

QA Automation Test Lead

Summary

- **QA Automation Lead | SDET with over 9 years of experience in the banking domain** specializing in test automation, functional and non-functional testing (performance testing), particularly in loans, equity release, and back-office operations (reconciliation).
- **Proven track record in managing and mentoring junior QA Engineers** at Charles Schwab, Phoebus for Aviva, and Finacle, delivering high-quality software solutions.
- **Extensive knowledge in Test Automation** by developing and executing automated test scripts using Selenium WebDriver with Java, Protractor with TypeScript. Designed and implemented BDD frameworks using Java and cucumber, enhancing the reusability and maintainability of test scripts. Built automation frameworks from scratch, utilizing tools like TestNG for robust and efficient test management.
- **Comprehensive testing experience** across various environments (UAT, SIT, and Pre-Prod) before production deployment. Proficient in performing database validations and backend testing using SQL Server and SQL queries to ensure data integrity and accuracy.
- **Experienced in test management tools** like Jira and HP ALM for test planning, execution, defect tracking, and generating comprehensive reports.
- **Strong background in Agile/Scrum methodologies**, working closely with cross-functional teams to ensure timely delivery of high-quality software. Participated in Change Advisory Board (CAB) meetings to assess, prioritize, and approve changes, minimizing risks in production.
- **Proficient in testing RESTful web services** using tools like Postman to ensure API functionality, reliability, and performance.
- **Provide UI/UX Feedback:** Offered feedback for UI/UX improvements and enhancements, collaborating with development and product teams to identify parameters, environment configurations, and edge cases.
- **Conduct Defect Triage Calls:** Facilitated defect triage calls to prioritize and resolve defects, ensuring critical issues are addressed promptly and effectively.

Experience

QA Automation Lead at Sainsburys, London, UK

Sep 2024- till date

Currently working as a **QA Automation Lead at Sainsburys**, where I am responsible for designing, developing, and executing automated test scripts to ensure the quality and performance of software applications. Some of my key responsibilities and accomplishments include

- Building and maintaining a robust automation framework using Selenium WebDriver and Java, allowing for efficient and reliable testing of web applications.
- Collaborating with cross-functional teams to define test requirements, identify test cases, and prioritize testing efforts.
- Executing and analysing automated test results, identifying and reporting defects, and working closely with development teams to ensure timely resolution.
- Continuous Improvement Initiatives: Drive the evolution of testing processes and frameworks, staying current with best practices in CI/CD by integrating tools like Jenkins for seamless, automated test execution. Additionally, implemented REST Assured for API testing, which broadened test coverage and streamlined end-to-end testing

**QA Automation Lead at Aviva- Phoebus software,
Solihull**

June 2022- July 2024

- Building and maintaining a robust automation framework using Selenium WebDriver and Java, allowing for efficient and reliable testing of web applications.
- Collaborating with cross-functional teams to define test requirements, identify test cases, and prioritize testing efforts.
- Executing and analysing automated test results, identifying and reporting defects, and working closely with development teams to ensure timely resolution.
- Contributing to the continuous improvement of the automation framework and test processes, implementing best practices and new tools to enhance efficiency and effectiveness.

**SDET at Charles Schwab-Mphasis limited,
Bangalore**

November 2020 — April 2022

- Collaborated with development and testing teams to design and implement automated test scripts using Selenium WebDriver and Java, ensuring comprehensive test coverage and early detection of defects.
- Developed and executed test scripts for regression testing, smoke testing, and functional testing, ensuring the stability and reliability of software applications.
- Identified and reported defects, working closely with the development team to ensure their timely resolution.
- Contributed to the continuous improvement of the automation framework and test processes, implementing new tools and techniques to enhance efficiency and effectiveness.

**Senior Software Engineer at Finacle Core Banking
-Infosys Technologies, Mysore**

December 2010 — Sept 2013

- Understanding the Functional Requirements for Projects and Releases.
- Feasibility analysis of application for automation.
- Test Plan preparation and test case estimation.
- Automation script development using IntelliJ.
- Provide solutions, debugging, execution and maintenance of scripts.
- Create Functions, Recovery Scenarios and data sheet.
- Preparation of Detailed Test conditions and Test cases.
- Planning the Test Data requirements.
- Execution of Test cases
- Defect management through Jira

Software Engineer at QualRich Labs, Bangalore

March 2008 — November 2010

- Generation of test cases, and manual testing.
- Developed Functional, Regression test Specifications.
- Test case preparation,
- Testing the application
- Involved in User acceptance and System testing.

Key Achievements:

- **Automation Framework Development:** Designed and implemented an automation framework using Selenium, BDD cucumber and TestNG, resulting in a 30% increase in test coverage and efficiency.

Skills

- Banking Domain knowledge across Payments, loans, equity release, reconciliation tool
- Core Java and Python
- Selenium, Protractor, TestNG, BDD framework
- Database Testing
- API Testing, Postman
- Jenkins for CI/CD
- Typescript, Java script

Education

Bachelor of Engineering in Electronics and Communication engineering from AIET, VTU June 2004 — May 2007

Diploma Electronics and Communication Engineering, Govt Polytechnic for Women June 2001 — May 2004
