SUMMARY

Results-driven Senior IT Solutions Architect and Program / Project Manager with 29 years of experience in corporate, financial, and government enterprises. Expertise in business improvement, program and project management, ICT applications, service enhancement, quality assurance, and systems development. Adept at leading process-oriented organizations with a customer-centric approach. Proven ability to translate complex business requirements into cost-effective and resilient solutions. Passionate about driving success through collaboration, problem-solving, and innovative technology strategies.

EXPERIENCE

*Nordcloud Hosting Sweden AB (An IBM Company), **Senior Presales Solutions Architect***

Nov 2022 - Present

Solution Design, SOW and Business Development:

Working closely with sales to lead client solution design, demos, and presentations for cloud services (AWS, Azure, GCP), translating business requirements into technical SOWs with clear deliverables, timelines, and pricing.

Achieved a 40-50% win rate in new business and 80-90% renewal success, demonstrating expertise in scoping and positioning tailored solutions.

Strategic Account Management:

Deep discovery and relationship building to understand and address customer pain points.

Conducted executive workshops to understand business goals.

Mapped IT decision-makers (CIO, CISO, CFO) and built trust through regular check-ins.

Managed Services & Professional Services:

Designed cloud migration strategies (lift-and-shift, re-platforming, re-architecting) with SOWs covering implementation, governance, and ongoing managed services (e.g., cost optimization, security compliance), leveraging tools like Terraform, Ansible, CloudFormation, and scripting with Python or Node.js.

Collaborated with cross-functional teams (Finance, IT, Business) to align SOWs with cost models (FinOps) and client objectives.

Led data migration project for a large enterprise, achieving a 32% reduction in downtime by implementing a robust migration strategy using Snowflake and Azure.

Risk & Compliance:

Conducted technical risk assessments and mitigation planning, ensuring SOWs addressed SLAs, uptime (99.95%+), and regulatory requirements. Provided cost-effective cloud solutions, aligning Finance, IT, and Business teams.

Cloud Architecture & Infrastructure Engineering

Extensive expertise in designing end-to-end cloud infrastructure (compute, storage, network, middleware) for scalable, high-availability solutions.

Proficient in architecture standards, disaster recovery (DR), performance tuning, and seamless operations handoff.

Hands-on experience with AWS, Azure, and GCP, including containerization (Docker/Kubernetes), serverless computing, and microservices.

Cloud Cost Optimization & Governance

Skilled in using tools like Azure Cost Management, AWS Cost Explorer, and GCP Billing to analyze spend, eliminate waste, and implement savings strategies (reserved/spot instances, right-sizing).

FinOps Certified Practitioner with a track record of aligning cloud costs with business objectives, achieving 40-50% win rates in cost-effective solutions.

Experience automating cost governance via Terraform, Ansible, and scripting (Python/Node.js), ensuring sustainable, well-documented processes.

Strategic Leadership & Accountability

Owned and optimized cloud budgets for large enterprises (e.g., reduced downtime by 32% during migrations, maintained 99.95% + uptime at Nasdaq).

Architectural mindset: Translates business needs into cost-aware designs, quantifies automation value, and identifies optimization opportunities.

Proven ability to influence decisions with financial impact, including investor relations and restructuring initiatives (e.g., 40%+ revenue growth as CEO).

Cross-Functional Collaboration

Bridges gaps between finance, engineering, and business teams through clear communication and executive workshops.

Strong presentation skills: Confidently explains technical strategies to leadership (e.g., presales demos with 80-90% renewal success at Nordcloud).

Retail-adjacent experience (hospitality sector) with 24/7 system support, resiliency focus, and compliance with GDPR/CCPA.

Strengths

AI/ML familiarity: Leveraged generative AI and Power BI for business intelligence.

Retail-like cyclical demand management (e.g., seasonal hotel operations).

ITIL-certified with expertise in SLA authoring, risk mitigation, and regulatory standards (ISO, FDA).

*Charlottenlund Hotel & Restaurant, Sweden, **CEO & Founder***

Dec 2016 - Mar 2022

Managed hotel and restaurant business development operations via private cloud, achieving 40%+ revenue and margin growth.

Led restructuring initiatives, investor relations, and brand overhauls.

Ensured compliance with business regulations and customer service excellence.

Develop and maintain cloud architecture blueprints, ensuring alignment with business development objectives and long-term IT strategy.

Lead the migration of on-premise systems to cloud platforms, utilizing lift-and-shift, re-platforming, and re-architecting strategies.

*Nasdaq, Stockholm, **Senior Technical Account Manager***

Mar 2013 - Dec 2018

Managed technical aspects of Nasdaq's vendor relations, IT support, and cloud operations.

Achieved a 26% reduction in technical issues through ITIL optimization.

Led IT service enhancement and business development initiatives with presales presentations and ongoing support and management of stakeholders.

Ensured 99.95% system uptime with SLA authoring and contract performance reviews.

Strong written and oral communication skills, with the ability to tailor messages for diverse audiences and present confidently to executives.

Experienced in Change Risk Management, including identifying, assessing, and mitigating risks to ensure successful project adoption and sustainability.

*Rg19, Stockholm, **Enterprise Architect & Integration Specialist***

Jan 2011 - Mar 2013

Managed 40+ system upgrades and cloud migrations, enhancing compliance and cost savings for cloud platform solutions (AWS, Azure, GCP).

Designed and managed off-grid and redundant data centres, implementing BGP, OSPF, MPLS, and VXLAN for PaaS / HaaS offerings.

Design and implementation of enterprise and federated Active Directory structure for VMware/Vsphere environments.

Oversaw IT budgets, maintaining a variance objective of no more than 2%.

Ensured GDPR, CCPA, and BCBS239 compliance for IT solutions.

*Scarlett Weddings, Stockholm, **IT Project Manager / Cloud Consultant***

May 2012 - Dec 2012

Led Office 365 migration and cloud infrastructure setup.

Improved inventory management via digital transformation strategies.

Provided technical training and IT risk mitigation strategies.

*Public Health England, London, **Internal IT Consultant & Systems Manager***

Nov 2003 - Mar 2012

Designed enterprise-wide IT solutions (on-prem and cloud), managing a £2,000,000 budget.

Enhanced service request systems and IT workflow automation.

Ensured IT compliance with FDA, ISO 20000, and 9001 standards.

*Burberry Group PLC, London, **Senior Project Manager***

May 2001 - Oct 2002

Led a £6 million IT infrastructure migration across 2,500+ global users.

Managed cross-functional IT projects, ensuring system security and performance.

Oversaw Microsoft Exchange migration and disaster recovery enhancements.

Redbridge & Waltham Forest Health Authority, Ilford, London, **Technical Support Manager**

Jan 2001 - Apr 2001

Andean American Gold Ltd, Vancouver, **Project Administrator**

Jun 1998 - Dec 2000

El Misti Gold Limited, Vancouver, **Network Team Leader**

Dec 1995 - May 1998
