

SACHIN PATEL

SOFTWARE DEVELOPER | SACHINPATEL2193@GMAIL.COM | +1-226-606-9730 | LINKEDIN

PROFESSIONAL SUMMARY

- **6+ years** of experience in designing, developing, implementing, and supporting Java-based applications, microservices, and cloud solutions.
- Strong expertise in Agile methodologies, SDLC, and cross-domain software engineering.
- Architected and deployed multiple enterprise-level microservices, resulting in a 30% improvement in system scalability and performance.
- Proficient in developing RESTful APIs, integrating cloud technologies (AWS, GCP), and managing cloud infrastructure.
- Expertise in multi-threading environments and backend technologies including Java 1.8, J2EE, Spring Boot, Hibernate, and AWS serverless services.
- Skilled in end-to-end product development and post-launch support with hands-on experience in client-facing demonstrations.
- Strong proficiency in version control (GitLab, Jenkins), CI/CD pipelines, and containerization with Docker. AWS Serverless (Badge Earned, 14th August 2024) (<https://aws.amazon.com/training/badges/>)

TECHNICAL SKILLS

- **Programming Languages:** Java 1.8, J2EE, C#, .NET Core 3.1, Python, JavaScript, Node.js, Unix Shell Scripting
- **Frameworks:** Spring (Boot, Core, MVC, JPA, ORM), Hibernate, RESTful APIs, Microservices, Spring Cloud, Entity Framework
- **Cloud Technologies:** AWS (Lambda, API Gateway, DynamoDB, S3, EC2, RDS, CloudWatch, SAM, SQS, SNS, IAM)
- **Databases/DB Tools & Messaging:** MySQL, Oracle, SQL Server, PostgreSQL, DynamoDB, AWS Aurora Serverless, DBeaver, MySQL Workbench, Azure SQL, Apache Active MQ Artemis Queue, Kafka
- **DevOps Tools:** GitLab, Jenkins, Maven, Docker, Kubernetes, Git, Bitbucket
- **Web Technologies:** HTML5, CSS, JavaScript, Angular, JSP, jQuery, Bootstrap, AJAX, JSON, XML
- **Enterprise API's:** Core Java, Java EE, Servlet, JSP, JSTL, JDBC, Web Services (REST), Servlets, JavaBeans, Spring (Core, ORM, MVC), Spring Boot, Microservices, REST APIs, Hibernate, C#, .Net Core, Entity Framework
- **IDEs and Tools:** Eclipse, IntelliJ IDEA, Rider, Android Studio, PyCharm, Visual Studio Code, JIRA, Confluence, Git, GitLab, BitBucket, Jenkins, Maven, Junit, JMock, FileZilla, Google Analytics, Grafana, Postman, Talend API Tester
- **Operating systems:** MacOS, Windows, LINUX
- **Cloud Technologies:** AWS Serverless, AWS CloudWatch, AWS IAM, Lambda, AWS API Gateway, Amazon Step Functions, S3, EC2, SAM, SQS, SNS, RDS, GCP Cloud Functions, GCP API Gateway, Cloud Pub/Sub, Cloud Storage
- **Methodologies:** Agile, SDLC, Waterfall

Work EXPERIENCE

Software Developer

Nov 2024 – Continue

3Myle Logistics

- Contributed to design discussions and decision-making for new features, collaborating with cross-functional teams to ensure optimal solutions.
- Implemented and tested new features in the software, utilizing Node.js and AngularJS to deliver high-performance, scalable applications.
- Worked end-to-end on the development lifecycle, from feature development through to deployment, ensuring smooth and efficient releases.
- Collaborated with client teams to identify problems and solve the problems using software solutions.

Part-time Professor

May 2023 – Aug. 2024

Conestoga College

- Designing and delivering lectures, seminars, and workshops in the Software Development program, with a focus on web development, including JavaScript, and server-side programming languages.
- Developing course materials, including syllabus, lecture notes, assignments, and lab exercises that incorporate industry-standard tools and technologies.

- Creating and administering assessments, such as exams, quizzes, projects, and coding challenges to evaluate student learning and understanding.
- Providing feedback and guidance to students to facilitate their academic growth and success, including one-on-one meetings, group discussions, and online support.
- Supervising and guiding students in capstone projects, hackathons, and other extracurricular activities that apply theoretical knowledge to real-world problems.

Software Developer

April 2020 – Feb 2024

IMS (Insurance & Mobility Solutions)

- Designed and developed Microservices architecture using Java and Spring Boot, ensuring modularity, scalability, and high performance in enterprise applications.
- Authored technical requirements for Jira tickets, decomposing epics into actionable user stories, streamlining development processes.
- Participated and aware of all sorts of agile ceremonies – user story grooming, backlog refinement, sprint planning, sprint retrospective
- Built and optimized RESTful Web Services using Spring Boot, Spring JPA, Hibernate, and MySQL, achieving robust and scalable backend systems.
- Implemented Data Validation for server-side validation and developed REST APIs using AWS technologies, enhancing data integrity and security.
- Orchestrated the deployment of cloud solutions using AWS SAM templates and CloudFormation stacks, reducing deployment time by 50%.
- Proficient in AWS services like Lambda, API Gateway, S3, SQS, SNS, RDS, IAM, CloudWatch, DynamoDB, SAM templates
- Established GitLab and Bitbucket pipelines for the application's build, testing, and deployment processes, decreasing deployment times by 50%.
- Utilized Docker for containerization and deployment, ensuring consistency across environments and reduced deployment time.
- Developed SQL queries and Stored procedures to facilitate backend communication, utilizing JDBC effectively.
- Facilitated message publishing and consumption via Apache Artemis Queue and Amazon SQS, ensuring reliable message delivery.
- Implemented Dependency Injection between components using Spring's (IOC) concept
- Providing development support for creating a software using Java, Hibernate and Spring framework utilizing Agile methodology and SQL Server
- Developed and maintained front-end applications using Angular, ensuring responsive design and seamless user experience across platforms.
- Involved in unit testing, system testing and responsible for preparing test cases using Junit and JMock
- Mentored co-op and new joiners, fostering a collaborative and knowledge-sharing environment.
- Collaborated with QA specialists to establish automation guidelines and maintain testing scripts.

Software Developer

April 2018 – March 2020

Qualis Infotech

- Gathered business requirements and developed technical specifications in collaboration with stakeholders, ensuring clear project objectives.
- Participated in Agile methodologies and contributed to all phases of the SDLC, ensuring timely and efficient project completion.
- Developed client-side and server-side components using Java, Spring, MySQL, JSP, HTML, CSS, JavaScript, and jQuery, delivering robust applications.
- Performed extensive testing to ensure high-quality deliverables, reducing post-deployment issues by 25%.

Web Developer (Co-op)

May 2016 - Aug 2016

Web Services, Conestoga College, Kitchener, ON

| EDUCATION

Mobile Solutions Development

2015 - 2017

Conestoga College, Kitchener, ON

Computer Engineering (Bachelor of Engineering)

2011 - 2014

Gujarat Technological University, India
