WORK EXPERIENCE

Senior Business Data Analyst: Symphony AI, Remote

July 2023 – Present

- Partnered with Retail clients like **Kroger, Ahold Delhaize, Whole Foods, MJ Holdings, and Sobeys** to **gather requirements, define problem statements**, and design tailored analytical approaches.
- **Led pilot programs** for Kroger, MJ Holdings Sobeys and successfully converted to rollouts from 20 stores to 3000+ stores while **managing a data team of 18 members**. **Oversaw end-to-end processes** including stakeholder management, data validation, data ingestion using AWS, and delivering actionable analysis and reporting to clients.
- Translated analytical findings into clear, client-ready presentations and strategic recommendations that supported data-driven decision-making.
- Fostered strong, long-term relationships with clients by **understanding their business goals** and aligning Symphony AI Retail solutions to meet their operational and strategic needs.
- Maintained **ownership of client project timelines** and **monitored all phases of the project life cycle SDLC, Kanban, Agile**, regularly updating leadership on project milestones, risks, and key deliverables.
- Collaborated cross-functionally with Solutions, Product, and Data Engineering teams to ensure seamless implementation of product features and timely execution of customer configuration requests.
- Translated business requirement and user expectations into detailed specifications using **Flow charts** using **Lucid charts** and **presentations** in PowerPoint.
- Monitored customer satisfaction and product adoption, **identifying opportunities for improvement** and promoting expanded solution usage.
- Provided **comprehensive training** to field representatives by creating **PowerPoint presentations** that explained product workflows, ensuring seamless execution of tasks on-site.
- Conducted **weekly client calls** to present performance updates, highlight issues and resolutions, share **key metrics**, and communicate timelines for upcoming feature deployments.
- Utilized **AWS S3** to efficiently extract, manage, and analyze large datasets for data-driven insights and reporting.

- Developed and maintained **PostgreSQL scripts** to monitor **data quality, automation and operational efficiency** during daily processing cycles.
- Analyzed client datasets to derive actionable insights, solve complex business problems, and deliver targeted recommendations aligned with strategic objectives.
- Performed thorough **testing of new features in lower environments** prior to go-live, ensuring functionality, performance, and data integrity across use cases.
- Created and maintained **interactive Tableau dashboards**, and visualizations, to support strategic initiatives and executive reporting.
- Managed **ad-hoc data requests** through **Jira** for multiple clients, supporting day-to-day ingestion processes and delivering custom data exports.
- Utilized **Confluence to document** new feature implementations, data ingestion processes, RTM workflows, and client-specific configurations, ensuring transparency, cross-functional alignment, and easy access to up-to-date project knowledge.

Senior Business Data Analyst: Lending Science, Atlanta, GA

Mar 2023 – July 2023

- Performed end-to-end marketing campaign analysis for **financial and insurance clients** to define selection criteria, track customer behavior, and identify high-potential 'in-market' prospects.
- Executed data selections and managed the fulfillment of marketing orders across multiple campaigns, maintaining historical records and documentation in Excel for auditing and future optimization.
- Analyzed **key performance indicators** such as response rate, conversion rate, and average enrolled debt to evaluate campaign success and generate actionable recommendations.
- Designed and **implemented Tableau dashboards** for leadership, to view the metrics and make decisions.
- Utilized **SQL to streamline campaign processes** and improve targeting efficiency.
- Presented monthly campaign performance and insights to senior leadership, highlighting portfolio outcomes and strategic improvements.
- **Delivered client-facing reports** and visualizations to communicate campaign results and guide future marketing strategies for Medicare (Age-In, DSNP) and financial products.

Business Data Analyst, Revenue Management: Public Storage, Glendale, LA

Sept 2021 – Jan 2023

- Led a team of 12 employees, facilitating daily stand-ups, sprint planning, technical reviews, and retrospectives in an **Agile environment** to ensure smooth project execution.
- Directed the Automation Pricing Model project in collaboration with Data Science, Development, and Marketing teams, improving operational efficiency.
- Developed **process flow diagrams** in Visio and Lucid chart and **created training documentation** in Confluence, Excel, and PowerPoint, enhancing team productivity.
- **Increased revenue-generating** effectiveness and portfolio expansion **by 3.5%** through strategic pricing decisions.
- Managed pricing for 45% of the company's portfolio, driving profitability through data-driven pricing strategies.
- Designed and **implemented Tableau dashboards** for leadership, enabling real-time tracking of sales and profitability metrics.
- Conducted **weekly scrum calls** with internal stakeholders to present performance updates, resolve issues, share key metrics, and provide timelines for upcoming deployments.
- Analyzed consumer behavior, pricing, and marketing metrics using **SQL**, facilitating informed decisions that enhanced revenue per property and customer retention (LTV).
- **Developed analytics and strategies** for managing pricing across the company's portfolio, resulting in increased move-ins, revenue growth, and occupancy rates.
- Evaluated demand strength through analytics, KPI analysis, competitor intelligence, demographic data, and historical trends to optimize product offerings.
- Performed **ad-hoc analysis and A/B testing** to continuously optimize strategies and improve performance.
- Maintained **Business Requirement Documents (BRD)** and functional specifications in Confluence, enabling quicker onboarding for new team members

Business Data Analyst: SPH Analytics, Atlanta, GA

Aug 2018 - Sept 2021

- Analyzed **hospital and healthcare data** from multiple sources to ensure compliance with reporting requirements
- Design and produce **graphic-based research online portals** and reports to identify and display results of research, and tabular representation of findings to support the client's understanding and decision making.
- Coordinate with team members to ensure that all aspects of the data and report are accurate and consistent.
- Conduct complex data analysis and detailed **reporting using Tableau** for multiple projects to determine operational impact, trends and opportunities.
- Applied **quantitative analysis**, using **SQL** coupled with **SPSS**, to provide data-driven insights summarizing the **KPI's**
- Completed **report automation process** with team using **SQL** to improve turnaround time and reporting capabilities

Business Data Analyst: Togglebytes Technologies, Mumbai, India

Jun 2017 - Aug 2017

- Contributed by communicating with the team to build interactive marketing dashboards and visualization for clients using **Tableau** to get insights on marketing leads and campaign performance
- Developed marketing campaigns by launching new Ads and optimizing existing campaigns based on the KPI

Junior Business Data Analyst: The Tuck Box LLP, Mumbai, India

Feb 2015 - June 2016

- Streamlined analyses of food supply chain data, increasing accuracy and forecasted revenue projections by 20%.
- Compiled monthly and quarterly reports to hold brief staff presentations on business growth.
- Triggered a 9% increase in sales by analyzing data with the help of POS and creating ad-hoc reports. Identified KPIs to create better customer experience, understand sales, manage inventory and defined cost analysis

EDUCATION

Masters in Management Information Systems, 3.8 GPA, Northern Illinois University, IL, United States

May 2018

Bachelor of Engineering in Information Technology, 3.4 GPA, University of Mumbai, India

May 2016
