optimized data storage and retrieval in Java microservices, improving database query performance by 35%.
- Designed Kafka-based event-driven architecture, ensuring seamless inter-service communication and processing asynchronous tasks efficiently.
- Enhanced cloud infrastructure management using Terraform and AWS CloudFormation, reducing environment setup time by 50%.
- Improved system observability with AWS CloudWatch, Prometheus, and Grafana, reducing incident response time by 60% with real-time alerts.

Full Stack Developer, Birlasoft

Jan 2019 – Dec 2021 | India

- Built and deployed Java-based Spring Boot microservices with Hibernate ORM, improving API performance and reducing latency by 25%.
- Designed a single-page application (SPA) using React.js, TypeScript, and SASS, enhancing UI/UX and boosting customer retention by 15%.
- Developed and deployed GraphQL APIs in Java, optimizing data fetching for complex queries and reducing client-server communication overhead.
- Implemented event-driven architecture using Kafka with Java-based consumers, ensuring real-time processing and seamless integration between services.
- Integrated MySQL and PostgreSQL for structured data storage and MongoDB for NoSQL data handling, increasing application flexibility.
- Leveraged AWS Lambda and S3 for processing and storing large datasets, reducing processing time by 45%.
- Migrated legacy Java monolithic applications to microservices architecture using Spring Cloud, enhancing system scalability and resilience.
- Automated testing using JUnit and Mockito for Java applications, reducing bug occurrence in production by 30% and improving code maintainability.

Frontend Developer, Wipro

Mar 2017 – Dec 2018, India

- Developed dynamic, React.js-based applications with optimized Redux state management, ensuring seamless UI interactions.
- Integrated RESTful APIs and GraphQL queries for real-time data fetching, enhancing application responsiveness.
- Optimized web performance by implementing lazy loading, code splitting, and caching mechanisms, improving page load speed by 30%.
- Migrated legacy JavaScript applications to TypeScript, improving code maintainability and reducing bugs by 20%.
- Used Bootstrap and Tailwind CSS to create visually appealing and mobile-friendly UIs, reducing development time by 20%.
- Automated deployment pipelines with Webpack and Babel, reducing production deployment time by 40%.

EDUCATION

Master of Science, Computer Science and Engineering
Florida International University, Miami, USA (CGPA: 3.8/4)

Jan 2022 – Dec 2023

Bachelor of Engineering, Computer Science and Engineering
Jawaharlal Nehru Technological University (CGPA: 6.8/10)

Jan 2015 – May 2019

TECHNICAL SKILLS

Programming Languages: Core Java, Java 8+, .Net, J2EE, JavaScript (ES6+), TypeScript, Python for scripting and automation, C#, .Net Core.

Frontend Technologies: HTML5, CSS3, SASS, React.js, Redux, Angular.js, Bootstrap, Material UI, Jest, Enzyme.

Backend Development: Spring, Spring Boot, Spring Cloud, Hibernate, Node.js, Express.js (MERN stack), RESTful APIs, GraphQL.

Authentication & Authorization: JWT, OAuth2.

Databases: SQL, MySQL, PostgreSQL, NoSQL, MongoDB, Cassandra.

Cloud Platforms & Tools: AWS (EC2, S3, Lambda, RDS, Elastic Beanstalk), Azure (App Services, Azure Functions, Blob Storage, DevOps), Google Cloud Platform (Compute Engine, Cloud Storage, Firebase).

Architectures: AWS Lambda, Azure Functions, Terraform, AWS CloudFormation.

Cloud Networking: VPC, API Gateway, Load Balancers.

Cloud Monitoring & Logging: AWS CloudWatch, Azure Monitor, Prometheus, Grafana. DevOps & CI/CD: Git, GitHub, GitLab, Jenkins, GitLab CI, AWS CodePipeline, Azure DevOps. Containerization & Orchestration: Docker, Kubernetes, ECS, EKS.

Build & Deployment Tools: Maven, Gradle, AWS Elastic Beanstalk, Nginx, Apache.

Other Tools & Technologies: Agile (Scrum, Kanban), SDLC, Waterfall, Swagger.

Testing & Quality: JUnit, Mockito, Cypress, npm and yarn.
