PROFESSIONAL EXPERIENCE

Tutor LLC

Software Developer Tutor

New York, NY

March 2025 - Present

- Provided 1:1 guidance in data structures, algorithms, and software engineering best practices
- Simplified complex technical concepts, demonstrating strong communication and mentorship abilities
- Maintained 95%+ satisfaction rating by tailoring instruction to individual learning styles

Infosys Limited

Senior Associate Software Engineer

Contractor for Warner Music Group

Basking Ridge, NJ

Sept 2020 - Feb 2024

- Developed and maintained backend microservices with C#/.NET Core to support Warner Music's music distribution and content management platforms, improving data flow and reducing latency by 20%.
- Designed RESTful APIs for efficient integration with third-party services, enabling seamless content distribution to digital platforms (Spotify, Apple Music, etc.).
- Optimized SQL queries and enhanced data retrieval times by 30% via query optimization methods
- Managed CI/CD pipelines with Azure DevOps for streamlining automation, testing, deploying processes
- Collaborated with cross-functional teams to gather requirements and design software solutions, resulting in streamlined processes and enhanced team productivity in an Agile environment

Protocol Driven Healthcare Inc.

Web Developer Intern

Basking Ridge, NJ

May 2019 – August 2019

- Developed a unit-tested C# expression evaluator to compile and assemble a simulated C# program to test and debug expressions with Microsoft Roslyn API
- Built schedule widget on the platform using ReactJS to keep track of the progress of a health action plan
- Debugged urgent security vulnerabilities and put out permanent solutions in a timely manner

TECHNICAL SKILLS

Languages: C#, SQL, HTML5, CSS3, JavaScript, React

Frameworks: .NET Core, ASP.NET Core, Entity Framework, xUnit

Cloud: Microsoft Azure (Certified), Azure DevOps, Docker, Kubernetes

Software Development: Agile, Scrum, Git, MVC

PROJECTS

Game Scheduler Discord Bot

Oct 2024 - Feb 2025

- Developed in C# / Discord.NET, now actively servicing 1,500+ users across numerous Discord servers
- Engineered a dynamic event management feature allowing users to create time-specific posts and join by reacting to the post, with real-time updates on event timings and participant statuses
- Designed reminder feature for bot to notify via direct messages and implemented various algorithms

EDUCATION

Rutgers University, New Brunswick, NJ – B.S. in Computer Science, Graduated May 2020
