

Lakshmi Panchadi

Leander, TX, 78641 | lakshmi.paidi@outlook.com | (630)888-1388

A seasoned and result oriented **Adobe Experience Platform/ Adobe Journey Optimizer developer**. With 13 years of experience leading digital and marketing transformations, I'm a cross-industry expert in driving customer engagement. My diverse skill set spans functional requirements, technical deliveries, and solution architecture, all focused on an experience-led approach. I believe the needs of customers, marketers, and employees should guide technical decisions, leading to truly impactful solutions.

- As a subject matter advisor, I bring thought leadership on **customer experience, marketing technology, and digital assets**.
- I excel at designing and implementing solutions using Adobe Experience Cloud, including **RTCDP, AJO, CJA, Analytics, Data Collection, and Target**.
- Proven expertise in **data governance**, ensuring compliance with regulations like **GDPR** and **HIPAA**, while maintaining data integrity and security across enterprise systems.
- Skilled in designing and implementing frameworks and scalable data integration solutions for **Financial, Retail, and Healthcare domains**.

TECHNICAL EXPERIENCE:

Adobe Ecosystem: Adobe Data Collection (Adobe Launch), Adobe Analytics, Adobe Experience Platform (AEP), RT-CDP, Adobe Journey Optimizer (AJO), Offer Decision Engine (ODE), Customer Journey Analytics, Adobe Runtime, Adobe I/O, Web/ Mobile SDK Implementation, Adobe Workfront.

Campaign Channels: Email, SMS, Message Center, Push Notification, In App, Direct Mail.

Analytics & Reporting: Tableau, Power BI, Qlik sense, SSIS, SAS, ETL, Data Model, ERD, DataDog, CloudWatch.

Tools: Adobe Dreamweaver, Visio, Miro Board (Creative Mapping) Jupyter notebook, Anaconda, Jira.

APIs/ Databases: SQL Server, Oracle, MongoDB, Teradata Studio, ESS-Base, Rest API, SoapUI.

Languages: Python (NumPy, Pandas, Seaborn), SQL, HTML, CSS, Javascript, Handlebars (Personalisation), PL/ SQL.

Analysis/ ML: Univariate analysis, Bivariate analysis, Exploratory Data Analysis, Decision Trees, Pruning, Bagging and Random Forest, Boosting, Model Tuning, Business Recommendations.

EDUCATIONAL QUALIFICATION:

- Post Graduate Program in Artificial Intelligence and Machine Learning: Business Applications from **UT Austin McCombs**.
- Bachelor's Degree in Technology, specialized in Electronics and Communication from JNTU, India.

CERTIFICATION:

- Certified Adobe RT-CDP Developer Expert
- Certified Adobe Journey Optimizer Developer Expert.
- Mastering Big Data Analytics Certified from UT Austin McCombs.
- Tableau and SAS training by Walgreen Co.

PROFESSIONAL EXPERIENCE:

Adobe Inc.

Senior Engineer

April 2024 – Present

Utilized expertise in Adobe Experience Platform (AEP), Customer Journey Analytics (CJA), and Adobe Journey Optimizer (AJO) to deliver exceptional technical support to customers, ensuring seamless product adoption and maximum ROI.

- Designed and implemented various technical objects in AEP, including data schemas, custom field groups, data sets, data flows, segments, data imports, and data export mechanisms.
- Integrated AEP with S3 and SFTP buckets, creating connections and setting up queries for the Marketing team to leverage the **AEP Data Lake**.
- Implemented **Email, SMS, and Push Notification channels**, ensuring compliance with **IP warming protocols** and testing the email with **litmus testing** for responsiveness across cross platform and **accessibility testing** using tools like JAWS and NVDA.
- Utilized **Dynamic Content** and Reusable Templates (**Fragmentation**) into AJO, streamlining scalable communication strategies across campaigns.
- Implemented end-to-end real-time (RT) email integration with Web/Consumer Engagement and custom Web Applications built on the Adobe Cloud platform.
- Developed a modern Marketing Platform to onboard data from multiple sources into AEP, enabling targeted marketing through Adobe Campaign Classic using **Journey Orchestration**.
- Enabled Streaming and Batch Ingestion, exporting segment data by creating accounts for sources and destinations, datasets, and dataflows.
- Utilized **Platform APIs** for tasks such as schema registry, segmentation services, flow services, data prep, and data services.
- Created import workflows to load data from flat files in SFTP into ACC.
- Designed and implemented business-focused integrated marketing journeys using complex data feeds and streaming inputs.
- Developed data sets from schemas or CSV files, enabling data unification in the profile store.
- Extended existing schemas by creating custom fields or new field groups.
- Provided expert-level technical support and troubleshooting for **AEP, CJA, and AJO via phone, email, and chat**.
- Resolved complex customer issues, including data integration (XDM Schemas and Datasets), analytics, and journey optimization challenges.
- Collaborated with internal teams (**Engineering, Product Management**) to resolve customer issues, improve product quality, and inform product roadmap
- Developed and maintained **technical documentation, knowledge base articles, and best practices**.
- Mentored junior engineers, sharing expertise and best practices to enhance team performance
- Stayed current with new product features, technologies, and industry trends, applying knowledge to improve customer outcomes.

Environment: Adobe Experience Platform (AEP), Adobe Journey Optimizer (AJO), Adobe Customer Journey Analytics (CJA), XDM Schemas, Datasets, Journey Optimization, Data Integration, Analytics

Wells Fargo

AEP/ AJO SME

Jan 2020 – March 2024

Wells Fargo is a leading financial services company that has been providing a diversified set of banking, investment and mortgage products and services, as well as consumer and commercial finance, through four reportable operating segments: Consumer Banking and Lending, Commercial Banking, Corporate and Investment Banking and wealth and Investment management. Being part of Contact center analytics delivery solution team and developed end to end customer journey mapping, IVR dashboard, behavioral call routing, analyze and initiate strategies to reduce unnecessary interaction/calls from digital high frequent callers and short-term capacity planning model development.

- Spearheaded the **implementation of Adobe Experience Platform (AEP)** for customer data management, designing schemas and datasets to unify data from enterprise systems such as CRMs and data warehouses.
- Configured Identity Stitching in Adobe Experience Platform using Identity Graphs and Union Schema to unify data from multiple sources into a single customer profile, ensuring accuracy and eliminating **duplication of the profile**.
- Configured **Offer Decision Engine** within Adobe Journey Optimizer to deliver dynamic, contextually relevant offers in real-time across multiple channels.
- Developed **audience segmentation logic** to enable targeted marketing campaigns, exporting segments to platforms like Google Ads and Facebook through **AEP destination flows**.
- Automated **data quality alerts** using Adobe Runtime and integrated monitoring with DataDog to proactively identify and resolve dataflow or destination export issues.
- Designed and deployed **multi-channel customer journeys** for campaigns including re-engagement, reward-based offers, and promotional workflows using AJO.
- Configured event-driven triggers and audience-based workflows, leveraging real-time data from AEP to dynamically personalize journeys.
- Configured Custom Events, Custom Actions based on the use case as per the requirement.
- Worked closely with Adobe technical teams to enhance API thresholds, optimizing system performance for large-scale operations supporting millions of customers.
- Leveraged **Adobe Query Service** to schedule and export enriched data for downstream processes, enabling advanced reporting and analytics.
- Documented workflows and test cases in **Confluence** and **SharePoint**, ensuring knowledge sharing and alignment across teams.
- Implementation of the various technical objects like data schemas, custom field groups, data sets, data flows, segments, data imports and data export mechanism, integration with S3, SFTP buckets creating connection, setup queries to be used by the Marketing team for querying the AEP Data Lake

Environment: Adobe Experience Platform (AEP), Adobe Journey Optimizer (AJO), Identity Graphs, XDM Schemas, Audience Segmentation, Multi-channel Campaigns, Email, SMS, Push Notifications, AWS S3, SFTP, APIs, Adobe Runtime, DataDog, Accessibility Testing, Litmus Testing, Agile Scrum, Jira, Confluence, SharePoint, IP Warming.

Cole-Parmer

Senior Business Intelligence Analyst

June 2017 – Jan 2020

Cole-Parmer has been a leading global source of laboratory and industrial fluid handling products, instrumentation, equipment, and supplies. Being part of the Finance & Audit team as a key liaison for business partners and managing the finance data, metrics, reporting, visualization, revenue forecasting and root cause analysis. The key responsibilities include:

- Develop and manage finance dashboards, reports and visualizations to effectively present data and support company KPI's using business intelligence tools – Qlik, SAS and Microsoft.
- Involved in driving financial performance and company growth through regular reporting and forecasting for company sales and gross margin.
- Performs data analytics to support business operational challenges. Analyze data for patterns, trends, and meaningful relationships and articulate findings to business partners.
- Extensive knowledge as a Tableau Developer and Server Administrator with strong understanding of Tableau Architecture, providing the best practices for deployment and maintenance of Enterprise class dashboards on Tableau Server and Cloud.
- Extensively involved in design and development of Tableau visualization solutions using Technical

Environment: QlikView, Qlik Sense, Qlik NPrinting, SAS, SQL server, Salesforce, Power BI, Microsoft Tools

Walgreens Inc.

Retail Operations Analyst

November 2015 – March 2017

Part of Retail Operations advance analytics team that provides deep insights into fraud identification, financial hits that occur as a result of waste, inventory loss and unexpected costs in day-to-day business.

- Leverage data visualization and analytics tools to provide insights into Waste, Shrink and Fraud.
- Turn business user descriptions of risky cashier patterns and fraudulent scenarios into exact logical flow.
- Support business operations teams with data acquisitions and/or business analyses, e.g. Inventory adjustments vs. physical inventory shrink, controlled substance dispensing.
- Building, publishing customized interactive reports and dashboards, report scheduling using Tableau server.
- Created Relationships, actions, data blending, filters, parameters, hierarchies, calculated fields, sorting,
- groupings, live connections, and in-memory in both tableau and excel. Experience in creating different visualizations using Bars, Lines and Pies, Maps, Scatter plots, Gantt, Bubbles, Histograms, Heat maps with Tableau desktop.

Environment: SAS EG, Tableau 10.1, SQL, PL/ SQL, Microsoft Tools, Python, Azure AD.

Senior Analyst – Specialty Pharmacy

October 2013 – October 2015

Responsible for developing KPI's that measure performance, effort, and planning for monthly, year to date for all speciality disease states. Also responsible for collecting and organizing various pharmacy data and create a data platform to develop reports and sales insights on infusion, speciality businesses, promotional response, and finance reports etc.

- Comprehensive experience in identifying, prioritizing, planning, executing and delivering analytical projects that drive demonstrable value across pharmacy marketing and sales force domain.
- Worked collaboratively with sales/marketing management to identify and target new opportunities.
- Processed third party data and managed adjudication reviews.
- Created monthly data integration file that consists of all channel's monthly specialty utilization. This includes Retail and Central Fill Specialty Utilization from both Script med and IC+

- Used the REST API with Tableau server to manage and change Tableau server resources programmatically.
- Developed donut charts and implemented complex features in charts like creating bar charts in tooltip.
- Dashboard/report migration across environments (Dev> QA > Prod).

Supply Chain Analyst

October 2011 – February 2013

Worked in Supply Chain Analytics team and developed tools and reports that helped saving about \$35M. Developed reports for business users and supply chain executives to view the KPIs and monitor the business processes to identify the in-stock root causes.

- Understand the business requirements, prepare High-level designs and technical specifications.
- Perform SQL reviews and tune them for better performance by using Query optimization using database utilities including table load and unload.
- Set up ETL process for reports and helped the analytical team on data extraction and analysis.
- Created UNIX scripts in scheduling the reports.
