EDUCATION

Wayne State University (College of Engineering)

Detroit, MI

Bachelor of Science in Computer Science

EXPERIENCE

Data Entry Specialist

June 2020 – August 2024

RHB Laboratories

Troy, MI

- Managed and transferred **100% of patient data** into electronic records, improving accessibility and compliance.
- Generated daily reports on COVID-19 statistics for the State of Michigan using Microsoft Excel
- Gained hands-on experience with **data analytics, business management, and healthcare compliance**, supporting strategic decision-making.
- Job shadowed the IT department** to gain insights into network management, data security protocols, and system troubleshooting, enhancing technical understanding and cross-department collaboration.
- Assisted the IT department in setting up and configuring computers** for data accessioners, ensuring secure access to patient records and improving workflow efficiency.

PROJECTS

RRRequestor | *HTML, Bootstrap, Python, Flask, MySQL*

August 2024 – December 2024

- Designed a request management system that **reduced approval processing time by 50%**, streamlining IT workflows.
- Developed a responsive UI using HTML & Bootstrap, improving usability for **1,000+ students and faculty**
- Automated survey submission and request processes, **eliminating 100% of manual PDF-based workflows**.
- Enabled students and faculty to view real-time status updates on their submissions and requests, improving transparency and reducing follow-up inquiries.
- Employed Agile methodologies to prioritize user requirements and deliver iterative improvements, enhancing user experience and operational efficiency for Wayne State's IT department, boosting efficiency by **20%**.

Windows Server

February 2025

- Designed and deployed a fully functional Active Directory (AD) environment with DNS and DHCP, installing and managing Active Directory Domain Services (AD DS) while promoting servers to domain controllers
- Configured and enforced Group Policy Objects (GPOs) using PowerShell to enhance security, automate administrative tasks, and manage user accounts, groups, and Organizational Units (OUs) in a simulated enterprise environment
- Administered Microsoft Server and configured Hyper-V virtualization to optimize server performance, create virtualized domain controllers, and ensure redundancy for testing environments

PWVault | *React.js, Java, MySQL*

March 2025 – Present

- Secure Credential Storage: Built a **password manager** using **React.js for the frontend, Java for the backend, and MySQL for database management**, ensuring encrypted storage of user credentials.
- Encryption & Security: Implemented **AES-256 encryption** for password storage, minimizing unauthorized access risks.
- AI-Powered Password Recommendations (Upcoming Feature): Developing an **AI-based password strength analyzer** to suggest stronger, more secure passwords based on user patterns and security best practices.
- User Authentication & Access Control: Designed a **secure login system with multi-factor authentication (MFA)** for enhanced security.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R, Powershell, Bash

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI, Spring Boot

Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Microsoft Azure Administration, VMware, Active Directory, Wireshark

Certification: CompTia Security+
