

Manisha Battu

Software Engineer

manishabattu.fsd@gmail.com | 862-505-9082 | Celina, TX | LinkedIn

SUMMARY

Results-driven Software Engineer with 5+ years of experience in both front-end and back-end development, microservices architecture, and cloud computing. Proficient in front-end technologies like JavaScript, React, Angular, and HTML/CSS, as well as back-end technologies including Node.js, Python, and Ruby on Rails. Expertise in building RESTful APIs, GraphQL services, and event-driven architectures (Kafka, RabbitMQ). Strong background in cloud platforms (AWS, GCP, Azure), containerization (Docker, Kubernetes), and CI/CD automation (Jenkins, GitHub Actions). Adept in creating dynamic and responsive user interfaces with React.js and Angular. Skilled in SQL & NoSQL databases (PostgreSQL, DynamoDB, MongoDB), ensuring optimal data processing and storage. Passionate about delivering end-to-end solutions that enhance performance, optimize costs, and increase user engagement.

PROFESSIONAL EXPERIENCE

Software Engineer

InComm

01/2024 – Present | Remote, USA

- Developed full-stack solutions using Java (Spring Boot) and React.js, optimizing both back-end API response times by 35% and front-end performance with a dynamic, real-time dashboard for executive teams.
- Developed a full-stack InComm site with a React front-end and Node.js back-end. Integrated payment gateway and real-time inventory updates.
- Created dynamic, interactive web pages with HTML5, CSS3, and JavaScript (ES6+), improving user experience and increasing user retention.
- Designed and implemented a microservices architecture leveraging FastAPI and Spring Boot, ensuring efficient service communication using Apache Kafka & RabbitMQ.
- Created RESTful APIs and GraphQL endpoints, enhancing data retrieval speeds by 35%. Built user interfaces using React.js, ensuring a seamless and engaging user experience.
- Deployed cloud-native applications on AWS (EKS, Lambda, S3, RDS) and GCP (GKE, Cloud Run), ensuring high availability and scalability. Automated CI/CD pipelines using Jenkins and GitHub Actions, improving deployment times by 50%.
- Improved application security by integrating OAuth2 and JWT-based authentication and implementing AWS IAM role-based access control.
- Leveraged Docker and Kubernetes to containerize applications and orchestrate deployments, minimizing downtime and enhancing scalability.

Software Engineer

Genpact

10/2019 - 08/2022 | Hyderabad, India

- Developed a real-time collaboration platform using Angular for the front-end and Node.js for the backend, incorporating WebSockets for live communication.
- Built and maintained event-driven systems with Kafka and RabbitMQ, improving system reliability and reducing latency. Implemented serverless computing with AWS Lambda, cutting cloud costs by 30%.
- Designed and developed interactive Power BI dashboards for real-time data visualization, integrating with backend systems built on AWS and GCP.
- Developed and maintained front-end features for large-scale e-commerce applications using Angular and JavaScript.
- Created user-friendly, responsive interfaces with React.js, ensuring seamless integration between the front-end and back-end systems.
- Established Terraform-based infrastructure automation for rapid provisioning and management of cloud resources.
- Integrated unit and integration testing frameworks (JUnit, PyTest, Postman), achieving 95% test coverage and ensuring high system reliability.

Software Engineer

Infosys

11/2017 – 10/2019 | Hyderabad, India

- Engineered both back-end APIs and front-end components for a high-traffic e-commerce platform, leveraging Node.js (Express), Java (Spring Boot), and React.js for optimal user experience and system performance.
- Built scalable microservices for handling over 1 million transactions/day using Spring Boot and DynamoDB.
- Designed and deployed serverless solutions using AWS Lambda, API Gateway, and DynamoDB, improving application scalability and reducing operational costs by 20%.
- Developed and maintained web applications using Angular 2+ and Node.js.
- Developed real-time recommendation engines and data-driven user interfaces, integrating AWS SageMaker for machine learning-powered insights.
- Developed interactive websites using HTML, CSS, and JavaScript, improving user engagement.
- Implemented security best practices such as SSL/TLS encryption, IAM roles, and multi-factor authentication (MFA), significantly enhancing application security.
- Implemented various CSS frameworks (Bootstrap, Foundation) to enhance cross-browser compatibility.

TECHNICAL SKILLS

- **Backend Development:** Java (Spring Boot, Hibernate), Python (FastAPI, Flask, Django), Node.js (Express.js, NestJS)
- **Frontend Development:** React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Apache Cassandra
- **DevOps & Cloud Computing:** AWS (EC2, S3, RDS, Lambda, IAM, CloudFormation), GCP (BigQuery, Cloud Storage, GKE, Pub/Sub), Azure (Azure SQL, Blob Storage, Kubernetes Service)
- **Containerization & Orchestration:** Docker, Kubernetes, Helm, OpenShift, Terraform
- **CI/CD & Infrastructure Automation:** Jenkins, GitHub Actions, GitLab CI/CD, Ansible, AWS CodePipeline, Azure DevOps
- **Security & Authentication:** OAuth2, JWT, Role-Based Access Control (RBAC), Multi-Factor Authentication (MFA)
- **Testing & Monitoring:** JUnit, PyTest, Selenium, Postman, Grafana, Prometheus, Splunk
- **Other Tools:** Git, JIRA, Confluence, Apache Kafka, RabbitMQ, ELK Stack (Elasticsearch, Logstash, Kibana)

EDUCATION

Master of Science (Computer Science) from University of Bridgeport, CT

08/2022 – 05/2024

Bachelor of Technology (Electronics & Communication Engineering) from Sphoorthy Engineering College, India

09/2013 – 06/2017
