

Konda Rahul

Java Full Stack Developer

Albany, NY | +1 (518)-953-7911 | rahul.konda@itjobmail.com | LinkedIn

SUMMARY

- Experienced Java Full Stack Developer with 4+ years in software analysis, design, development, implementation, and testing of object-oriented and web-based enterprise applications.
- Proficient in Agile/Scrum methodologies and skilled in UI development using HTML, CSS, JavaScript, jQuery, AngularJS, NodeJS, and ReactJS.
- Expertise in building distributed, secure, and scalable applications with J2EE technologies, including Servlets, JDBC, JSP, Struts, Spring Boot, Spring MVC, and AWS.
- Strong background in developing SOAP and RESTful web services, with hands-on experience in relational and NoSQL databases such as PostgreSQL, MySQL, and Oracle.
- Familiar with build tools like Ant, Maven, and Gradle for efficient application deployment.

SKILLS

Methodology: SDLC, Waterfall, Agile

Programming Languages: Java, PL/SQL

Frameworks: Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA, Node.js, React.js, Angular JS

J2EE Technologies: Servlets, JSP, JDBC, JUnit, JMS, Multi-threading, EJB, JavaBeans, JSF, JSTL, Generics, Concurrency, and Collections

IDEs: IntelliJ IDEA, Eclipse, Visual Studio Code

Web Technologies: HTML5, CSS3, JavaScript, RESTful APIs, GraphQL, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap

DevOps: Docker, Kubernetes, Jenkins, Bamboo, Ansible

Cloud Platforms: AWS, Azure, Google Cloud Platform (GCP)

Databases: Oracle, MySQL, SQL Server, DB2, PostgreSQL, MongoDB, Cassandra, Cosmos DB, DynamoDB

Version Control & Other Tools: Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant

Testing and Logging Tools: Junit, Mockito, Selenium, TestNG, Power Mock, JMeter, Jest, Enzyme, Cucumber, Log4J

Soft Skills: Effective verbal and written communication, Problem-solving, and Troubleshooting skills

Operating Systems: Windows, Linux, Unix

EXPERIENCE

State Street, USA | Java Full Stack Developer

Jan 2024 - Current

- Engaged in Agile (Scrum) methodology, contributing to design, development, and User Acceptance Testing.
- Developed Angular directives, expressions, routing capabilities for bookmarking, filters, validations, and Angular UI components, enhancing application functionality.
- Utilized Spring Boot to accelerate cloud microservices development and simplify Spring-based application configurations.
- Created front-end screens using React.js with NPM components and Redux for state management.
- Engineered unit and integration tests for Java applications, achieving 95% test coverage and reducing production defects by 30%.
- Integrated Express.js, a fast and lightweight web framework for Node.js, to manage server and routing operations efficiently.
- Applied jQuery, React, Bootstrap, JSON, Ajax, and DOM scripting to develop interactive web applications, including message posting and auto-complete forms with secure validations.
- Structured SQL queries to define tables and implement business logic within the Oracle database.
- Deployed Spring Boot-based microservices in Docker containers using Amazon ECS, optimizing scalability and resource management.

DXC Technology, Chennai, India | Associate Professional Software Engineer

June 2020 - Aug 2022

- Engineered Microservices and APIs using Spring Boot, integrating Apache Kafka for efficient messaging.
- Optimized application performance by leveraging Spring Core (IOC), Spring AOP, and Spring JDBC.
- Designed and implemented Microservices architecture using Spring framework, Hibernate, and RESTful web services.
- Developed Serverless Microservices with AWS Lambda and Node.js for scalable cloud solutions.

- Transformed multiple pages into a seamless single-page application using Angular and TypeScript.
- Crafted dynamic and responsive web pages using HTML5, CSS3, jQuery, JavaScript, and frameworks like Angular, Vue.js, and React.js.
- Automated builds and deployments with Maven and deployed applications on Tomcat Webserver.
- Created high-performance RESTful APIs in Java for seamless third-party integration, reducing integration time by 50%.
- Built and deployed server-side modules and front-end components on AWS Compute Cloud for enhanced scalability.
- Implemented MongoDB for efficient user-generated data storage and retrieval.
- Developed robust unit test cases with JUnit and Spock, ensuring high code reliability and maintainability.

Cybage Software, India | Java Full Stack Developer

April 2019 - May 2020

- Established in Micro Services architecture and used technologies like Spring framework, Hibernate, and RESTful web services.
- Leveraged Express.js to design and develop RESTful APIs in Node.js, implementing CRUD operations, request validation, and error handling.
- Developed Web Pages by using HTML5, CSS3, jQuery, and JavaScript, and working knowledge of Angular, and React.js
- Extensively used jQuery, React, Bootstrap, JSON, AJAX, and DOM scripting to create interactive web applications like message posting and auto-complete forms for secured validations.
- Implemented Kafka consumers in Java to subscribe to Kafka topics and process incoming messages or events.
- Utilized Kubernetes Services to expose applications internally or externally, providing service discovery and load balancing for client requests.
- Deployed the backend application and database service on AWS EC2 and put the frontend files in AWS S3 for backend fetching.
- Wrote database interaction code and used JDBC API to connect MySQL.

EDUCATION

Master in Computer Science

The College of Saint Rose, Albany, NY

Bachelor in Computer Science and Engineering

Sathyabama Institute of Science and Technology, Chennai, India
