.NET Framework 3.5, ASP.NET Applications

PROFESSIONAL SUMMARY

With over 14 ½ years of comprehensive experience in Systems Analysis, Design, Development, and Implementation of diverse applications, I specialize in Web, Windows, and Portal Applications, including SharePoint Online, SharePoint 2013, SharePoint 2019, and the Microsoft .NET Framework. I have successfully led SharePoint 2019 to SharePoint Online migration projects, developed PowerApps integrated with SharePoint Lists and Dataverse to automate workflows, and created custom Web Parts using SPFx and JavaScript for tailored functionality. Additionally, I possess hands-on expertise in SaaS platforms like IGLOO, enhancing collaboration and optimizing processes to deliver impactful results. As a strong engineering professional with a master's degree in Computer Science from the University of Bridgeport, I am equipped to tackle complex technical challenges and provide exceptional solutions to meet organizational goals.

CORE SKILLS

- **MS Technologies:** SP/Office 365, Power Platform Technologies, SharePoint Online, SharePoint 2019/2016/2013/2010, SPFx, SharePoint Designer 2013, Power Apps, Power Automate, Sharegate, RPA
- **Programming:** C, C++, C#, Visual Basic, JavaScript, jQuery, Angular, Bootstrap, HTML5, CSS3, XML
- **Scripting Languages:** JavaScript, jQuery, Angular, Bootstrap, PowerShell
- **Databases:** SQL Server 2022, Oracle 11g/10g, MS Access
- **Portal Servers:** SharePoint Online (SPO), SharePoint Server 2013/2010, MOSS 2007, WSS 3.0/2.0
- **IDE:** Visual Studio 2018 & Lower, SharePoint Designer, InfoPath, VS Code
- **Web Design Tools:** MS Expression Studio 4, Adobe Dreamweaver CC, Adobe Photoshop CC
- **Operating Systems:** Windows Server 2022, Windows 11, MacOS Sequoia
- **SharePoint Components:** Master Pages, SharePoint Designer Workflow, InfoPath, Site Definitions, Page Layouts, Content Types, Business Data Connectivity (BDC), Application Pages, Timer Jobs, Event Receivers, Search Configuration and Templates, Modern Pages
- **Certifications:** MCP, MCTS in SharePoint 2013/2010, .NET Framework Specialist

WORK EXPERIENCE

Cigna Healthcare

January 2014 - Present

CavalierIT Inc. (Client : Cigna Healthcare)

May 2011 – December 2013

Technical Lead / Power Platforms Developer / Application Development Sr. Advisor

- Implemented governance and site structures for **SharePoint 2019 to SPO migration** using **Sharegate tool** online method for company's document repositories site.
- Created **reusable Common Components** for **Power Apps**, including headers, navigation menus, confirmation pop-ups, filterable gallery headers, calendar views for rapid application development.
- Configured **multiple Power Platform environments** with governance processes to support the application development team.
- Architected and built **custom PowerApps forms**, integrated with **SharePoint Online** Lists to streamline workflows and enhance accessibility.
- Designed **Canvas Power Apps** for business owners enabling task automation and process optimization.
- Utilized **Dataverse** and SharePoint Lists as back-end solutions for process automation.
- Streamlined workflows using **Power Pipelines** and schedules to streamline code deployment and solutions.

- Designed **mobile-friendly Power Apps** with offline capabilities for HR Intake process leveraging Dataverse as the back-end.
- Built a virtual bot in Microsoft Teams using **Power Virtual Agent** to help HR-IT teams quickly search policies and ticket assignment groups, streamlining workflows and boosting efficiency.
- Constructed **SQL stored procedures** and views to support complex application designs in Power Apps.
- Extracted performance metrics using **Power BI** and **Google Analytics**, providing actionable insights for data-driven decision-making.
- Configured On-Premises **Data Gateway**, connecting **Power Platform** with various data sources for seamless integration.
- Implemented **SPFx code/packages** for solutions such as Mega Menus, footers, and custom banners, enhancing user interface design.
- Led the design and migration of the company's intranet from **SharePoint 2019** to the **SaaS platform IGLOO**, for communication team for better collaboration.
- Programmed security workflows through nightly job processes, integrating IGLOO with **Active Directory**.
- Engineered **custom Timer Job** using **SP Object Model** and **Visual Studio 2013**, improving infrastructure for scheduled blog post publishing.
- **Designed and customized SharePoint 2013 Web Parts** (Generic, Visual, CQWP, Script Editor), search configurations, and site templates to meet specific organizational needs.
- **Customized SharePoint 2013 workflows and features** using SharePoint Designer 2013, delivering tailored functionality.
- Set up **sandbox environments** replicating production settings with service accounts for development and testing accuracy.
- Managed **Active Directory** and **User Profiles**, adding users, configuring permissions, and integrating with SharePoint environments.
- Used Server and Client Object Models alongside **PowerShell scripts** for efficient deployment and environment management.
- Applied expertise with **Team Foundation Server (TFS)** for version control and collaborative project management.
- Authored **technical documentation** and deployment guides, ensuring seamless implementation and support.
- Optimized data handling by working with diverse data sources such as SQL, Oracle, Dataverse, and large SharePoint Lists, avoiding delegation warnings and ensuring performance efficiency.
- Applied **Graph API** and **SharePoint API** for application-specific requirements.

CavalierIT Inc.
Client : Exelon Corporation
BPM SharePoint Developer

November 2010 – April 2011

- Configured **SharePoint 2010** virtual environments, enabling streamlined development operations.
- Constructed **web services** and systemized database management protocols, reducing manual errors and saving operational overhead.
- Designed **event receivers** via **solution packages and features**, enhancing SharePoint functionality.
- Customized **advanced search web parts**, enhancing user navigation and metadata management.
- Built **PL/SQL nested queries** for **Oracle** and **SQL databases**, supporting accurate data retrieval for SharePoint lists.
- Introduced **LINQ** and **CAML** queries to modify SharePoint list items via **web services**, enhancing data accessibility and integration.
- Leveraged **iTextSharp 5.0** to **manipulate PDFs** within SharePoint email-enabled document libraries, optimizing document handling processes.
- Prepared detailed guides and **support documentation** to ensure successful deployment and maintenance.

Residential Hall Monitor

- Monitored and maintained visitor logs, ensuring compliance with security protocols.
- Applied security measures within residential premises to safeguard students and property.

CERTIFICATIONS

- **MS SharePoint 2013:** MCP (Core & Advanced Solutions), Application Development
- **MS SharePoint 2010:** MCTS (Configuration & Application Development)
- **.NET Framework:** MCTS (HTML5, ASP.NET, Windows Forms, WCF, WPF Applications)
- **Oracle:** Certified 10g Administrator Professional

EDUCATION**Master of Science in Computer Science**

University of Bridgeport, Bridgeport, CT | *August 2008 – December 2010*

Bachelor of Engineering in Instrumentation and Control

Nirma Institute of Technology (Gujarat University), Gujarat, India | *June 1996 – June 2000*
